

How to use video as New Tab background on Microsoft Edge

To use video as the New Tab background on Chrome, users will need to install support. However, with the Edge browser, we do not need the utility, but will immediately use the background setting feature for New Tab on Microsoft Edge.

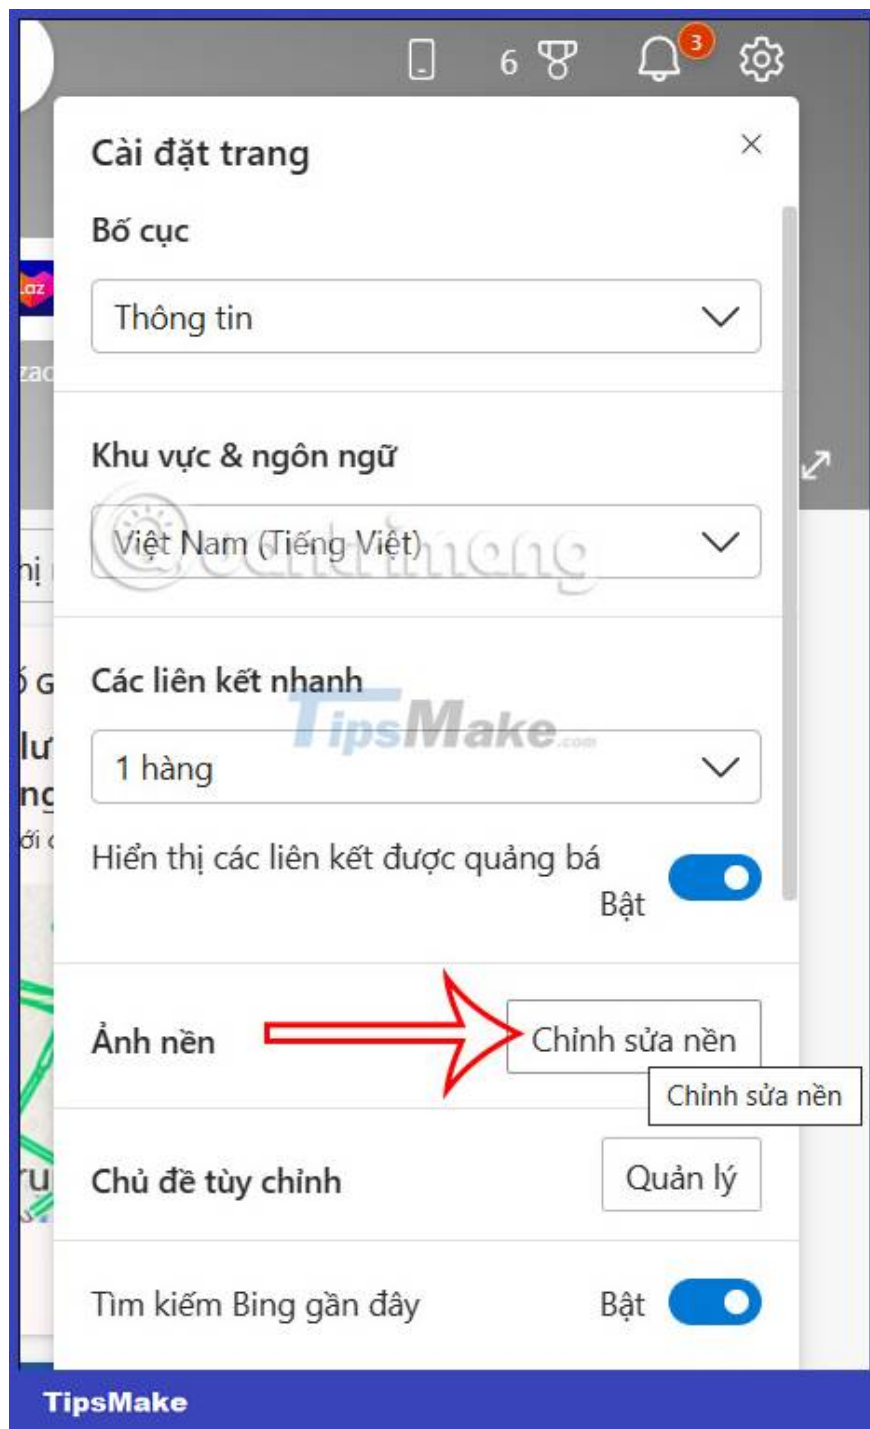

Currently, the background setting feature for the New Tab page on Microsoft Edge has been applied in new versions for users to experience. The following article will guide you to use video as the New Tab background on Microsoft Edge.

Instructions to use video as New Tab background on Edge

Step 1:

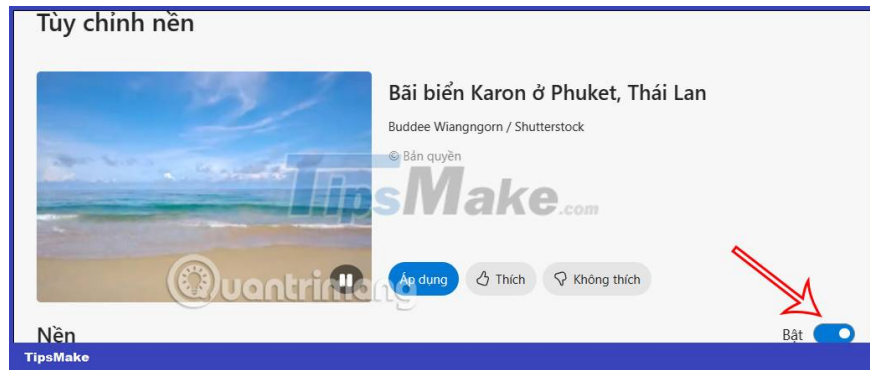

At Microsoft Edge browser, users will click on **the settings icon** in the upper right corner to adjust the background page as shown below.

Then in the list displayed at **the Background image section** , the user will click on **the Edit** background item.

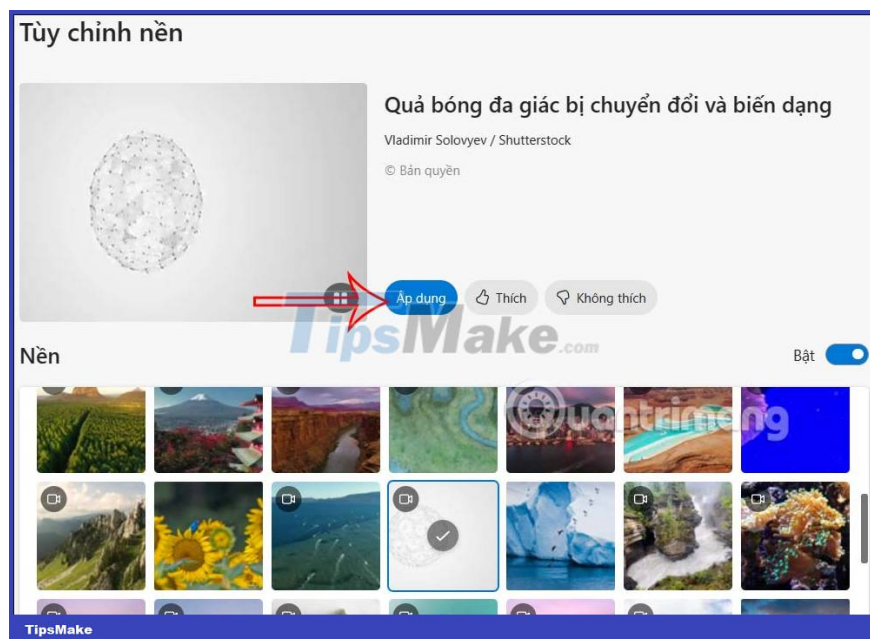

Step 2:

Now switch to the new interface, the user will **activate the Background mode** to use. Currently, the browser does not have the option to download your video, but we will choose the available videos.

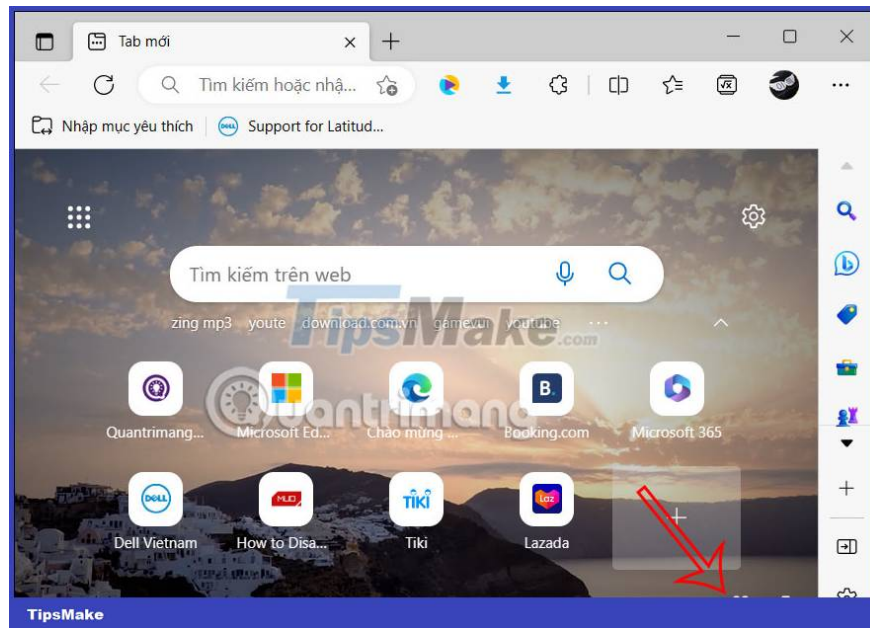

Step 3:

You click on **the videos with the icon** and then **select the video you want to set as the background for the New Tab page on Microsoft Edge**. Select the video you like, then **click the Apply button** to perform.

As a result, we will see the New Tab page background video on Microsoft Edge as shown below. Below there will be a play option for you to stop playing the video whenever you want.

Step 4:

Return to the background adjustment interface for the New Tab page on Microsoft Edge. You scroll down below, there will be a **setting Change new background every day** . If users like Microsoft Edge to automatically change the new wallpaper for the New Tab page, enable this feature.

Step 5:

Next below you will see an **option Video settings** . We will click on one of these two settings when setting the video as the New Tab background page on Microsoft Edge.
