

How to View Shared Folders on Windows

This wikiHow teaches you how to view a list of every folder you're sharing on your Windows network. Right-click the menu. It's usually at the bottom-left corner of the screen.

Method 1 of 3:

Using File Explorer

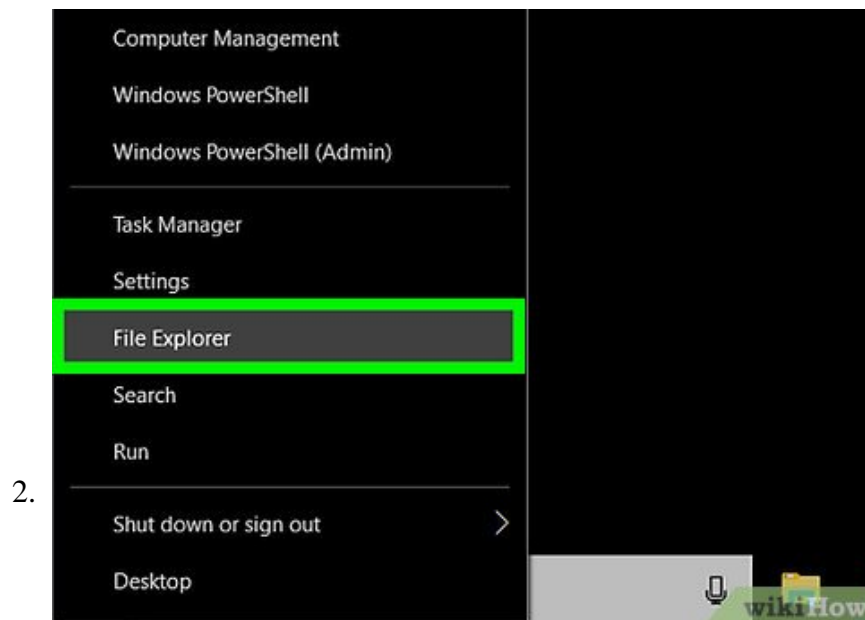

1.

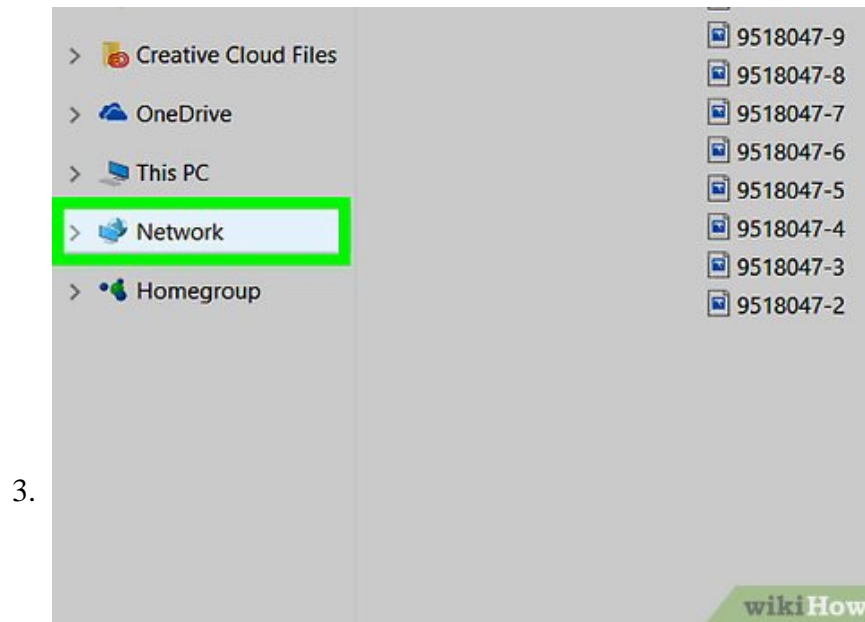

Right-click the

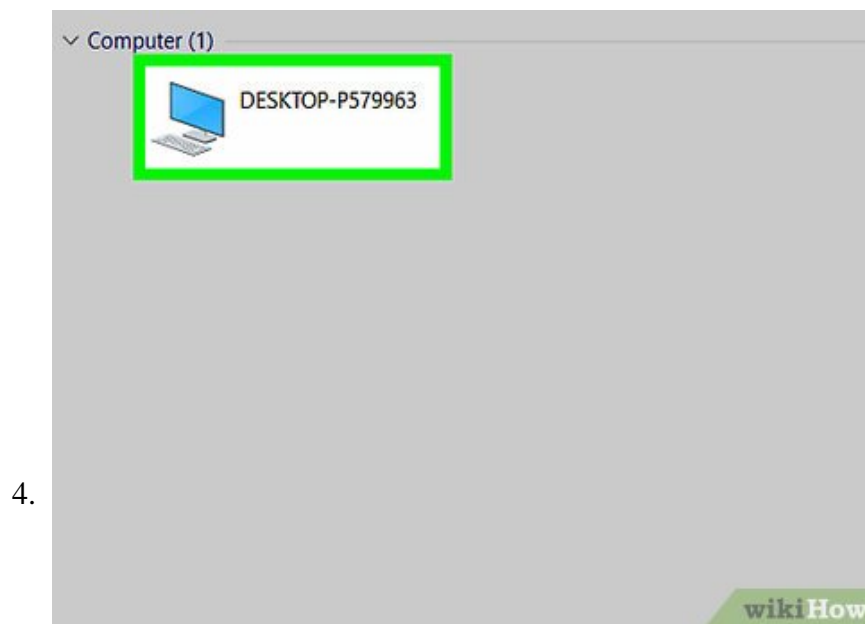

menu. It's usually at the bottom-left corner of the screen.

Click **File Explorer**.

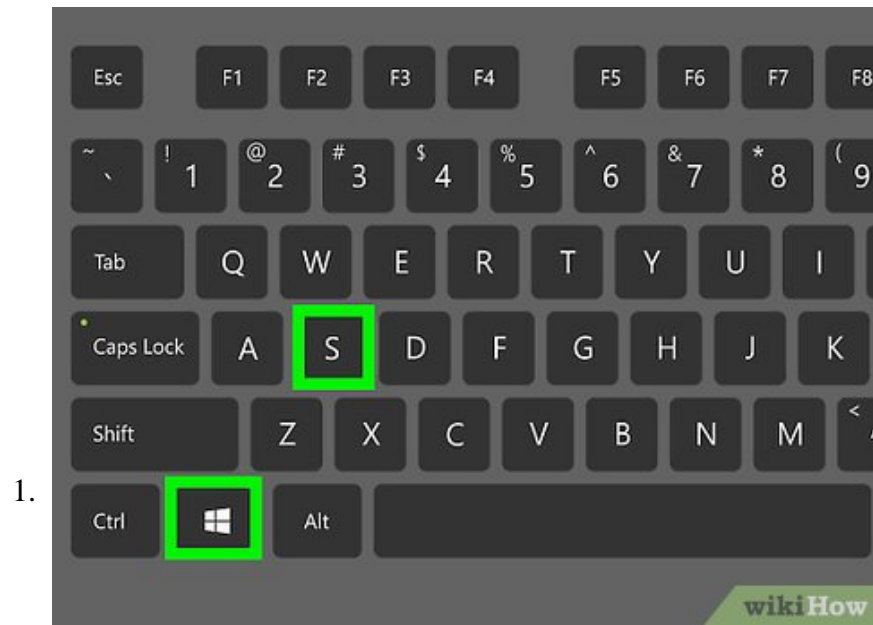

Scroll down the left column and click `Network`. This displays a list of computers that are a part of the network.

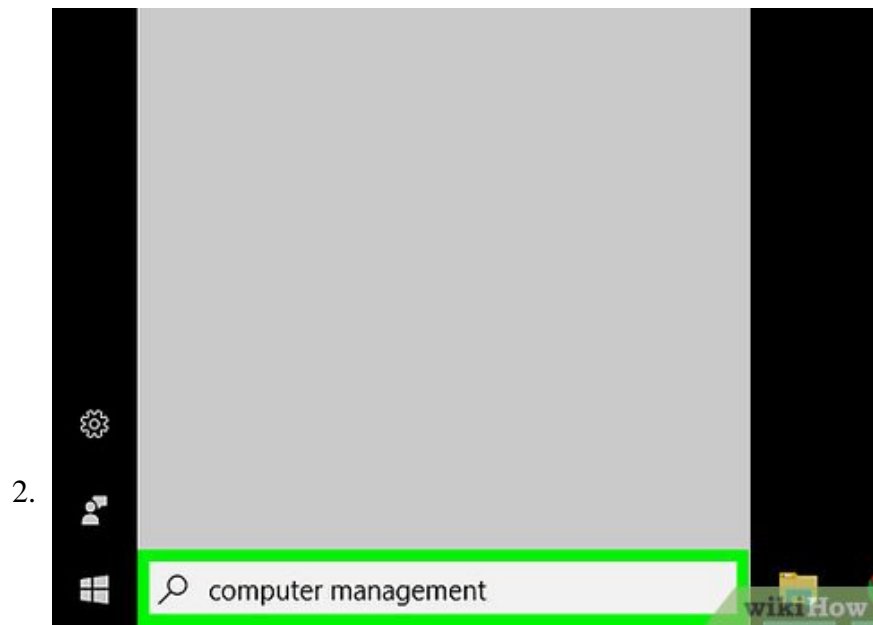

Double-click the computer where you want to see shared folders. A list of shared folders on the selected computer will now appear.

Method 2 of 3:

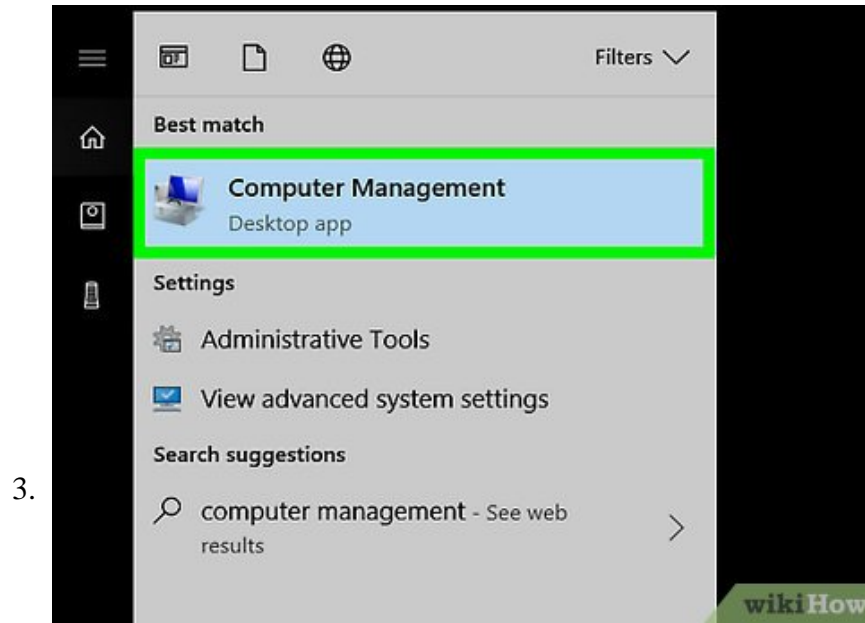

Using the Computer Management Panel

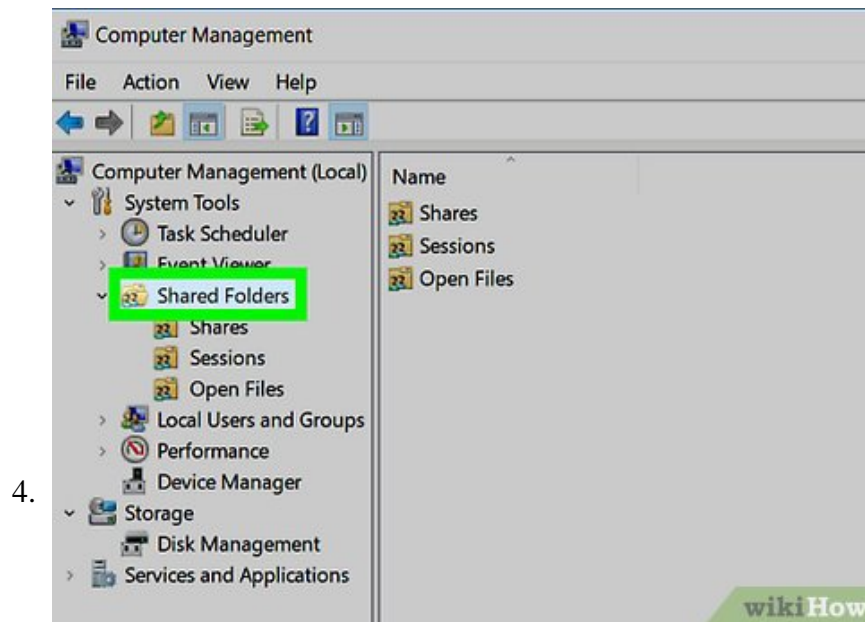

Press **Win + S**. This opens the Windows search bar.

Type **computer management**. A list of matching results will appear.

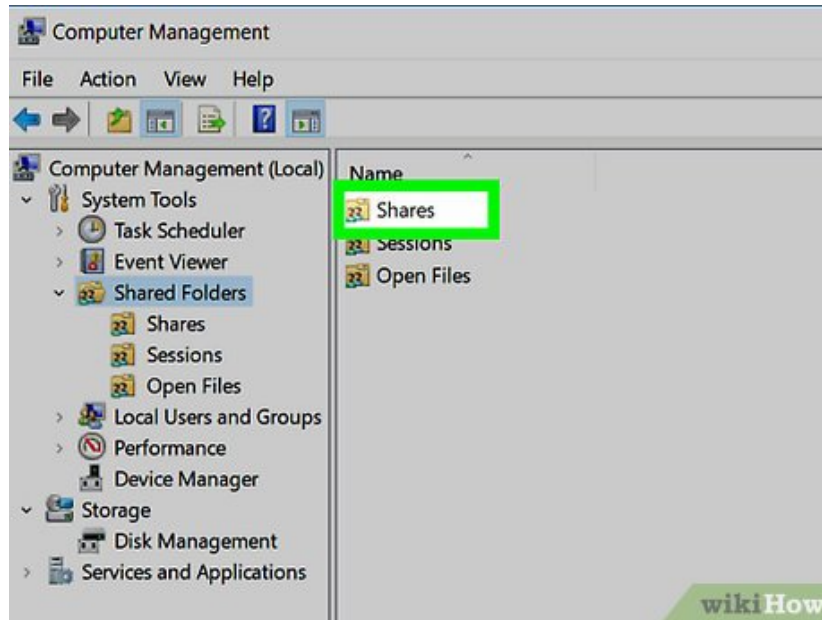

Click **Computer Management**.

Double-click **Shared Folders**. It's in the left column.^[1] This expands a list of subfolders.

5.

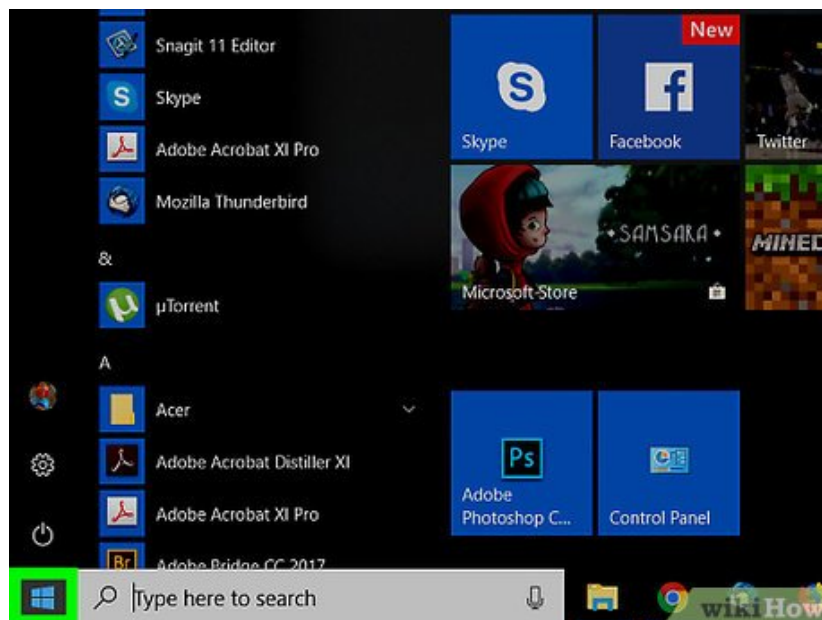

Click **Shares**. You'll only have to click it once. A list of shared folders will appear.

Method 3 of 3:

Using the Command Prompt

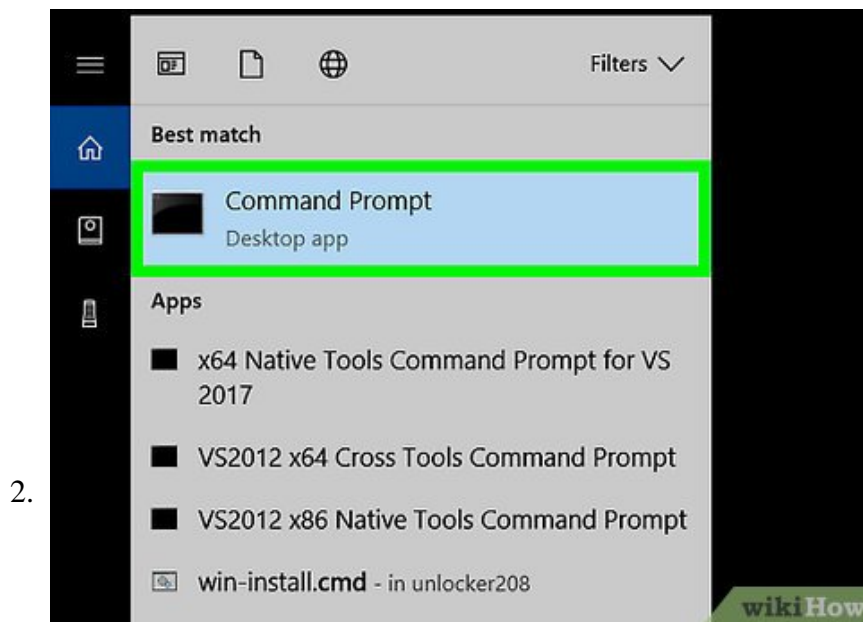

1.

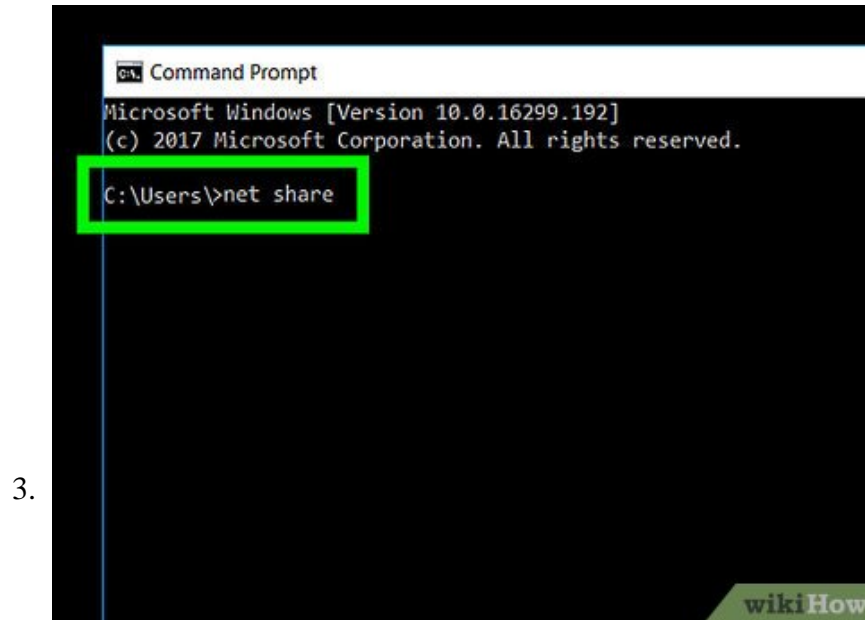

Right-click the

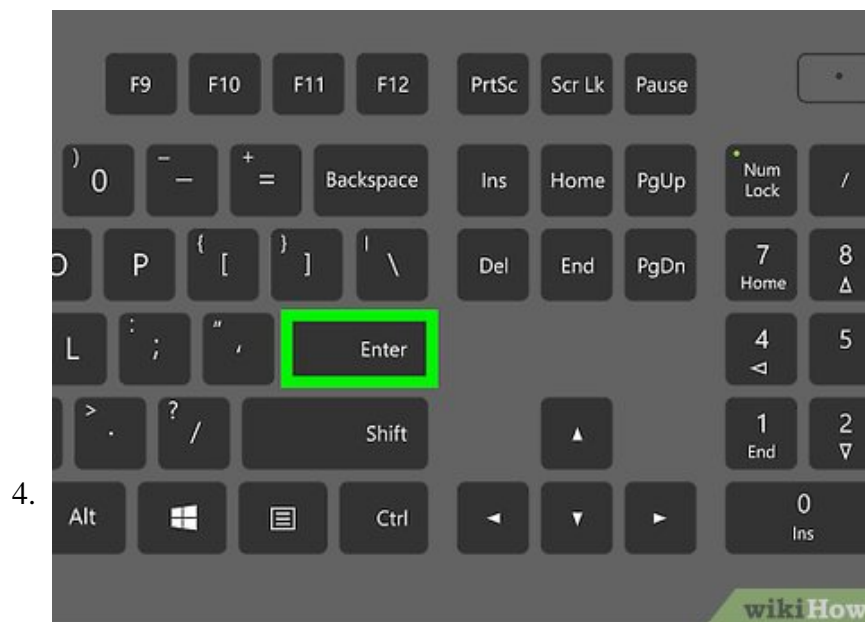

menu. It's usually at the bottom-left corner of the screen.

Click **Command Prompt**. This opens a terminal window to the command prompt.

Type **net share** . Just click the terminal window to start typing.^[2]

Press **Enter** . A list of shared folders will appear.
