

How to view the password, delete the saved password on Chrome

To see the password saved on Chrome you need to access Chrome's password manager, by typing `chrome://settings/passwords` into the address bar on Chrome or by following these steps:

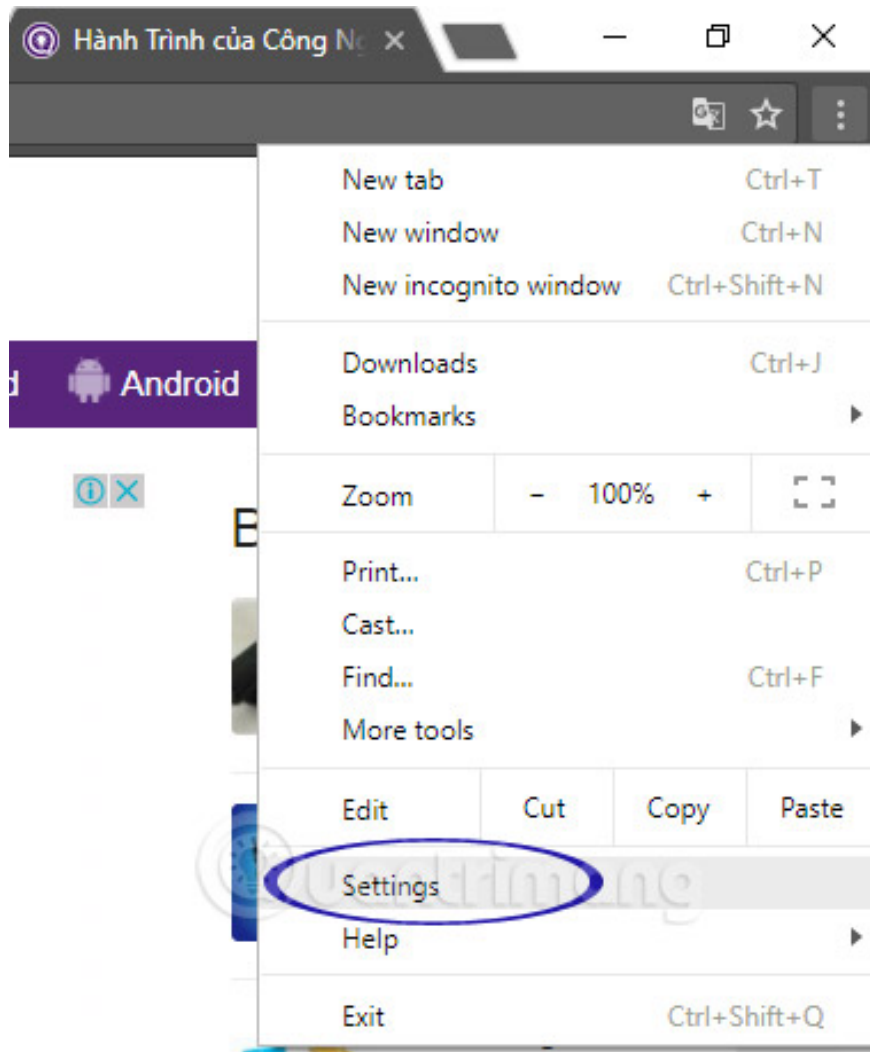

Did you accidentally forget the password saved on a website on Chrome browser? Recovering passwords will be much simpler, when we use the saved password management feature available on Chrome to log in to certain websites in the browser.

Thanks to this feature, users can review the passwords they have saved to be able to log in more easily at later visits. Or we can delete saved passwords. Refer to how to do in the tutorial of the Network Administrator below.

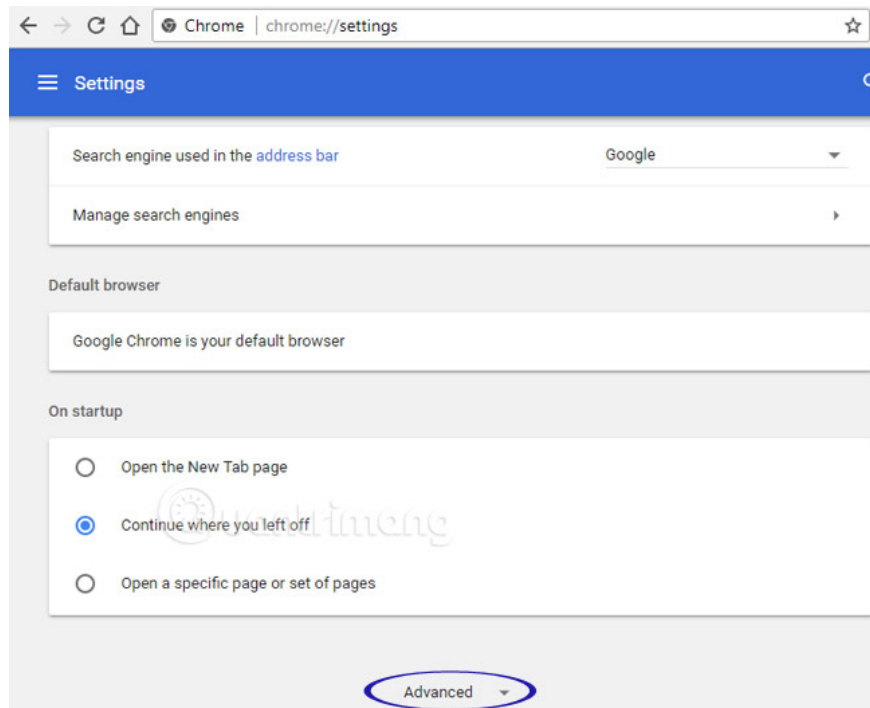

How to view the password, delete the password saved on Chrome version 60 or higher

To see the password saved on Chrome you need to access Chrome's password manager, by typing **chrome://settings/passwords** into the address bar on Chrome or by following these steps:

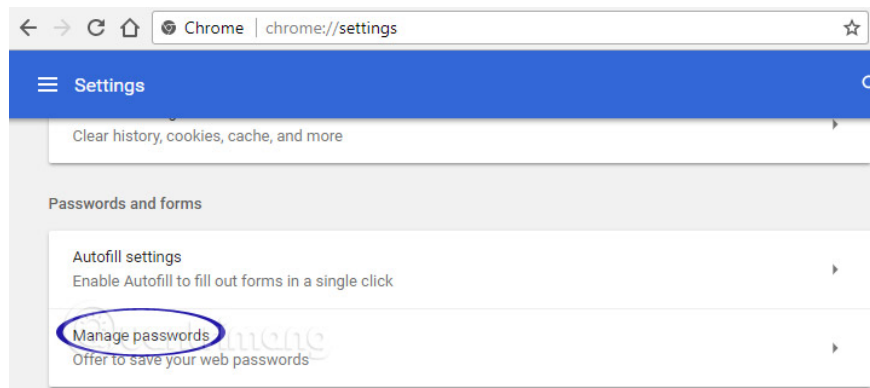

Click the vertical dots in the upper right corner > **Settings** / Settings:

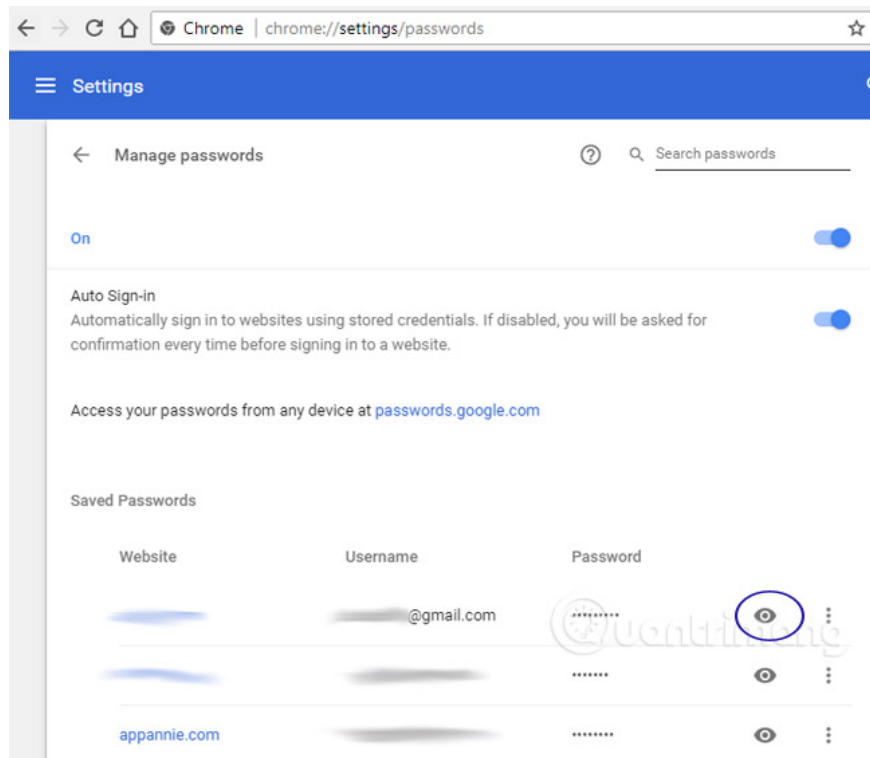

Scroll down to the bottom select **Advanced** / Advanced:

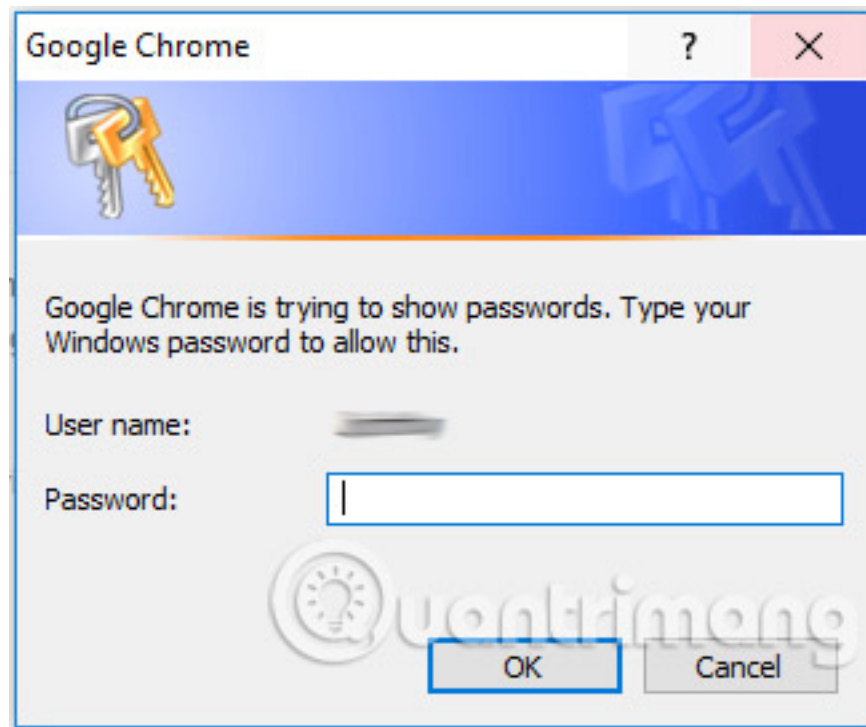

In Passwords and forms (Password) select Next Manage passwords:

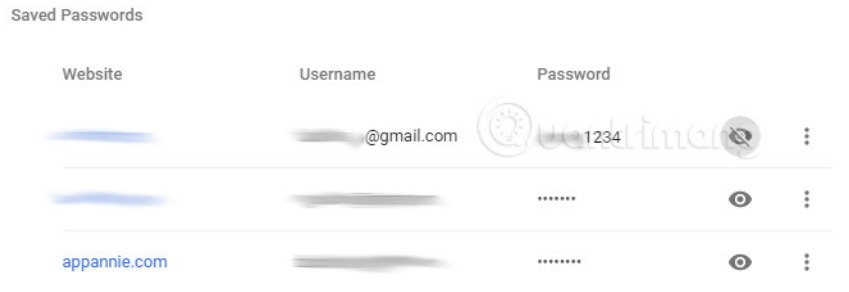

Here you can find the password on the saved website, when you see the password you need, you can click the eye icon to see the password:

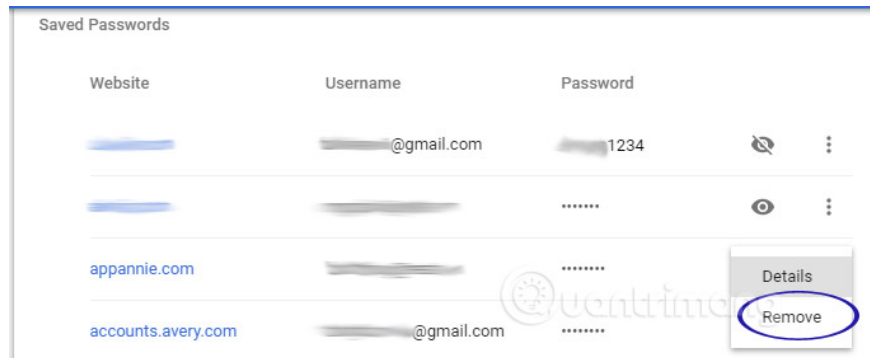

Chrome will require you to enter your computer login password to view the saved password on Chrome:

The password will then be displayed as text:

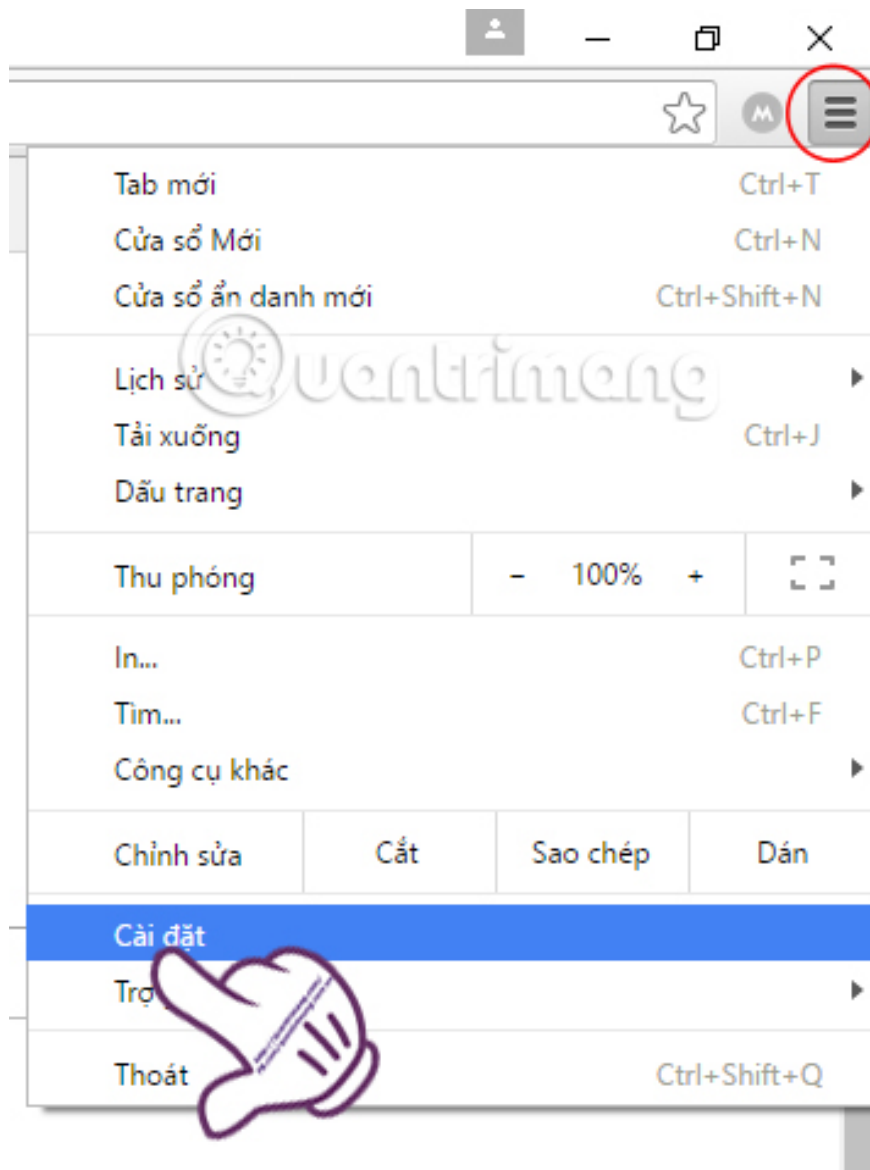

If you want to delete the saved password on Chrome, click on the 3 dots corresponding to the password, select Remove:

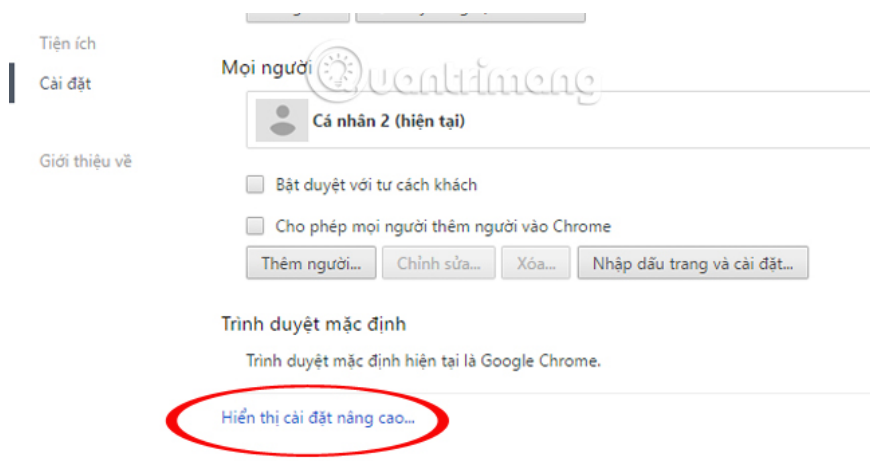

How to view and delete passwords saved on Chrome version 59 and earlier

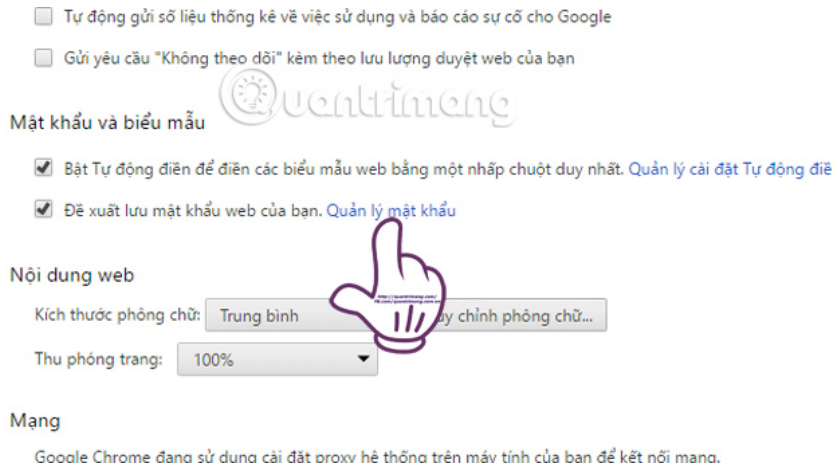

1. At the main interface on Chrome browser, click **the 3 dashes icon** and select **Settings** .

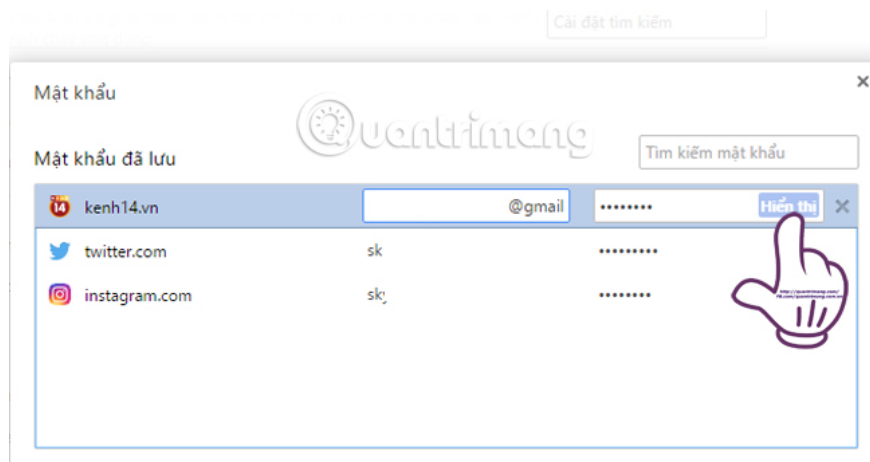

1. At the Settings interface, scroll down and select the **Show advanced settings section** .

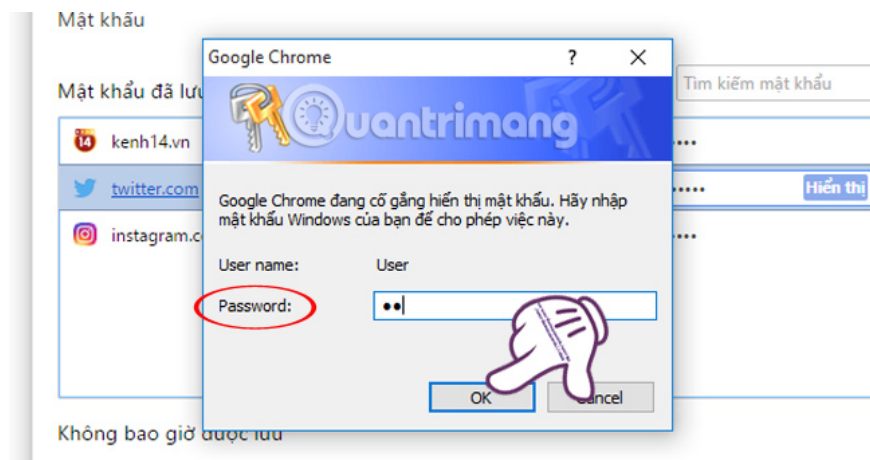

1. Next find the **Password and forms section** , then click on the **Password management** line.

1. The Password window interface appears. Here, we can review the username and password saved for the website in the **Saved Password** section. If you need to **review the password for a certain website** , click on the line to see, then click the **Show** button.

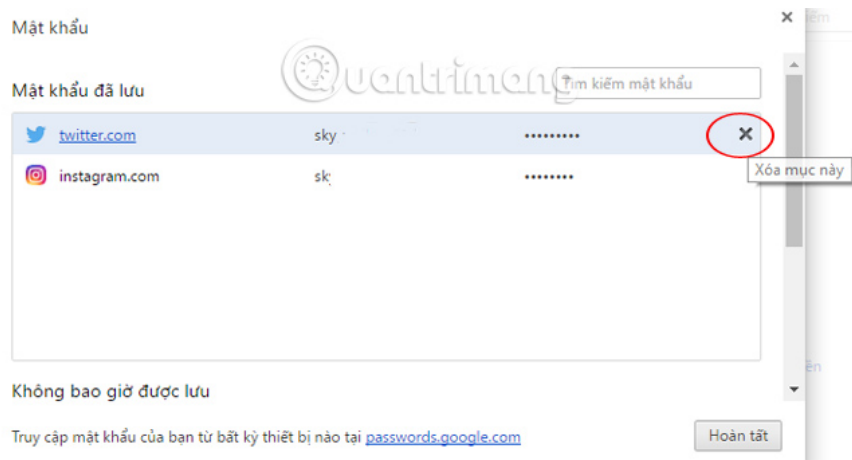

1. Soon a notice from Google Chrome will appear asking for **a computer password** . We enter the password and click **OK** to confirm.

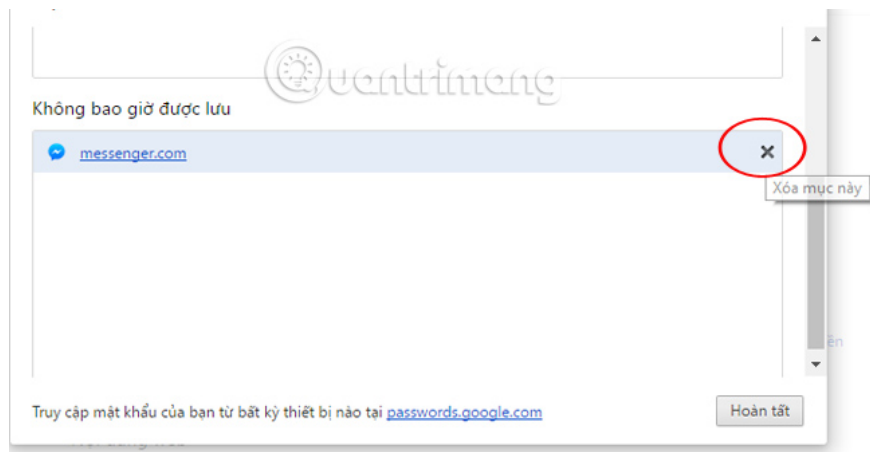

1. You need to enter the correct computer password to display the saved password for that website. To put a password about the first character, press **Hide** .

1. To **delete saved passwords** for web pages, click on **the X** at the end.

1. In the **Never saved** , Chrome will save pages that you did not click Save password when asked with the first visit. To be able to save certain website passwords, you also click on the X at the end of the row.

So we have instructed you to complete the steps to review saved passwords already. Now, you are not worried about not accessing any website if you accidentally forgot your login password.
