## Instructions for using VPN Client Pro Windows 10

### Step 1:

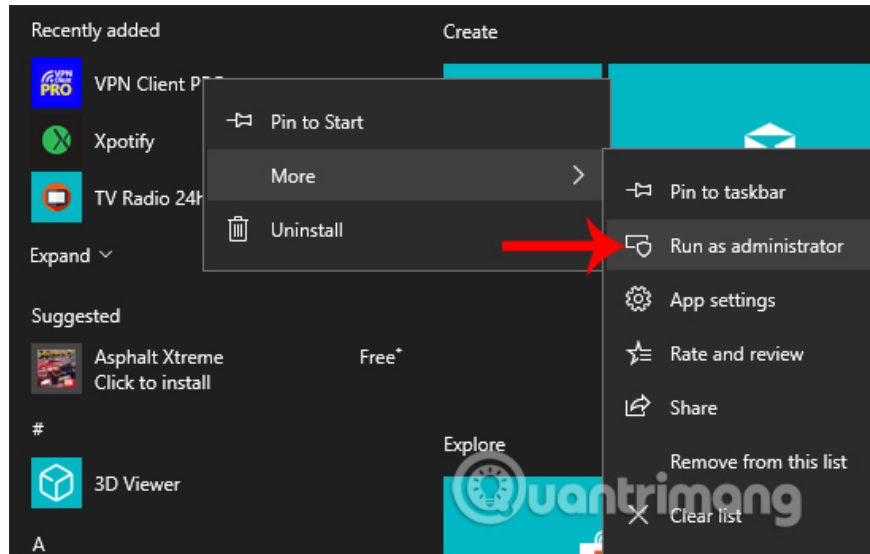

We download the VPN Client Pro application for Windows 10 according to the link below.

1. Download the VPN Client Pro Windows 10 application

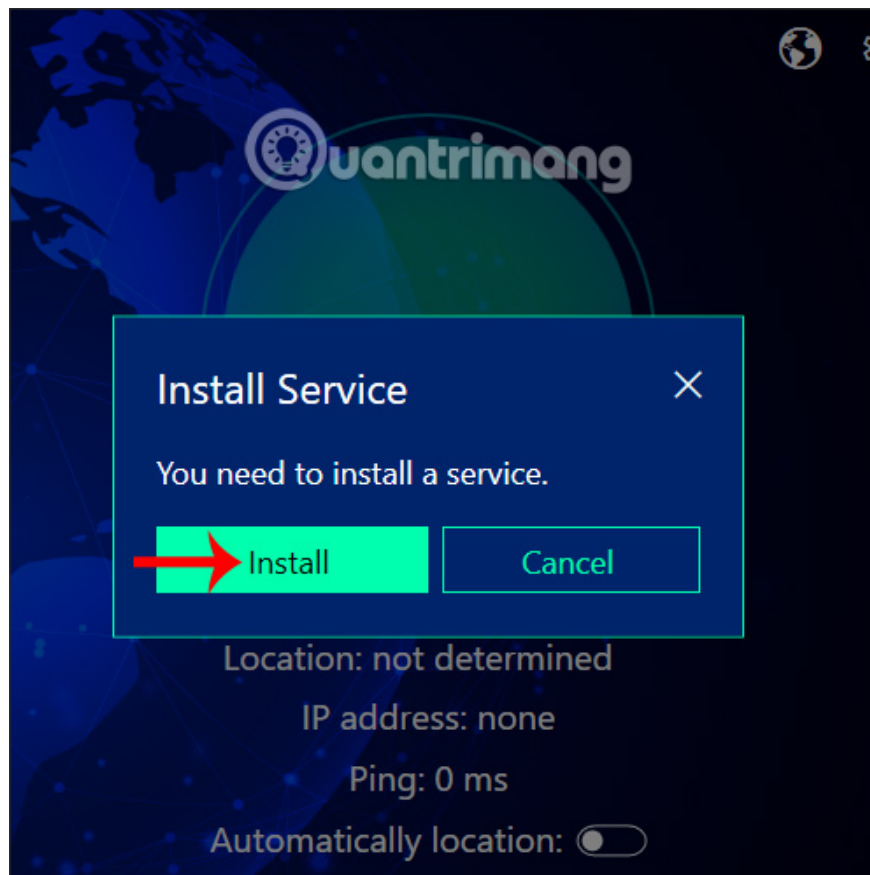

## Step 2:

The active application will require administrative rights and service installation. We click on the **Start** button and then click on the application to **select More** and then select **Run as administrator**.

Display the VPN Client Pro application interface, click **Install** to proceed to install the application.

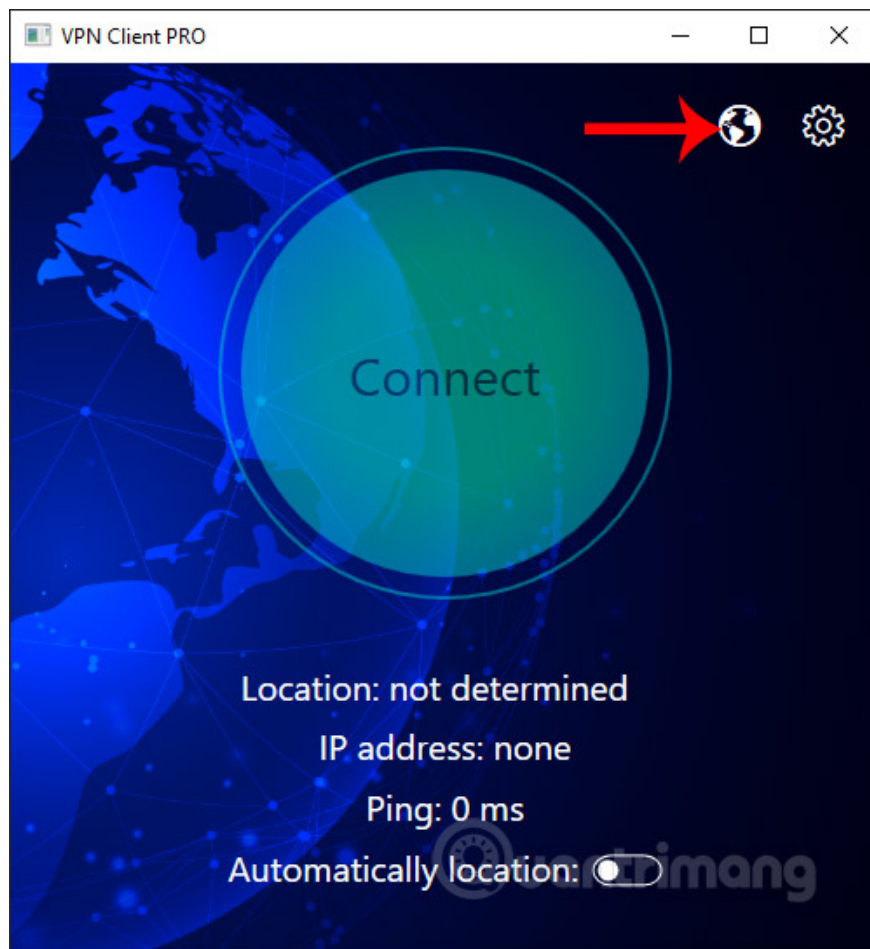

After that, the application installation process takes place.

### Step 3:

In the main interface of the application to conduct the connection, users proceed to connect to other locations. We have 2 ways to connect manually or automatically.

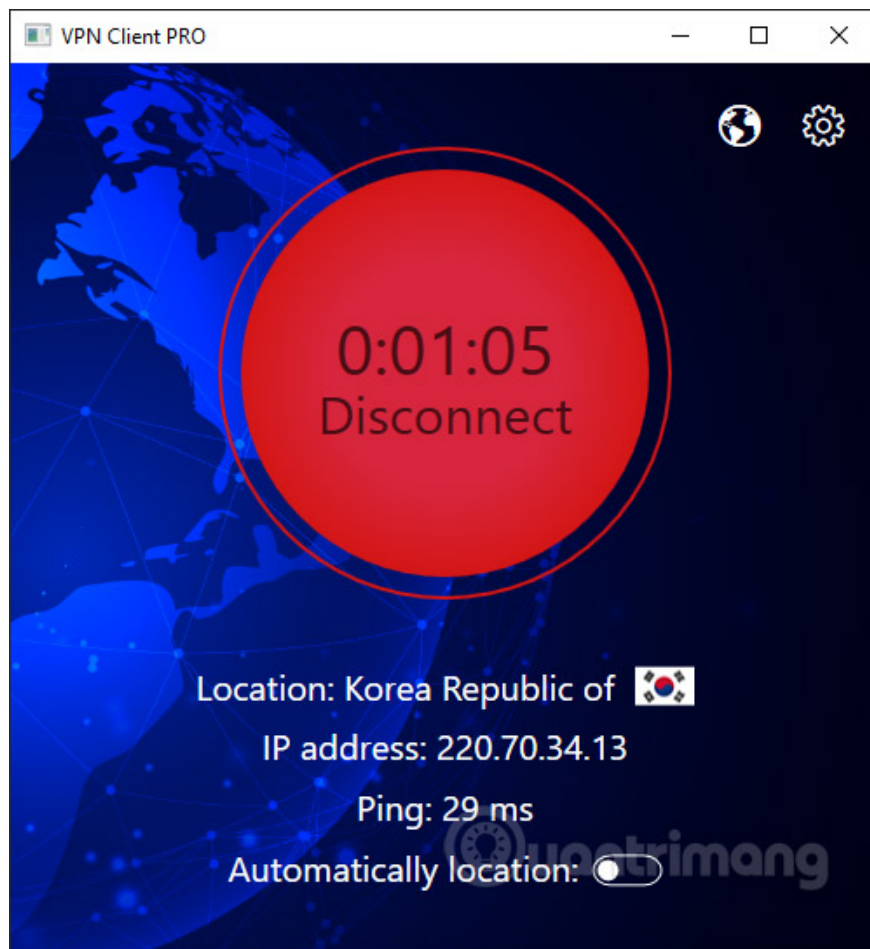

**With manual connection** , we click on **the globe icon** above the right corner of the interface.

Display the location list in different countries. The first positions usually have the fastest and most stable connection speed, displayed by the spine symbol. All three columns are usable and stable. Just click on the location you want to use, the process of connecting the virtual private network to the selected location will automatically take place.

When displaying Disconnect, the connection was successful. In this interface the user sees the new IP address Ping indicator.

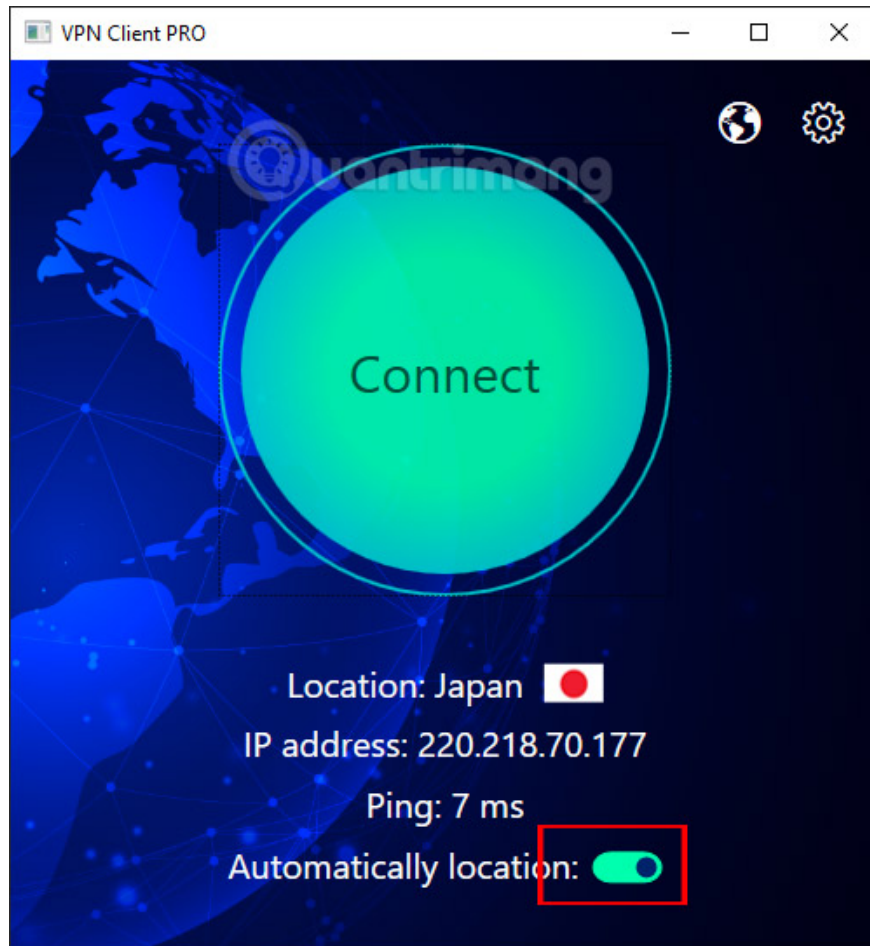

To **stop the connection**, click **Disconnect** , click Connect to reconnect to the previous location.

**Step 4:**

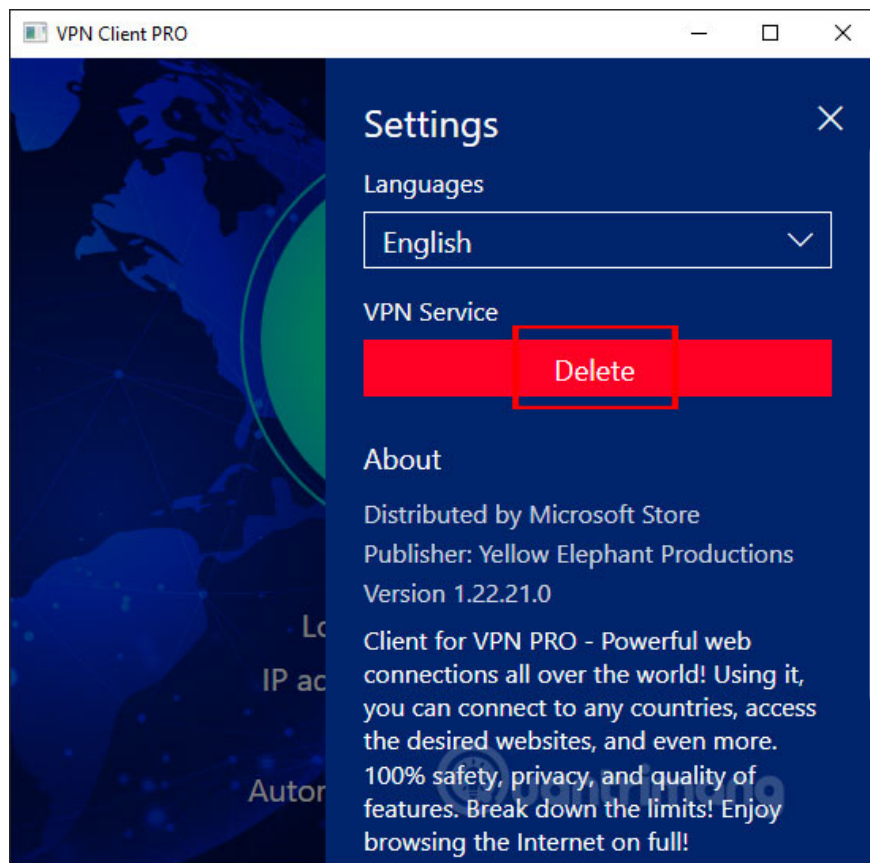

To **connect automatically on VPN Client Pro** , users **activate Automatically location mode** and then click Connect to turn on automatic connection mode.

Then the application selects the connection to any location with the most optimal and stable speed. We also click Disconnect to stop the connection.

**Step 5:**

If the **connection is faulty** , the user presses **the gear icon** and **press Delete** to delete all connections on the application.

Click **Yes** to agree. Then restart the application and open the application with administrative rights.

Using VPN Client Pro application is similar to other VPN applications. Users have connection lists to choose the location they want. VPN Client PRO only for trial in a short time but do not specify the time, so users can quickly download the application.

I wish you all success!
