

How to use Tweakbox to install applications, copyright games without jailbreak on iOS

Tweakbox is a utility on iOS that supports users to install apps, games limited on iOS devices without jailbreaking the device.

Normally, if you want to install a limited or copyrighted app or game on an iOS device, you must pay the installation fee or proceed with jailbreaking the device. However, there are now many tools to help users install copyrighted applications on iPhone, iPad like FTIOS, or Tweakbox that Network Administrator wants to introduce to readers.

Tweakbox allows users to install applications and copyrighted games for iPhone and iPad for free. Users only need to install Tweakbox utility on the device, without having to jailbreak the device or use additional intermediary support tools such as Cydia Impactor. In addition, the tool also added some features such as fixing crash app, providing applications that appear in iOS beta, NES, PS, GamePad, .

Get The App

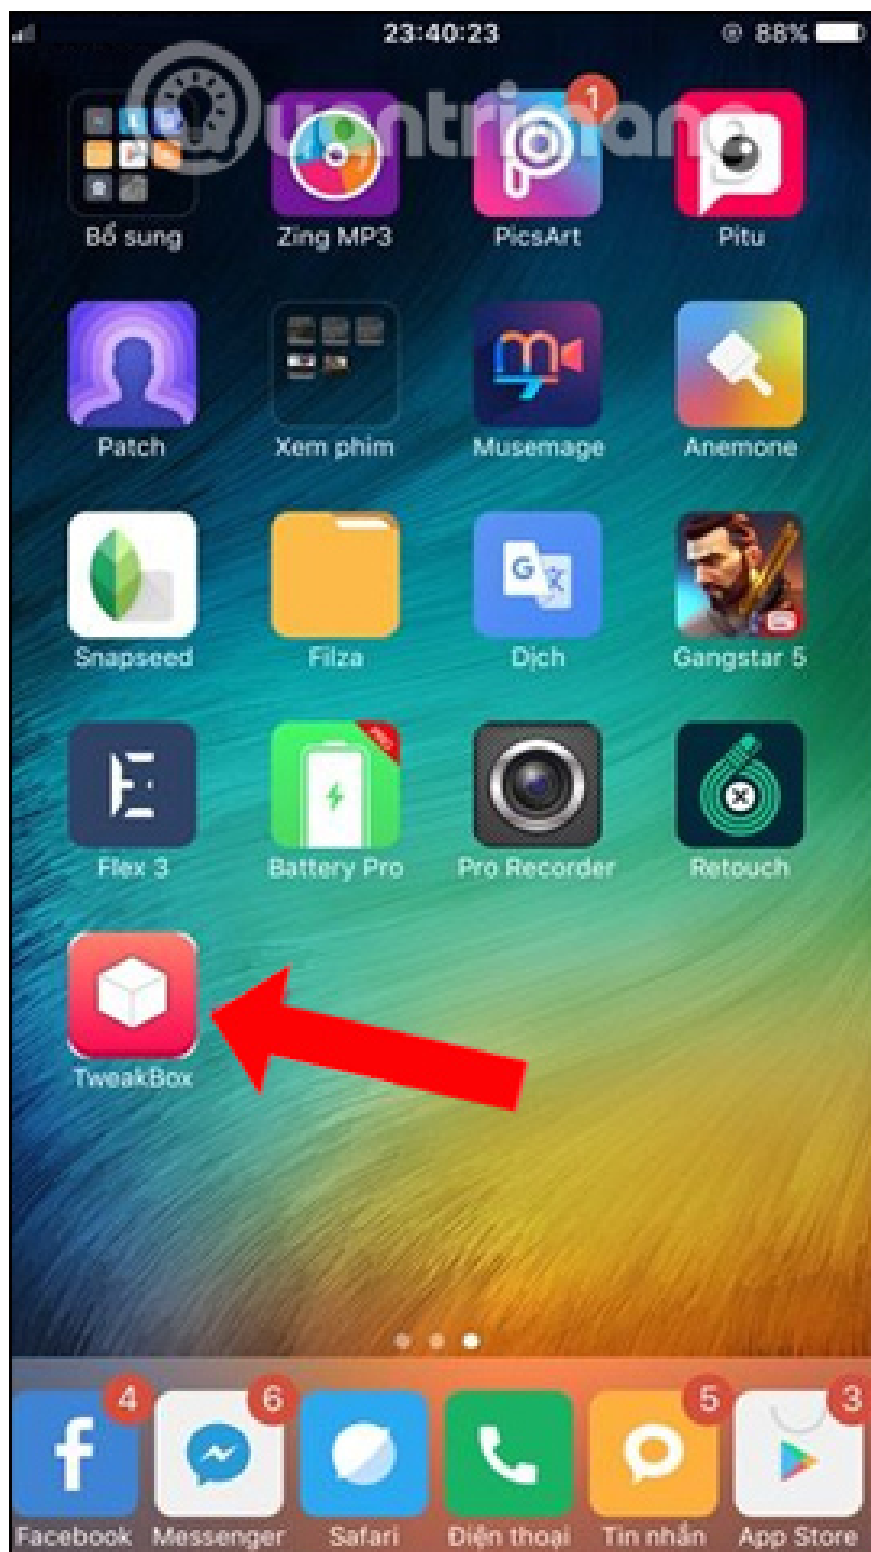

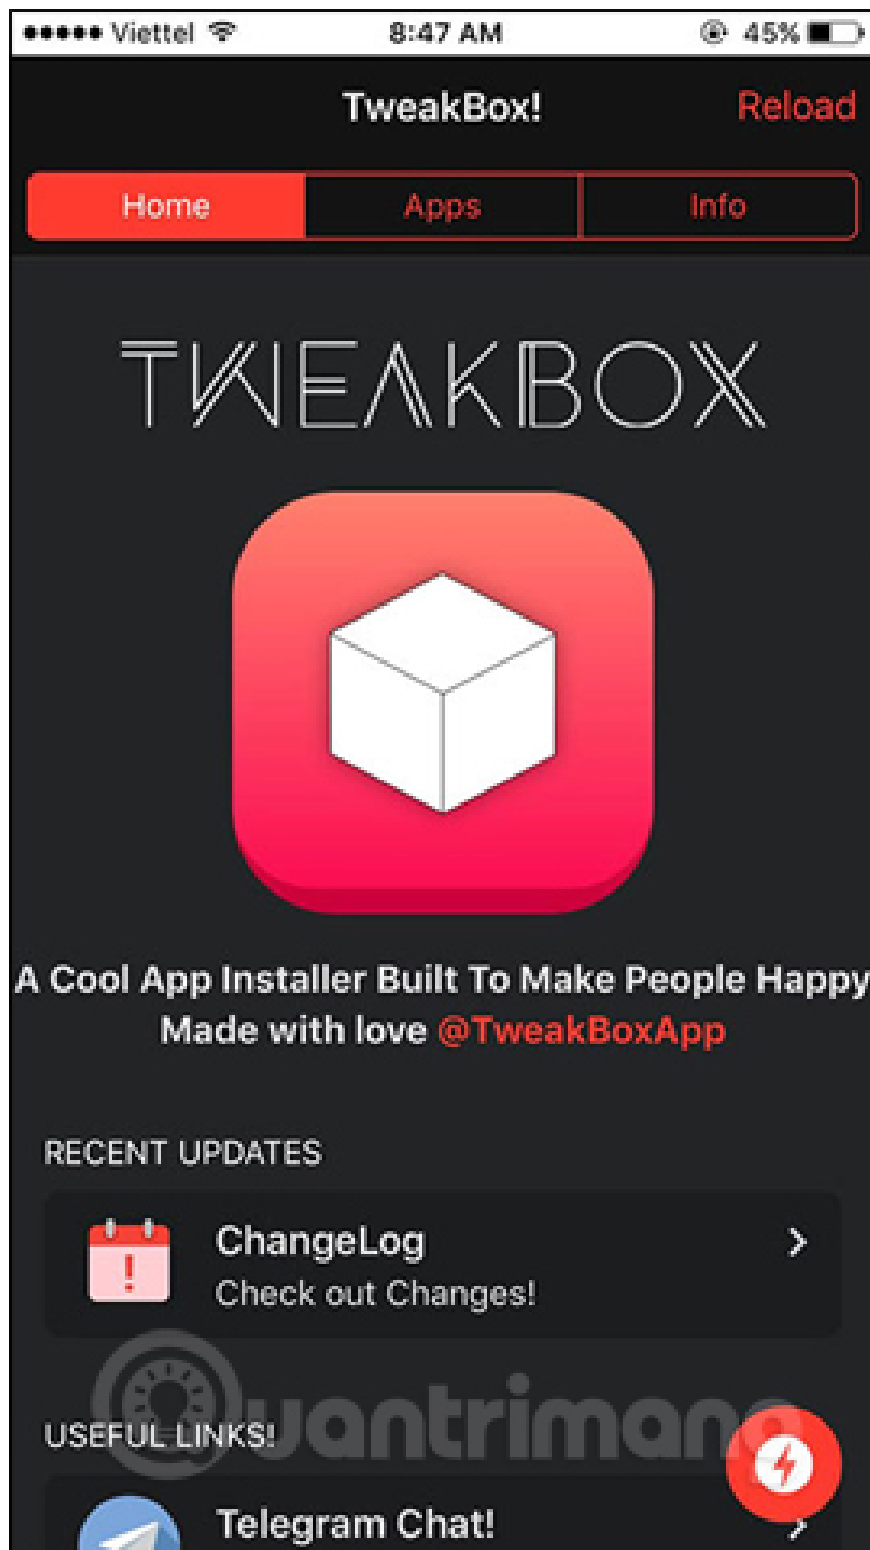

Step 2:

After installation is complete on the screen will appear the interface of Tweakbox utility. Click on the widget icon to open it. In the case of an advertisement interface, turn it off. In Tweakbox's main interface, we will see 3 main management items including Home page, Apps and Info. Click the **Apps tab** to install applications, games and app mods.

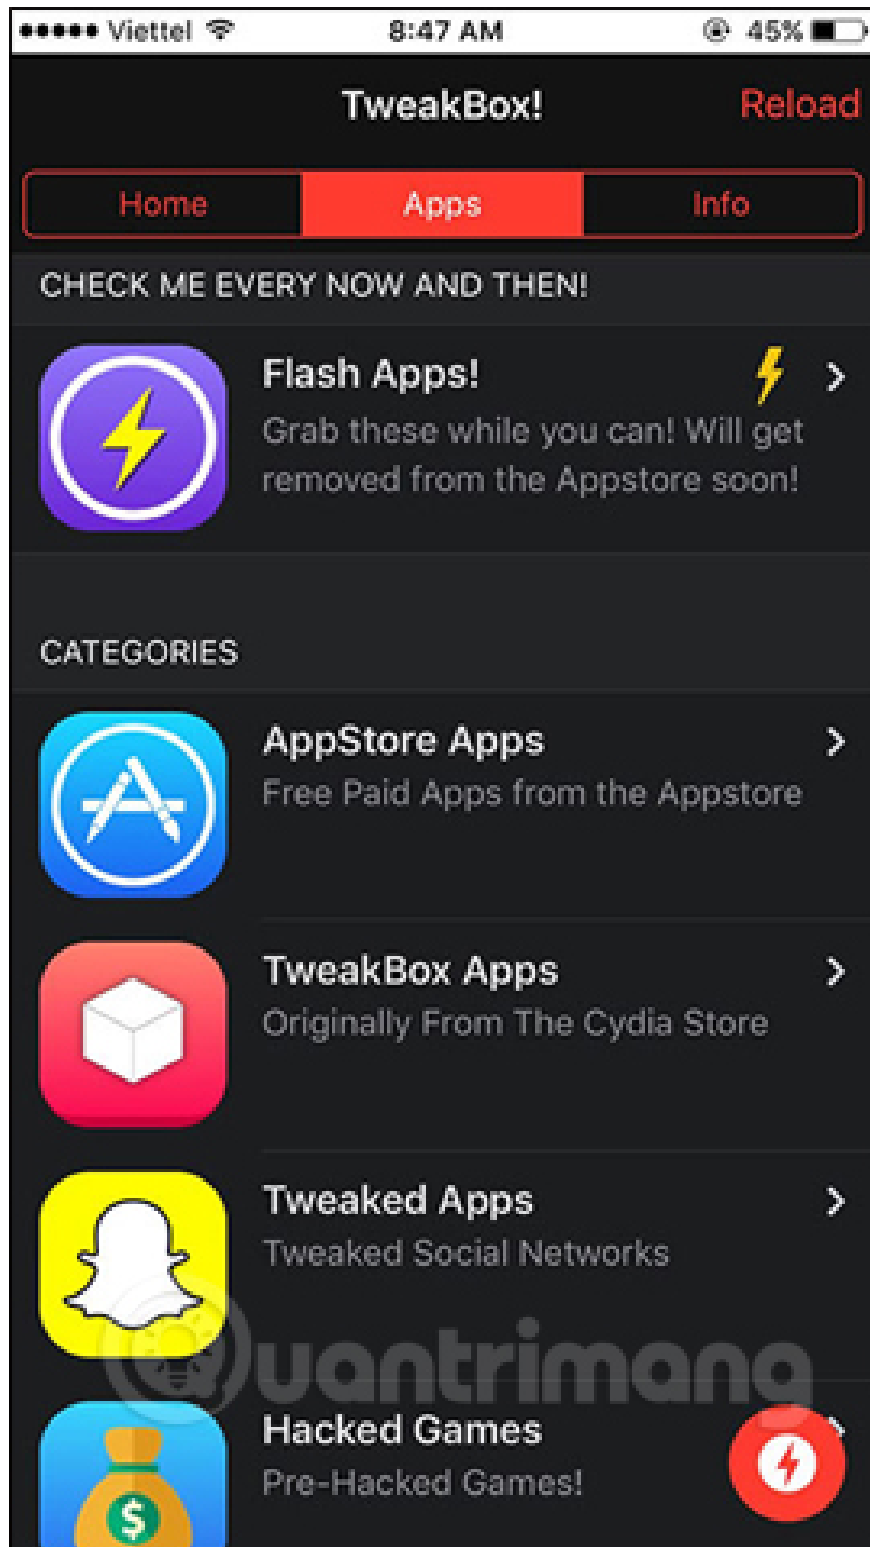

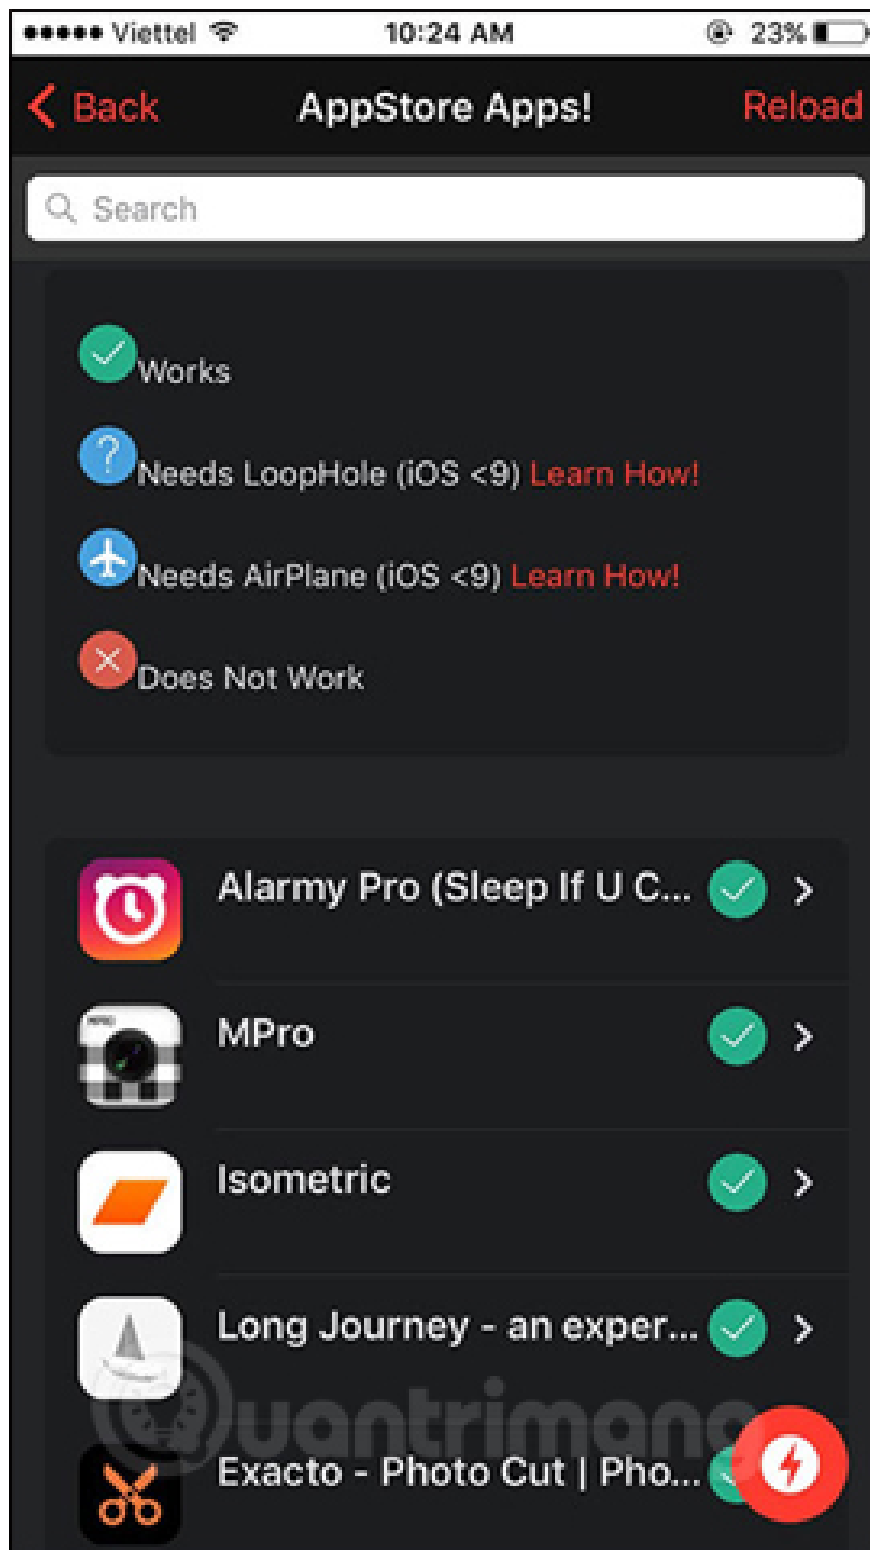

Step 3:

The application interface Tweakbox provides includes AppStore Apps (applications, copyright games from the App Store), TweakBox Apps (TweakBox application from Cydia), Tweaked Apps (social networking applications have been tweaked in one More convenient features to use), Hacked Games (games that have been unlocked to make playing easier).

It can be seen that Tweakbox provides many popular applications and games for users to search and install.

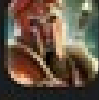

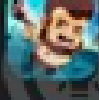

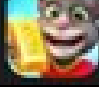

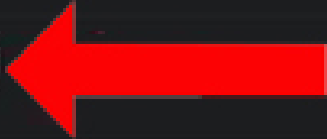

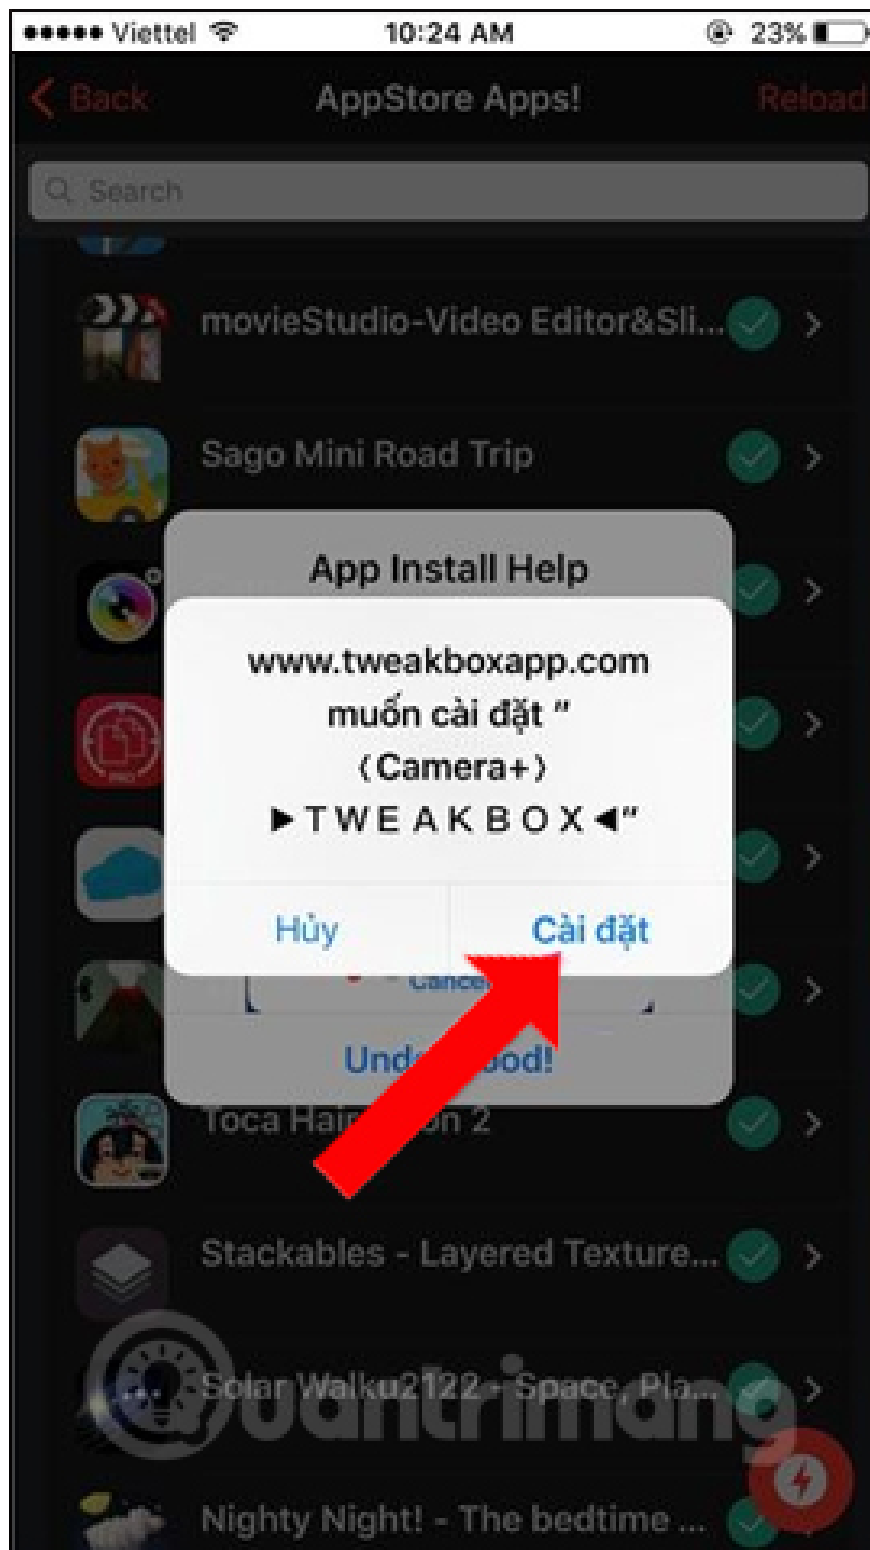

Step 4:

Click on the application or game you want to download to the device, click Next **Install** (Install) and wait for the download application to complete on the device.

Search

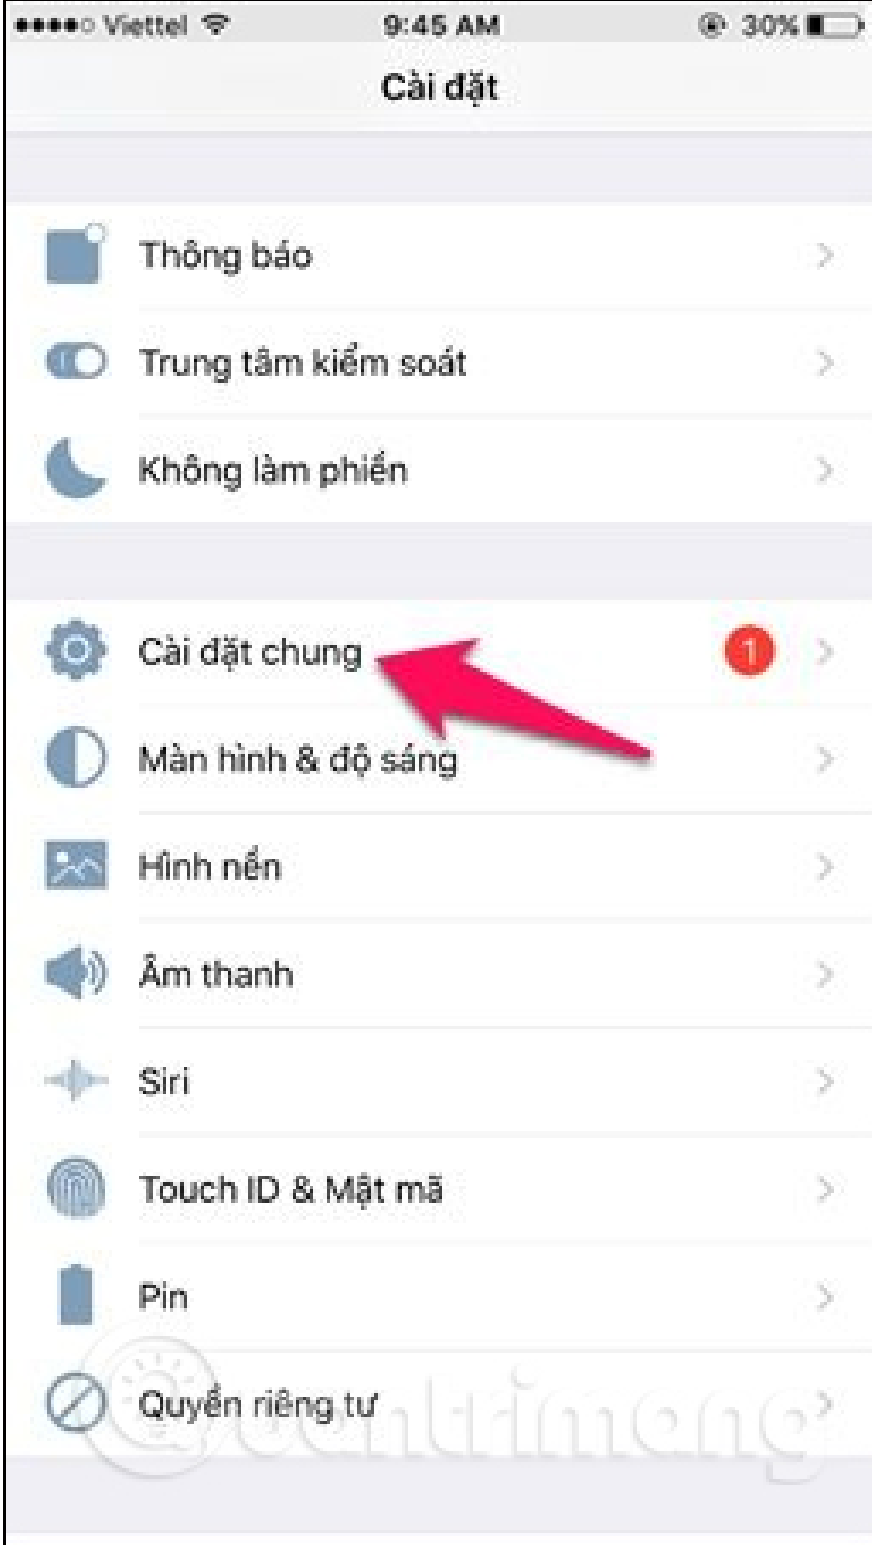

-  Eternity Warriors 2  >
-  Kingdom Rush Origins  >
-  Deus Ex: The Fall  >
-  Kingdom Rush Frontiers  >
-  Wild Blood  >
-  Godfire: Rise of Prometheus  >
-  GT Racing 2: The Real Car Ex...  >
-  Pacific Rim  >
-  Aliens Drive Me Crazy  >
-  Talking Tom Gold Run  >

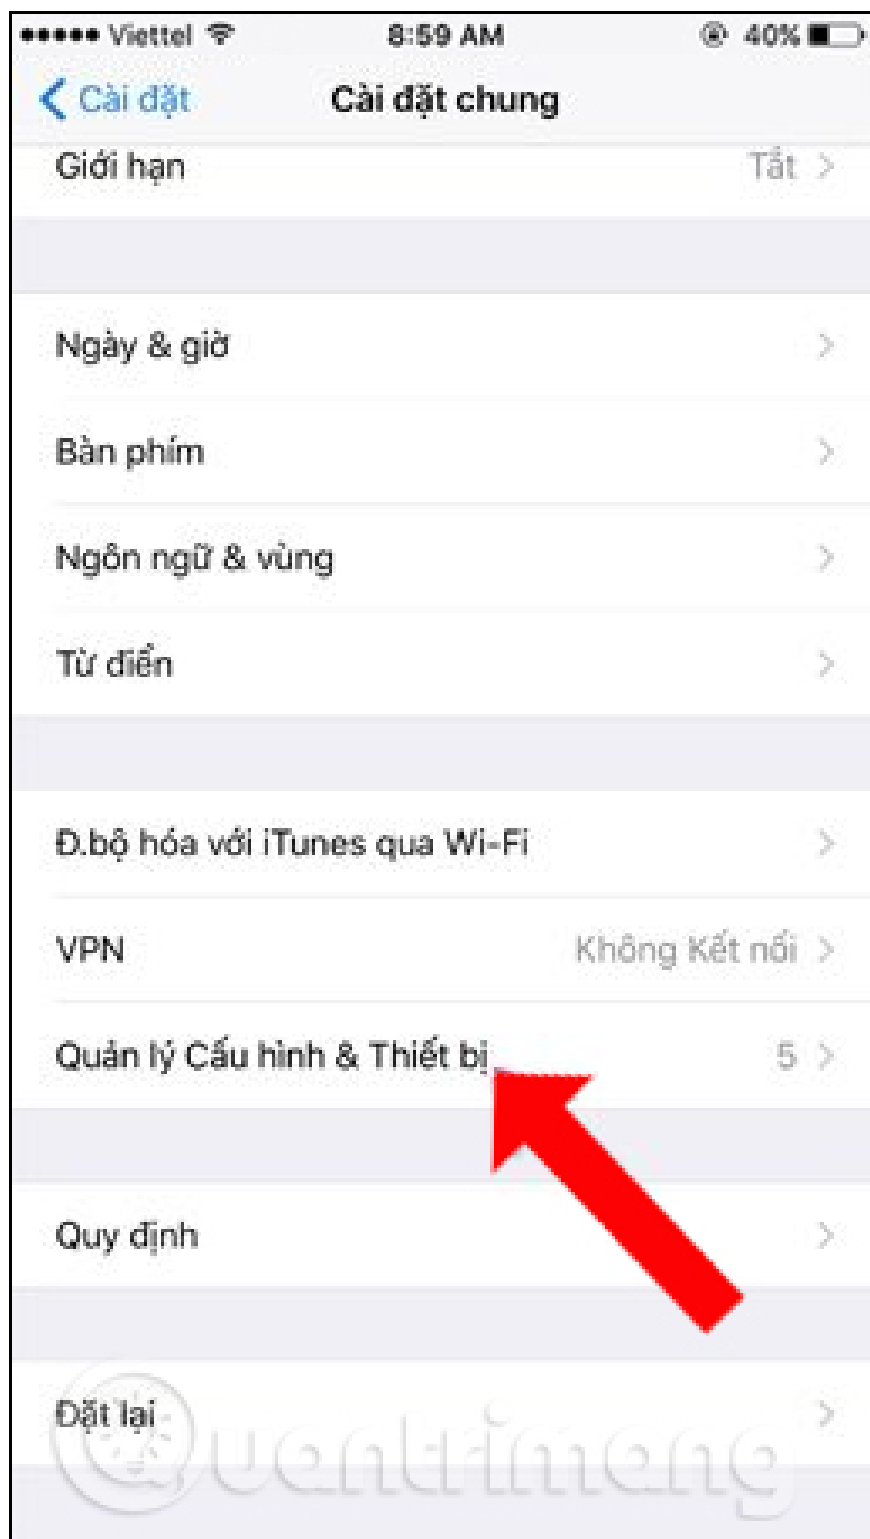

Step 5:

Next go to **Settings** (Settings) and then choose **General settings** (General). In the General Settings list, navigate to **Configuration & Device Management** (Profiles & Device Management).

Step 6:

In the Enterprise app section, click on the download application developer and then click Next **Developer** trust (Trust .). Finally open the app or game to experience it

Apps installed from TweakBox Apps, Tweaked Apps and Hacked Games all require user rights in the above manner.
