

How to view saved Wifi passwords on Windows 7/8/10

Forgetting your Wi-Fi password can quickly become an obstacle, but don't panic. If you have a PC or Mac connected to that wireless network, today's article will show you how to retrieve the forgotten password.

Forgetting your Wi-Fi password can quickly become an obstacle, but don't panic. If you have a PC or Mac connected to that wireless network, today's article will show you how to retrieve the forgotten password. Follow the instructions below to learn how to find your Wi-Fi password easily!

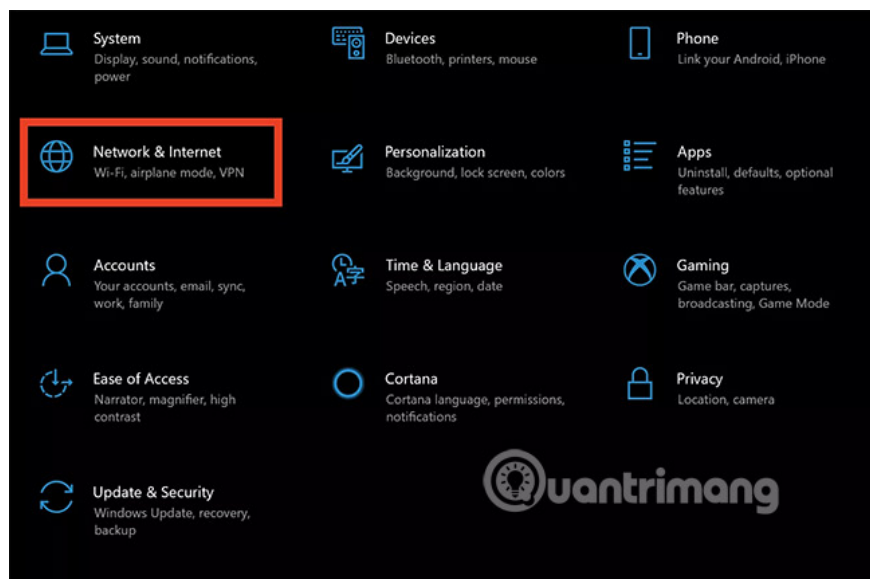

Find Wi-Fi passwords on Windows 10

If you are using a Windows computer, it will not take long to find your lost Wi-Fi password. If you are running Windows 10, follow the steps below to retrieve passwords for Wi-Fi networks.

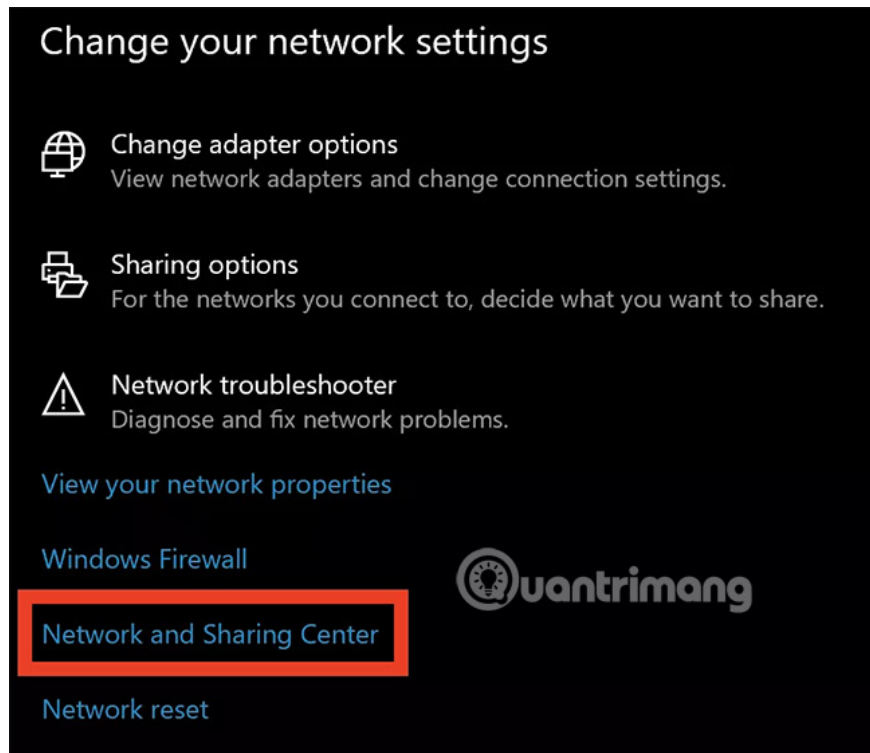

1. Select the **Start** menu on the PC.
2. Select the **Settings** icon on the left side of the **Start** menu .

The **Settings** icon will appear as a white gear above the **Power** icon .

3. In the **Windows Settings** window that appears, select **Network & Internet** .

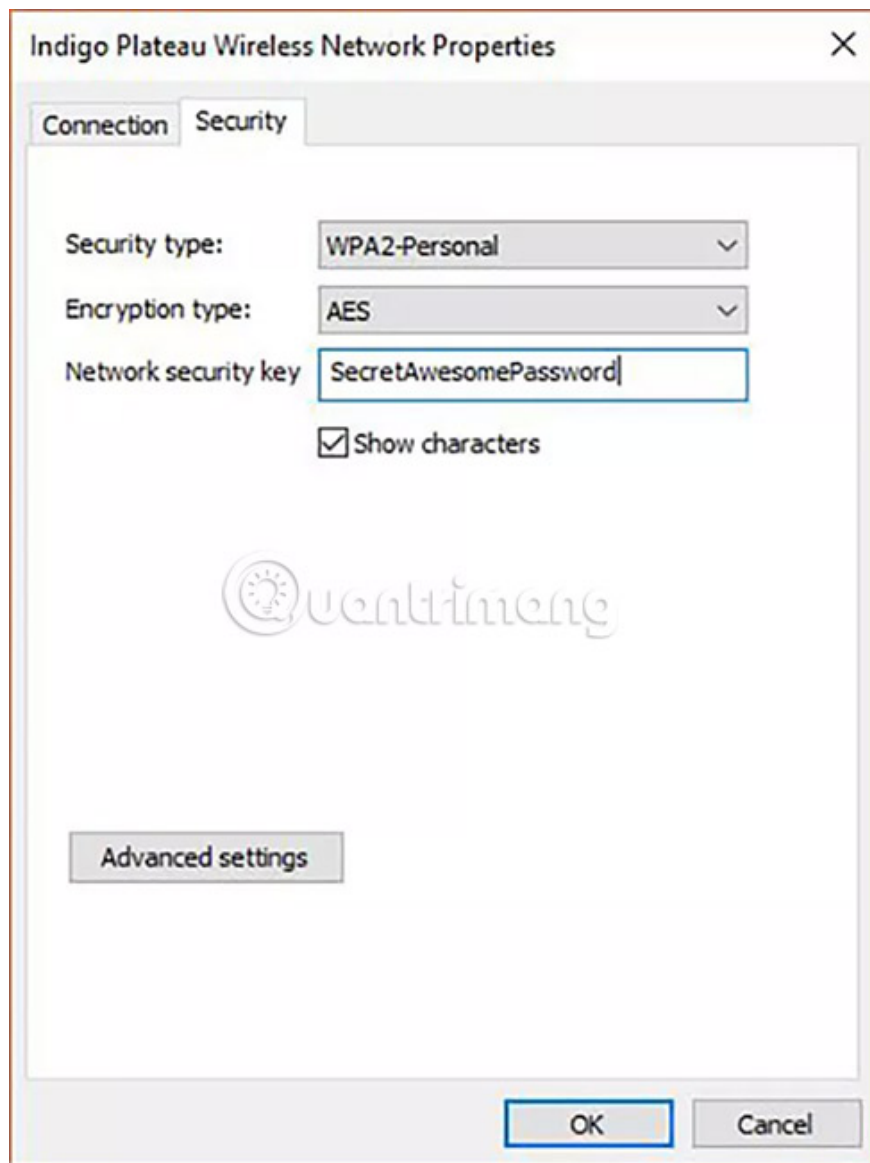

4. Next, in the **Change your network settings** section , select **Network and Sharing Center** .

5. In the **Network and Sharing Center** window that appears, select your Wi-Fi network name (highlighted).

6. In the new popup window that appears, select the **Wireless Properties** option .

7. Finally, select the **Security** tab and select the **Show Characters** option to view your Wi-Fi password.

Everything is complete!

Find Wi-Fi passwords on Windows 8 and Windows 7

It's easy to retrieve your Wi-Fi password on slightly older versions of Windows. If you are running Windows 8 or Windows 7, follow the steps below to retrieve the password for your Wi-Fi network.

1. Select the PC **Start** menu.
2. In the **Start** menu search bar , enter " **Network and Sharing Center** " and press the **Enter** key to select the highlighted option.
3. In the **Network and Sharing Center** window that appears, select your Wi-Fi network name.
4. In the new popup window that appears, select the **Wireless Properties** option .

5. Finally, select the **Security** tab , then select the **Show Characters** option to view your Wi-Fi password.
