## Instructions for using Unlocker on Windows

### Step 1:

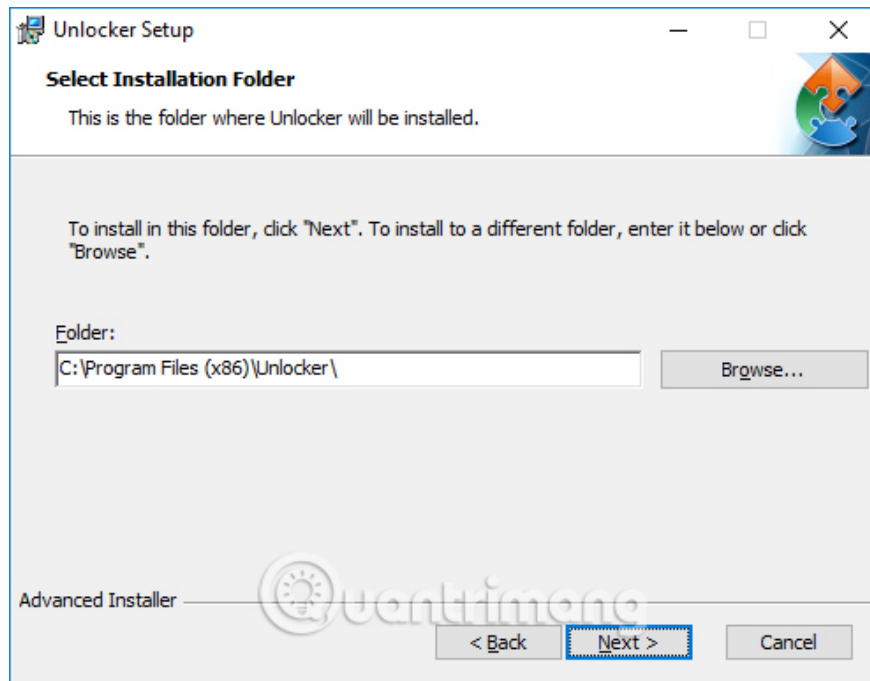

Click on the link below to download Unlocker software to your computer and proceed with the installation.

1. Download the Windows Unlocker software

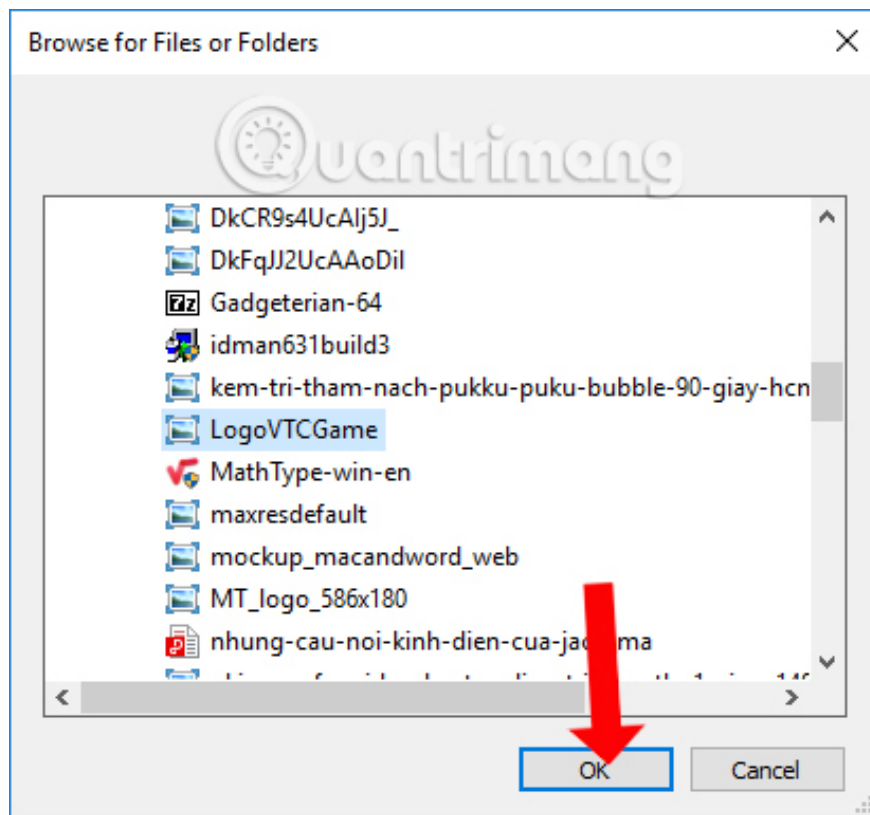

### Step 2:

Select the software installation folder by clicking **the Browse button** or clicking the Next button to continue. Finally, wait for the installation process to complete.

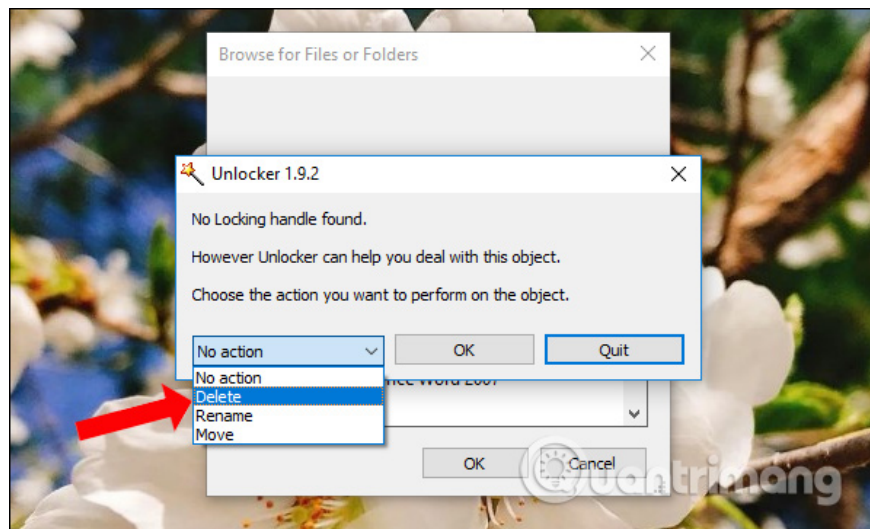

### Step 3:

Click on the software icon and the folder interface will appear on your computer. Look for the file you want to delete and click OK.

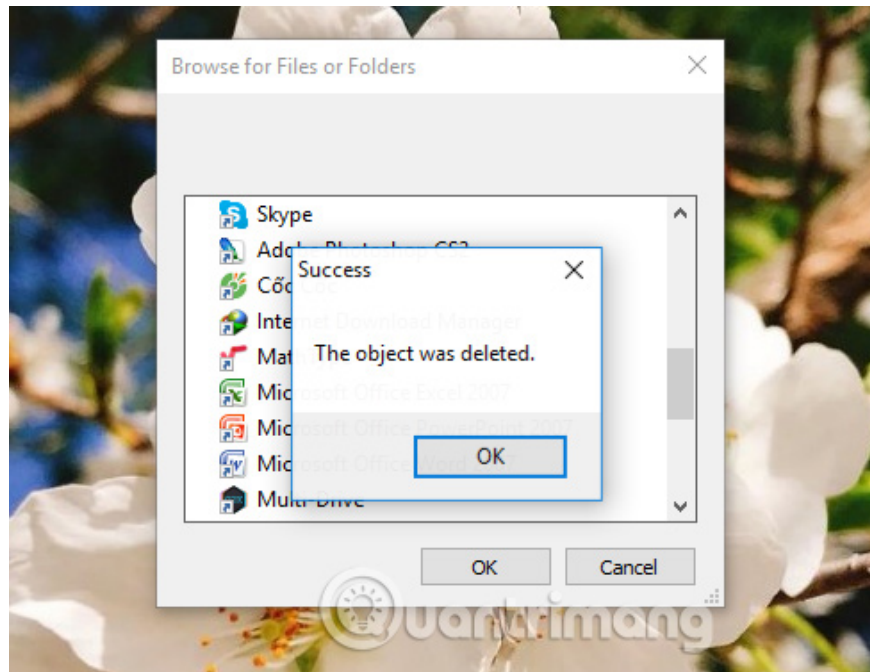

#### Step 4:

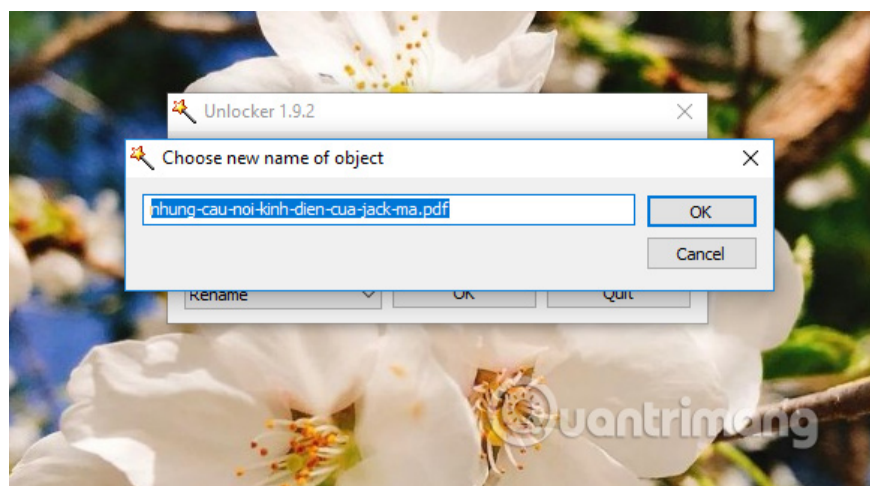

A new interface appears for users to choose to manipulate the file. In the No action section, click **the Delete operation** to delete the selected file. Click OK to proceed.

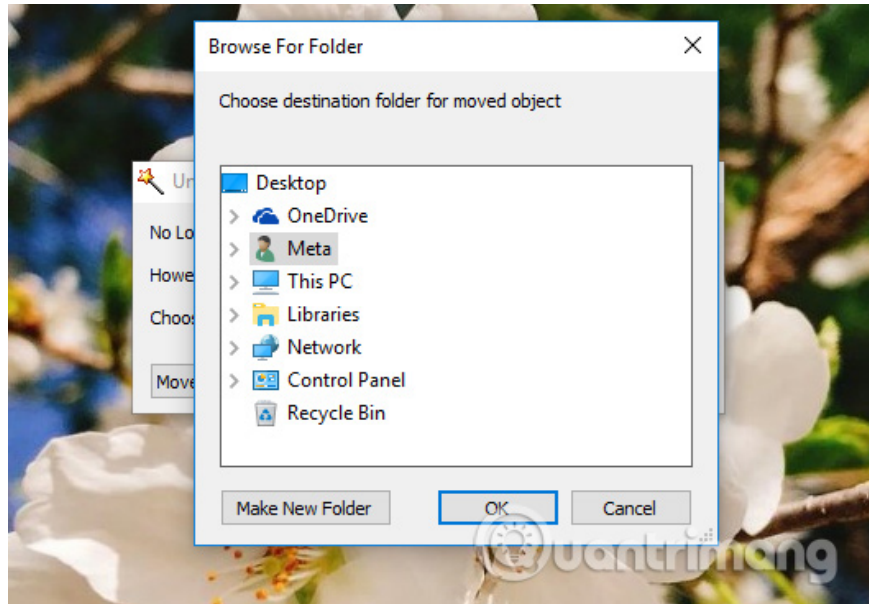

When you have a message like the image below, you have successfully deleted the file.

In addition, the software also supports moving files to other storage folders, or renaming files and files. To rename you click **Rename** . The table will then display a new name for the file.

If you want to move the new archive, click on **Move** . Then the user selects a new folder to store the file. Or if you want to create a new folder, click Make New Folder.

With Unlocker software, we are able to completely remove the corrupted, stubborn files that cannot be deleted in the usual way. Operation is very simple and quick. Also users can rename files or move storage locations right on Unlocker interface.
