What are wireless headphones?

For phone users, **wireless headphones** are certainly no stranger . It is a technological device that uses Bluetooth wireless connection to transmit sound to you.

To avoid mistakes and questions when using wireless headphones for the first time, please refer to this article from TipsMake!

How to use wireless headphones effectively

1. How to connect wireless headphones to the device

- How to connect wireless headphones to your phone

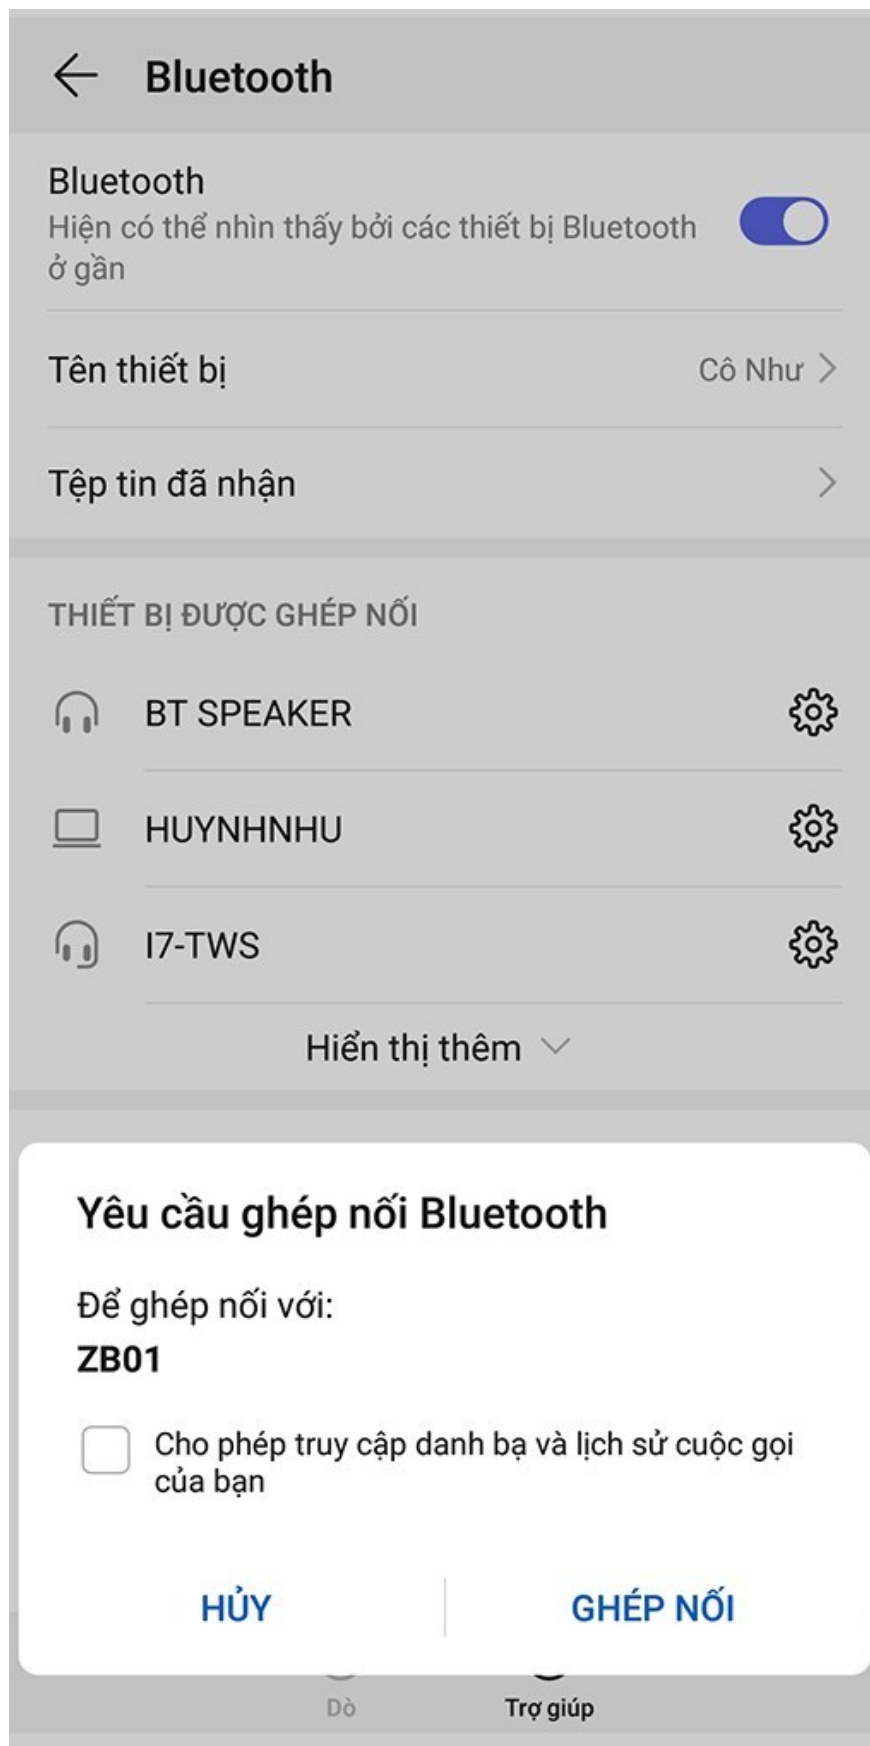

Step 1 : First, you must press and hold the power button on the headset for about 5 seconds. Check the battery and recharge it if it runs out. After pressing for about 5 seconds, the light will flash, this is when the headset is turned on.

Step 2: Next, turn on Bluetooth on your phone and search for the device you want to connect to.

Step 3: Select the name of the headset you want to connect to in the search list. If your headset does not appear, check to make sure it is still working. Do not connect to other devices.

Step 4: Your phone will display a notification when the headset is selected to connect, asking for a password to connect. Enter the password written by the manufacturer inside the user manual inside the headset box.

Step 5: After completing the password entry, the headset will automatically connect. Turn on your favorite song to enjoy with your favorite wireless headset.

Note: Another cool tip for **using wireless headphones** is that you can completely customize the volume and answer calls if it supports hands-free calling. In addition, to keep the connection uninterrupted, you need to keep a distance of 10m from the phone.

- How to connect wireless headphones to computer, laptop

Step 1: To connect wireless headphones to a laptop or computer, the first important thing is to make sure the Bluetooth function on the computer is turned on.

Step 2: On the wireless headset set up Bluetooth.

Step 3 : In the list displayed in the Bluetooth settings on your computer, find the name of the wireless headset you want to connect to.

Step 4: Finally select and pair the wireless headset with the computer.

2. How to charge wireless headphones

When learning about how to use wireless headphones, many people are interested in how to effectively charge wireless headphones. With regular wireless headphones, you can charge them with the charging cable that comes with the product when you buy it.

As for True Wireless headphones, put the headphones in the dedicated case and close the lid. The dedicated case will light up orange while charging and the light will turn off when charging is complete.

You can use the charging cable that comes with the product to fully charge the dedicated case. Besides, you can also charge the earphones while charging the case.

Charging procedure: To charge the wireless headset, first plug the charging end of the USB cable into the headset.

The other end is plugged into the charger or laptop's USB port. The charging cable is usually sold with the headset.

And when the charging indicator light is on, it means the battery is charged, until the light turns green, it means the headset is fully charged.

3. How to disconnect wireless headphones

Method 1: The headset will automatically turn off when placed in the charging case.

Method 2: Press and hold the right or left headphone button for about 4-5 seconds. At this time, the LED light on the headphone will flash three times and both headphones will turn off.

4. How to use wireless headphones to ensure product longevity

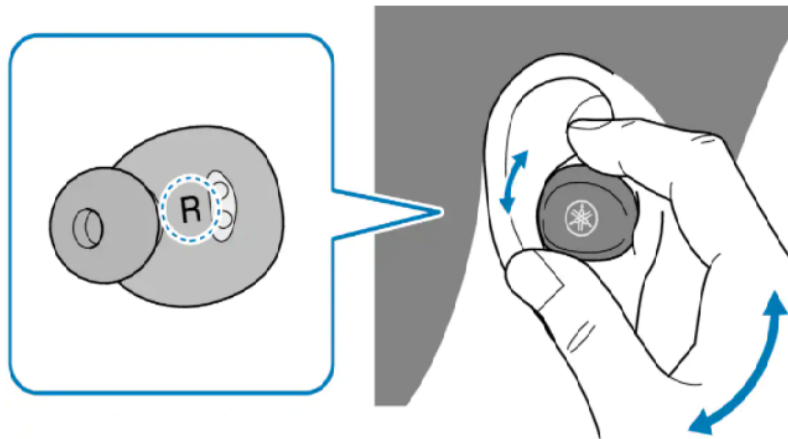

Some notes on how to use wireless headphones to maintain product life include:

- Do not charge the battery overnight.
- During charging, avoid connecting the headset to the device or using the headset.
- Do not let the headset run out of battery for too long.
- Use a specialized box or bag to store your headphones.
- Avoid leaving the headset in humid or high temperature environments.
- Wipe with a dry cloth to avoid dust and water.
- Do not use headphones for too long at maximum volume.

5. How to use wireless headphones to limit hearing damage

Worldwide, more than 1 billion people aged 12-35 are at risk of hearing loss due to listening to loud music on mobile devices, according to the World Health Organization (WHO). According to statistics in Vietnam, in recent years, the number of young people seeking medical treatment for hearing-related illnesses has also increased.

You should follow the following way to use wireless headphones to keep your ears healthy. Apply the 60-60 rule: the volume does not exceed 60%, the time of continuous use of headphones does not exceed 60 minutes. Applying this rule will help you protect your hearing when using headphones significantly.

Apply the 60-60 rule when using headphones

Through the ways to use wireless headphones that TipsMake shared above, you can completely rest assured if you own a wireless headphone with the small tips above.
