

How to use Z1 CryptNow to encrypt data on Windows 10

Z1 CryptNow is a data encryption application that is not limited to file formats and capacities.

Data encryption is one of the ways to secure content and information to prevent others from stealing content. Z1 CryptNow is a data encryption application on Windows 10, with no limit to the file upload format and the size of uploaded files for encryption. The file has been decrypted, enter the correct password but still cannot view the file contents. Z1 CryptNow encrypts files, attaches to PDF files, can open files from any PDF reader, but internal attachments can only be extracted, saved to the computer from Adobe Reader software. . The steps to use Z1 CryptNow will be in the article below.

Instructions for encrypting files on Z1 CryptNow

Step 1:

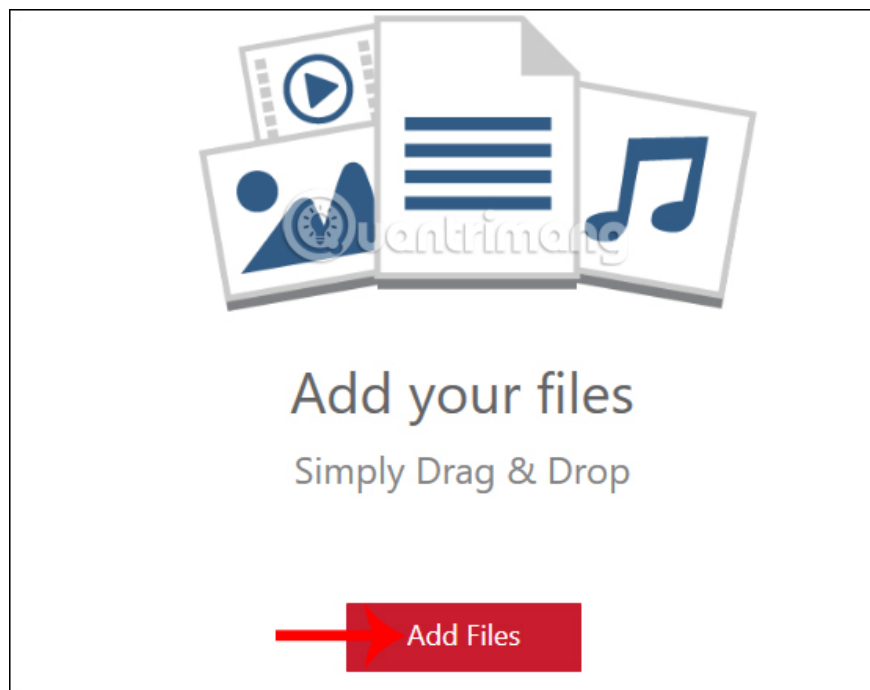

We download the Z1 CryptNow application for Windows 10 according to the link below and then proceed with the installation.

1. Download Z1 CryptNow for Windows 10

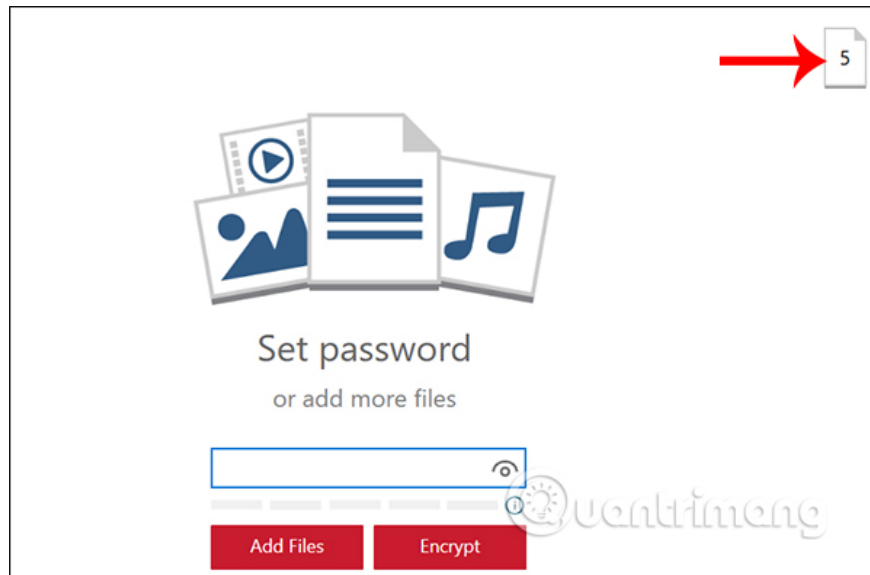

Step 2:

In the application interface, click **the Add Files button** to download the file to conduct data encryption. Users can download multiple files at once.

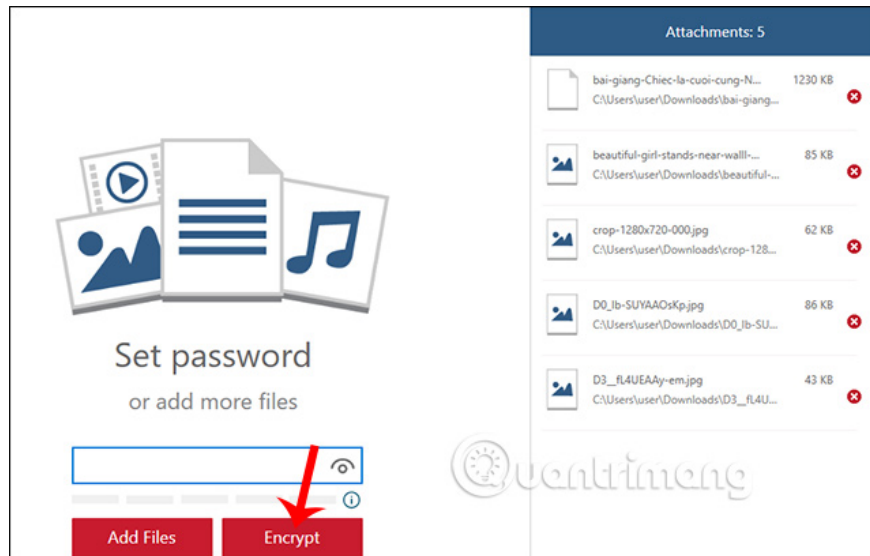

Step 3:

Show the interface for users to check uploaded files, through the number of selected files displayed in the right corner of the interface. If you want to add files, click Add Files.

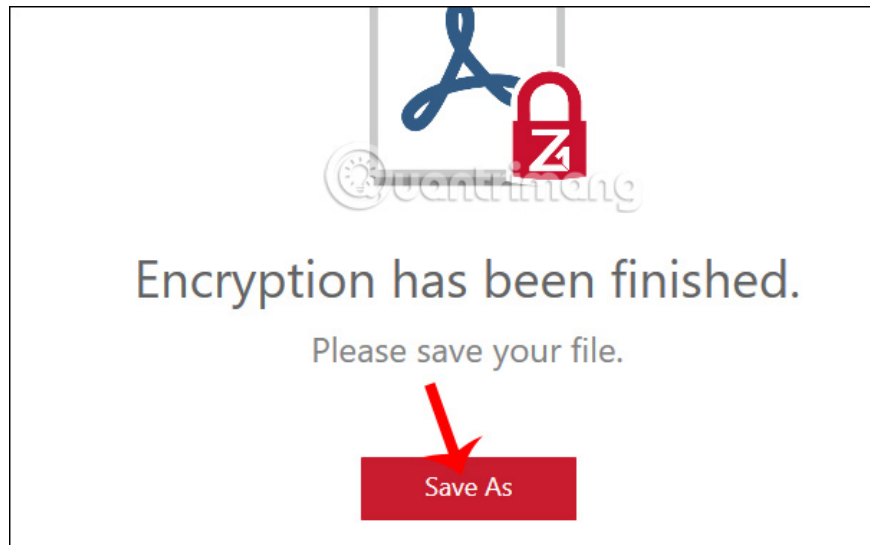

Check the files and then **enter** the file **security password** into a white frame, press **Encrypt** to encrypt.

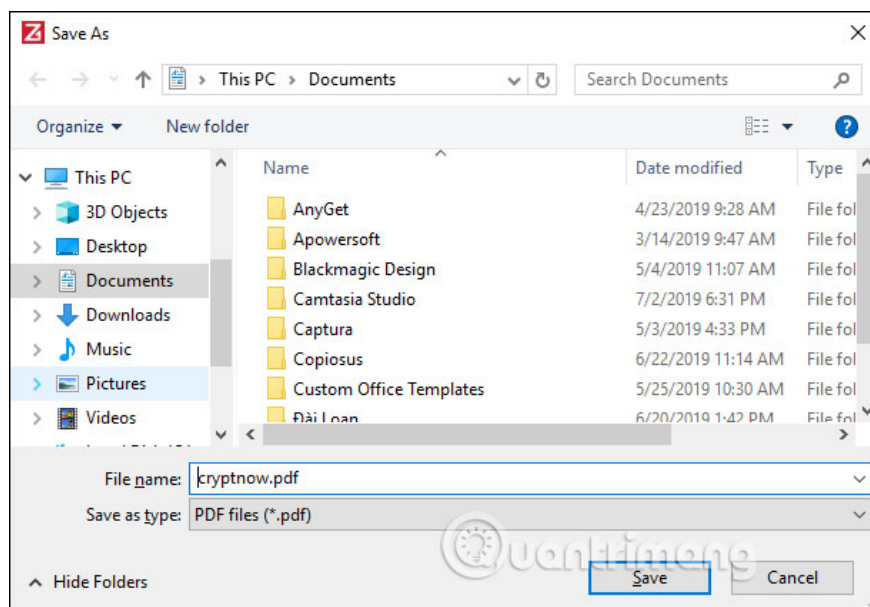

Step 4:

Wait a few seconds for the application to conduct file encryption. When displaying the **Save As button**, the user clicks to select the location to save in the computer.

The encrypted file is saved to the computer as a PDF file.

Step 5:

PDF files containing encrypted files from Z1 CryptNow application can be opened with any PDF file reader software installed on the computer. However, to extract attachments, users must use Adobe Reader. If you use other software to open, you can only see the list of encrypted files.

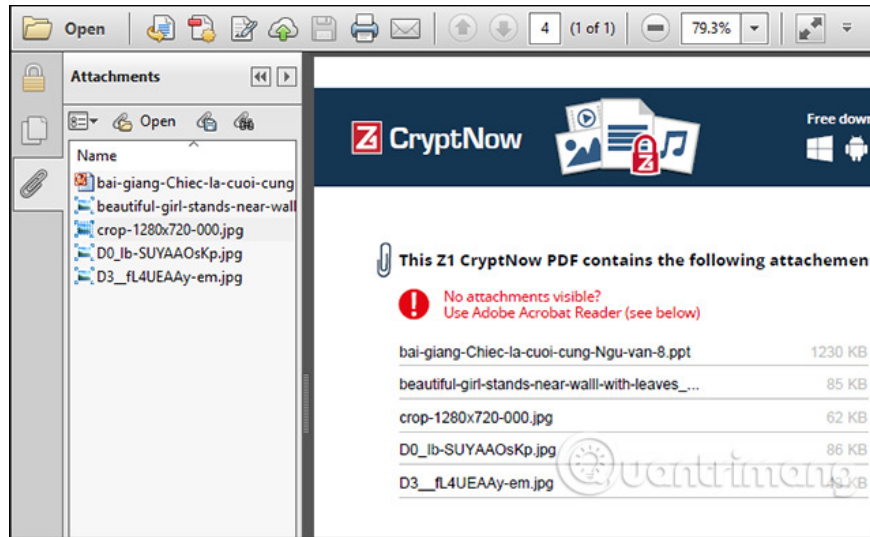

Install Adobe Reader software according to the link below.

1. Download Adobe Reader software

Then open the encrypted file on Adobe Reader software. Display the dialog box for the user to **enter the set password** .

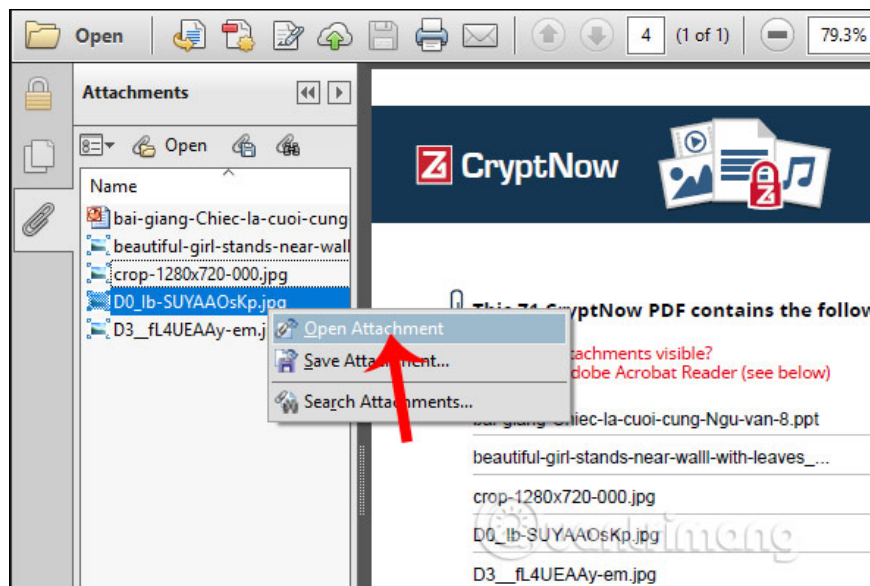

Displays a list of encrypted files.

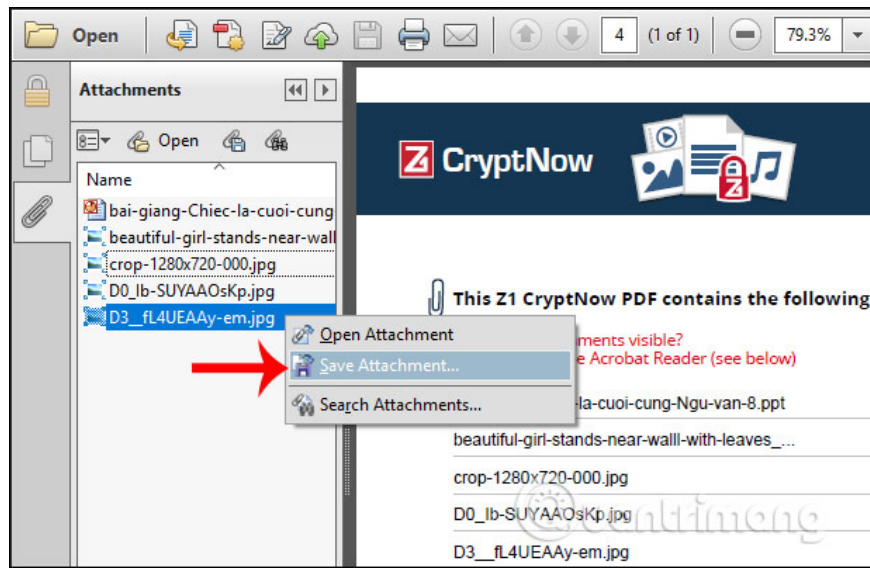

Step 6:

To view the file directly, select the file at the left edge of Attachments. Right-click and select **Open Attachment**.

If you want to **extract the file** , save the file to your computer, the user right-click the file and select **Save Attachment** to save it.

File encoding on Z1 CryptNow is very simple, but decoding and extracting files must be done on Adobe Reader software. Then we can view or save the file to the device easily.

I wish you all success!
