

How to use Turbo VPN

Ever wondered why you watch shows on Netflix or Hulu differently than your friends in another country? Or maybe you tried playing an online game with a friend in another country and found that you couldn't join the same server?

Turbo VPN is a free VPN provider that can help you get around these limitations, but how does it work?

This article will show you how to quickly and effectively use Turbo VPN to bypass geo-restrictions and content blocking.

Turbo VPN gives you all the benefits of unlocking restricted or blocked content on Windows, macOS, iOS and Android phones. Here's what you need to do to use Turbo VPN:

1. Launch Turbo VPN and accept the privacy policy

Picture 1 of How to use Turbo VPN

When you first launch Turbo VPN, you will be asked to accept the privacy policy before being taken to the main screen. By clicking **Accept**, you agree to these terms and will be taken to the main screen of the application.

Tip : Always read the privacy policy as it contains important information regarding the recording of your data and the usage of the VPN.

2. Tap to select a server

Picture 2 of How to use Turbo VPN

The home screen is very basic, and to get started, all you need to do is tap the carrot-shaped button to connect to the server.

3. Select an available server from the list provided

Picture 3 of How to use Turbo VPN

Next, you will be shown a list of servers in different countries to choose from. Select the server from the country you want to have access to. The app will show you the fastest servers by default. This is also part of the VIP package for premium subscribers. If you click on the second tab, "**Free**", you will see a list of free servers and

their associated connection speeds.

4. Accept connection request

Picture 4 of How to use Turbo VPN

Once you have selected a server, a connection request message will appear. If you're ready to establish a connection, tap **Ok** to start establishing the connection.

5. Wait for the connection to the server to be established
