

How to view photos as a slide show on Windows 10

You want to share memories with family and friends? The automatic photo slideshow feature will help you have more fun viewing photos. You can run slideshows on Windows 10 from the photo folder or with an app.

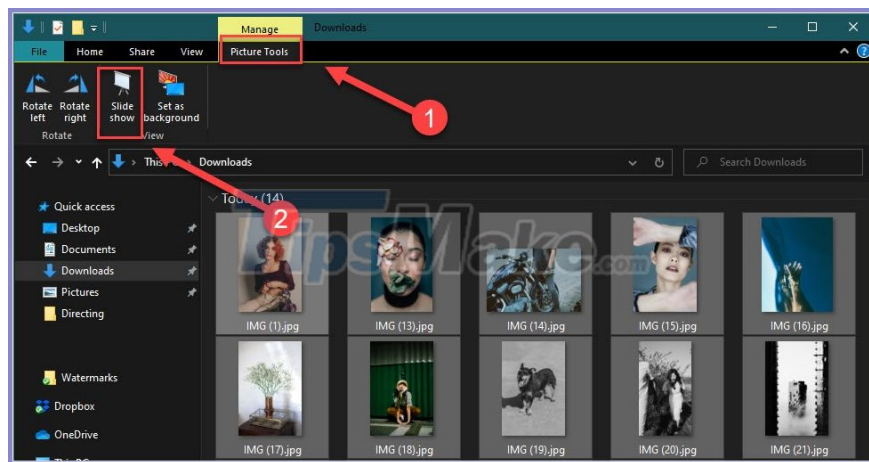

Run slideshows with Windows Photos

The Photos app built into Windows has many flexible features that you did not know about. From video editing to syncing with Google Photos, this simple tool also offers the ability to run photo slideshows. There are two ways to run a photo slide show as follows:

The first way, you open the photo folder, press **Ctrl + A** to select all photos, or hold **Shift** and select each photo you want to show.

On the menu bar, select the **Picture Tools** tab , then click **Slide Show** .

All photos you choose will be viewed in full screen and appear one by one. You can right-click and for the following options:

1. Pause: Pause playback, now you can automatically control the transition with the arrow keys.
2. Loop: Images automatically move continuously.
3. Slide Show Speed: Transfer speed between images: Slow, Medium, Fast.

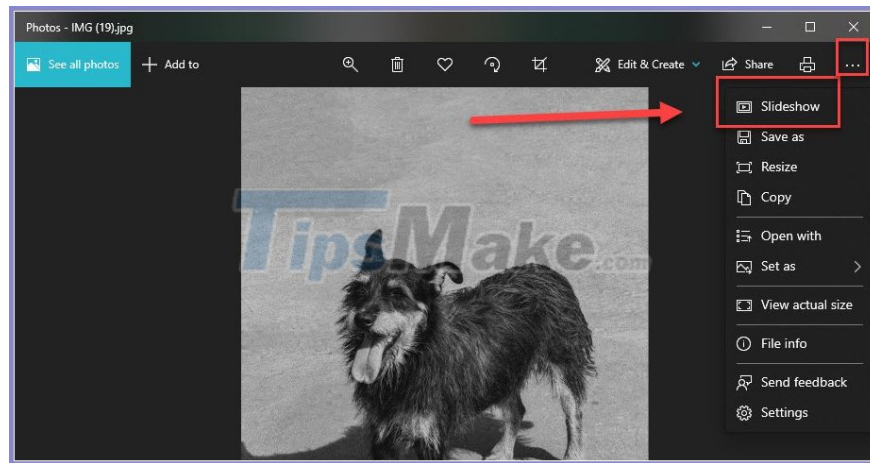

Option 2, you can enable Slideshow feature directly from photos:

First, open the photo in Photos.

Click the 3-dot icon, then select **Slideshow** .

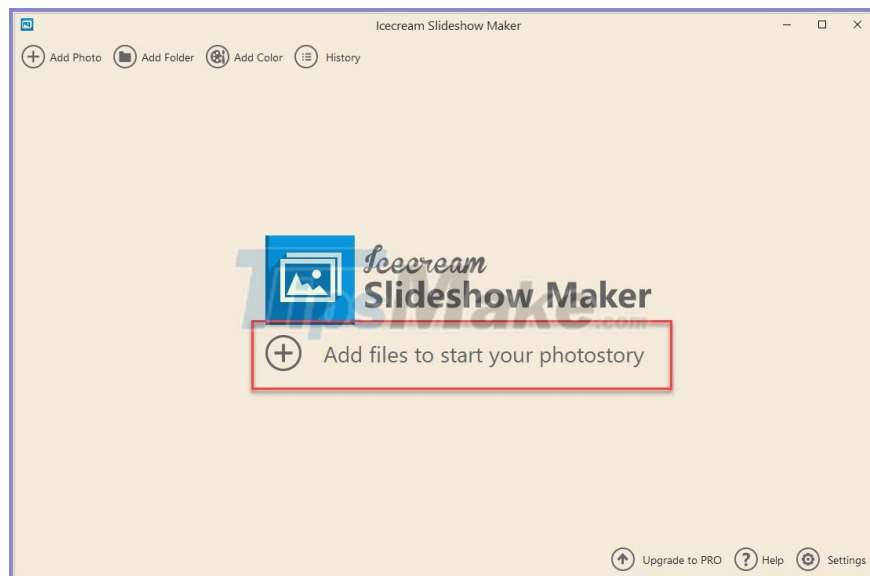

For older versions of Windows, if you don't have Photos as the default photo viewer, you can also run SlideShow on Windows apps like Windows Photo Viewer, Photo Gallery, and Picasa.

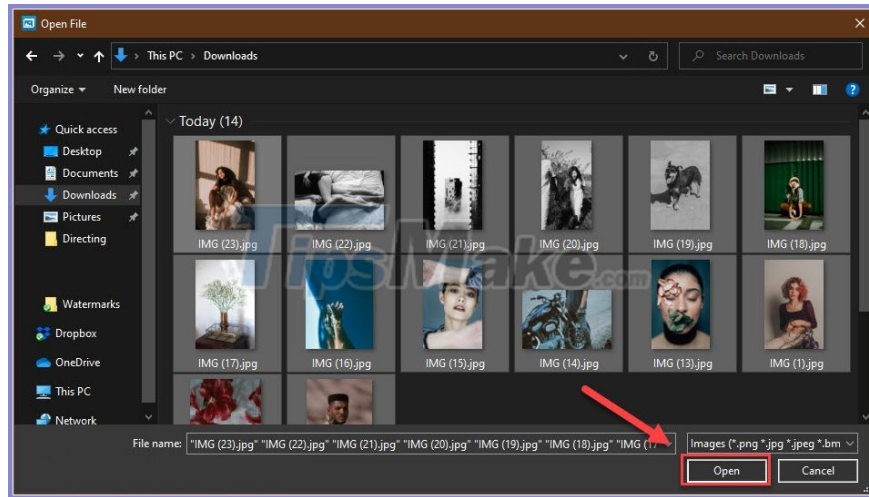

Use the Icecream slideshow generator

When you want to create a Slideshow for sharing on Facebook or Instagram, the slideshow must be converted to a movie format. IceCream Slideshow Maker is the tool to help you do this, it is compatible with all Windows versions.

First, download and install the IceCream Slideshow Maker app. At the main interface of the software, select **Add files to start your photostory** .

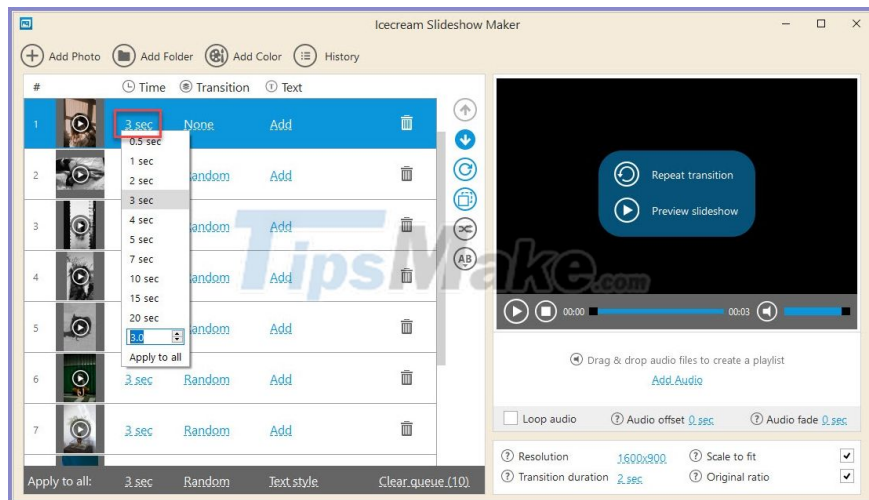

Select the photos you want to show, then **Open** .

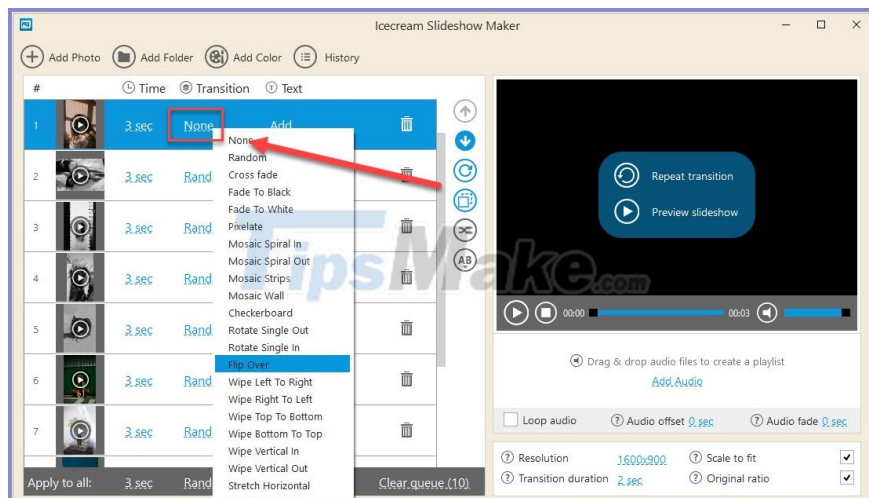

In the free version, you can only add up to 10 photos at a time to create a slideshow video. Once you've added the photos, you'll have the following basic tweaks:

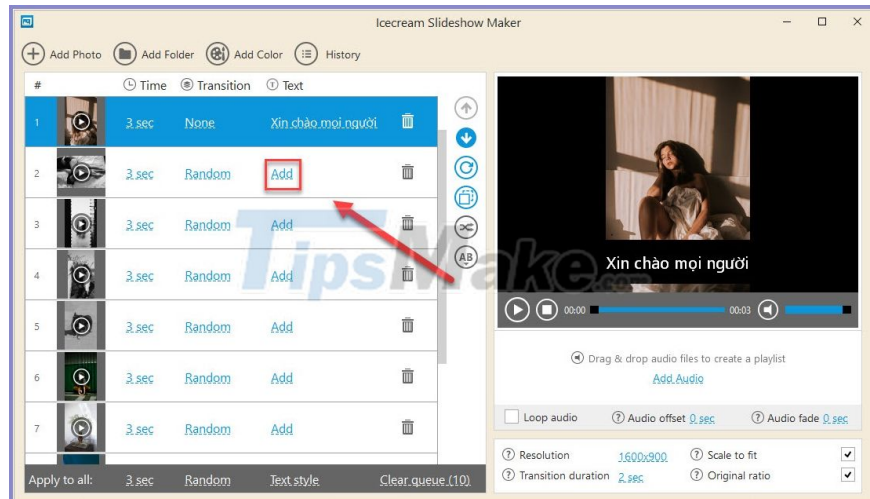

1. **Time** : You click on the time column next to each image to set the playback time as desired:

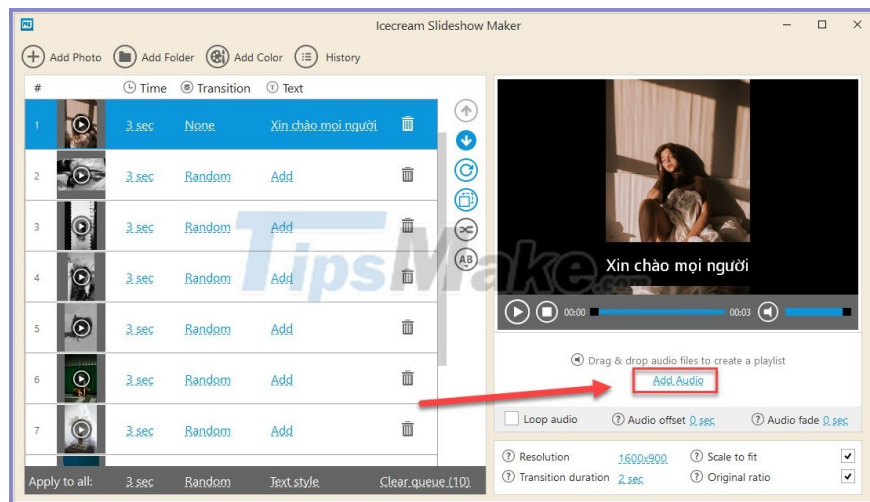

1. **Transition** : Image transitions.

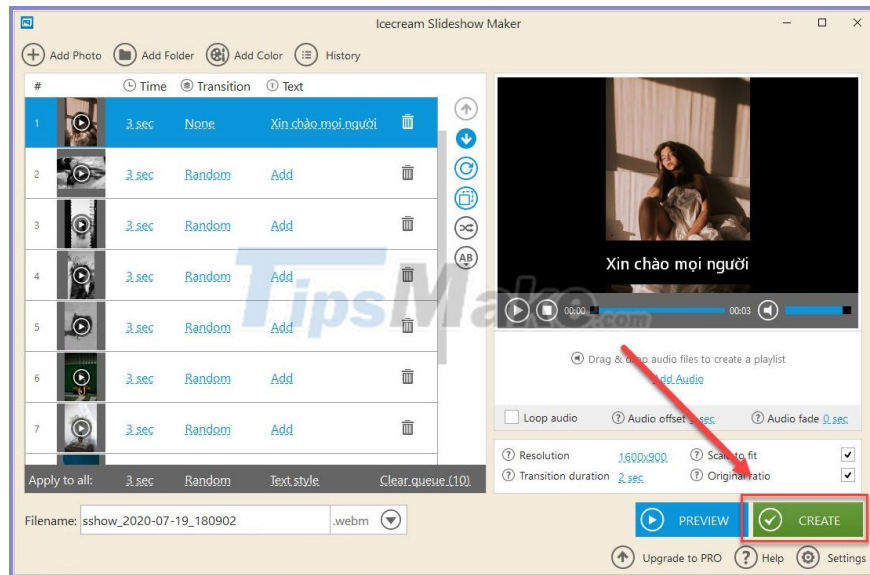

1. Text : Subtitles are placed in each image

1. Add Audio : Add background music to your video

After completing all the settings for the Slideshow, click **Create** to create the video.

Wait for the export file to finish, you will have your own Slideshow video.

So, you already know how to view photos as a slide show on a computer. This method will help viewers save time and have a pleasant experience when viewing photos. If you know any other way to view your photos as a slideshow, please share them in the comments!
