

# How to view or delete browsing history on the PlayStation 4

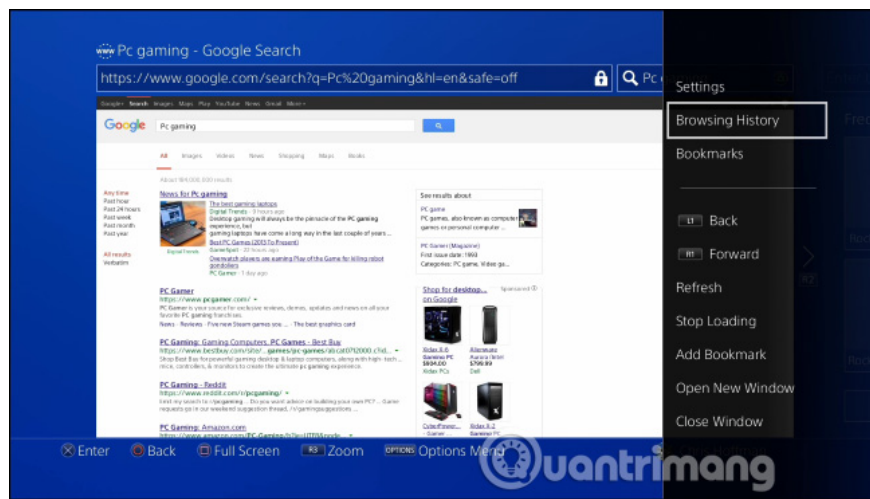

Sony's PlayStation 4 web browser records browsing history just like a web browser on a computer. You can view and delete browsing history on this game player if desired.

Sony's PlayStation 4 web browser records browsing history just like a web browser on a computer. You can view and delete browsing history on this game player if desired. However, the PS4 does not have a private browsing mode. If you want to browse the web anonymously, you must delete the entire browsing history after each session.

1. Anonymous browsing: can protect your privacy

## How to view and delete browsing history

To find your browsing history in the Internet Browser application, press the **Options** button on the DualShock 4 control panel, select **Browsing History**, and then press the **X** button.

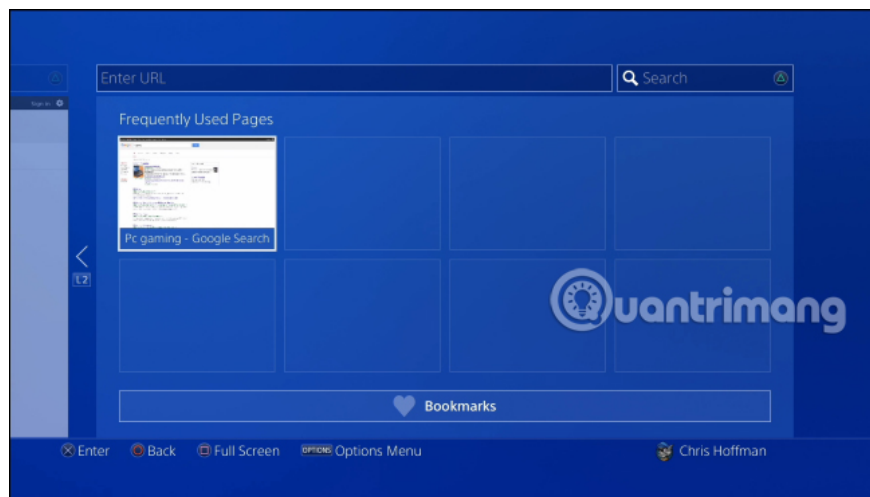

You will see the browsing history here and press the **X** button on a selected site to reopen any page in the browser. To clear your browsing history, press the **Options** button on the control panel again, then click the **Clear Browsing History** button.

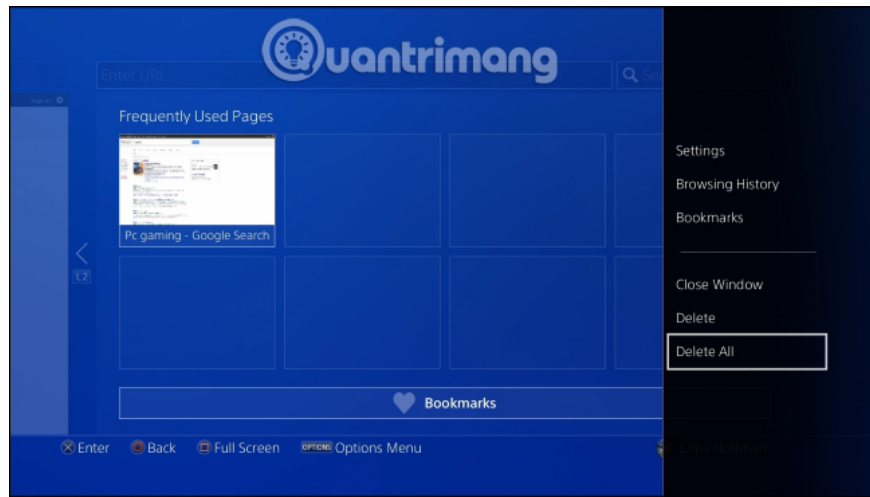

## How to delete frequently used pages

PS4 also remembers frequently used pages (recently opened websites). To open this list, press the **R2** button on the control panel (right trigger) on the main browse interface.

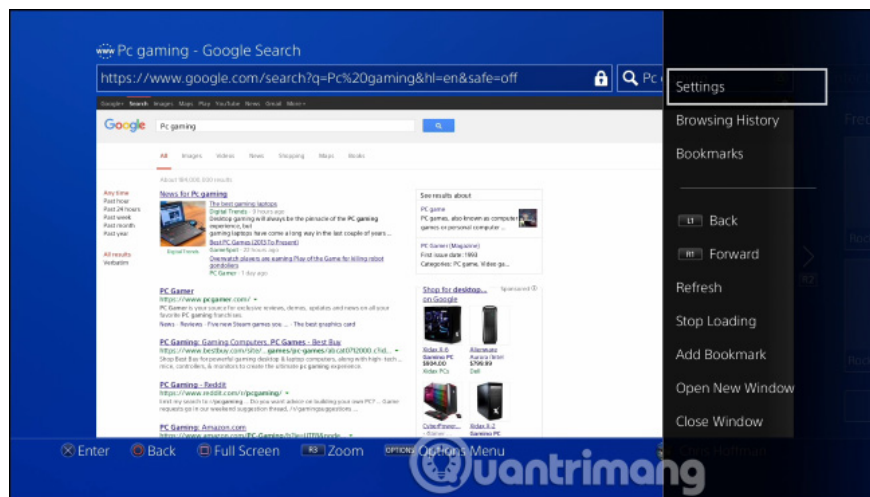

Press the **Options** button again and then select **Delete All** to delete the list of recently used pages. You can also choose to delete each page by selecting that page, then pressing **Options** and selecting **Delete** .

## How to delete cookies and cache files

The Internet Browser application also records cookies and site data. To delete these data, press the **Option** button on the main browsing interface and then select **Settings** .

To delete cookies, select the option **Delete Cookies** and to delete downloaded website data, select the **Clear Website Data** option .
