

# How to use Virtual DJ on a computer

With its cutting-edge smart DJ technology and intuitive features, VirtualDJ is easy to use for any DJ, no matter how new you are. And VirtualDJ is free for non-professional use.

Virtual DJ is music mixing software for both aspiring DJs and professional DJs. It offers numerous tools such as mixing, noise filtering, and sound adjustment for optimal quality. With its intelligent working mechanism, Virtual DJ will assist you with most tasks throughout your work process. This article will guide you on how to use Virtual DJ in detail. Please read on.

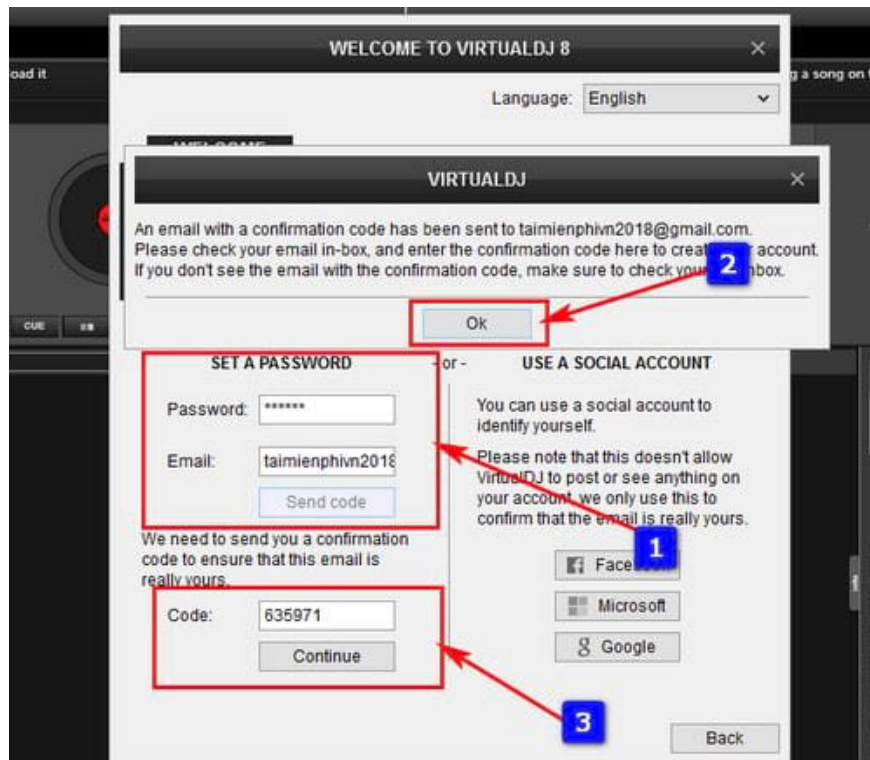

## *How to use Virtual DJ, play DJ music on your computer.*

You can download Virtual DJ to your computer using the link below: [Download Virtual DJ](#)

*Step 1:* After downloading and installing Virtual DJ, launch Virtual DJ. You will see a Welcome screen; enter your DJ name in the "**Choose your DJ name**" section and click **Reserve** to continue. You can check the "Don't ask again" box to prevent this message from appearing the next time you launch the app.

*Step 2:* Enter your password and email, then click **Send Code** and click **OK**. You will receive a code; enter this code in the **Code** field below and click **Continue** to start using Virtual DJ.

*Step 3:* You will see the Virtual DJ interface, which has four main sections.

- 1 - This is the file management area; select the path to add a new music file you want to mix.
- 2 - This is the main area for mixing music, including two discs on the right and left sides.
- 3 - This is where the list of added music files is stored.
- 4 - Basic information about the music files.

Step 4: You can make other settings such as adjusting the input and output for audio files, live streaming, setting keyboard shortcuts, recording, etc., for Virtual DJ by clicking on the gear icon.

Step 5: To start mixing music using Virtual DJ, you can add music by selecting the path as shown in the image or directly dragging and dropping audio files into the list of music files.

*Step 6:* Both drives will function equally. The purpose of having two drives is so you can select two tracks and mix them together from two sides. In this article, we will only use one track and guide you through the basic mixing process using one side.

*Step 7:* Here you will find the necessary functions for mixing music.

- 1 - Adjust the volume up or down.
- 2 - Music playback speed; click Tap to adjust this speed.
- 3 - You can add music files by dragging them from the playlist here.
- 4 - Drive for DJing music .
- 5 - You can create effects for your music here.

**Effect** : create an effect

**Loop** : Repeats a section of music in the song; the number of repetitions can be adjusted to 2, 4, or 8 times.

Hopefully, through the article above, you have been able to understand and know how to use Virtual DJ and its functions. We wish you will soon become a DJ in the near future. Additionally, you can refer to the article "Mixing Music Using Virtual DJ" that we have shared on TipsMake.
