Once you've downloaded the Octagon VR app on your phone, allow Octagon VR to access your camera. Next click the setting icon in the middle of the two cameras.

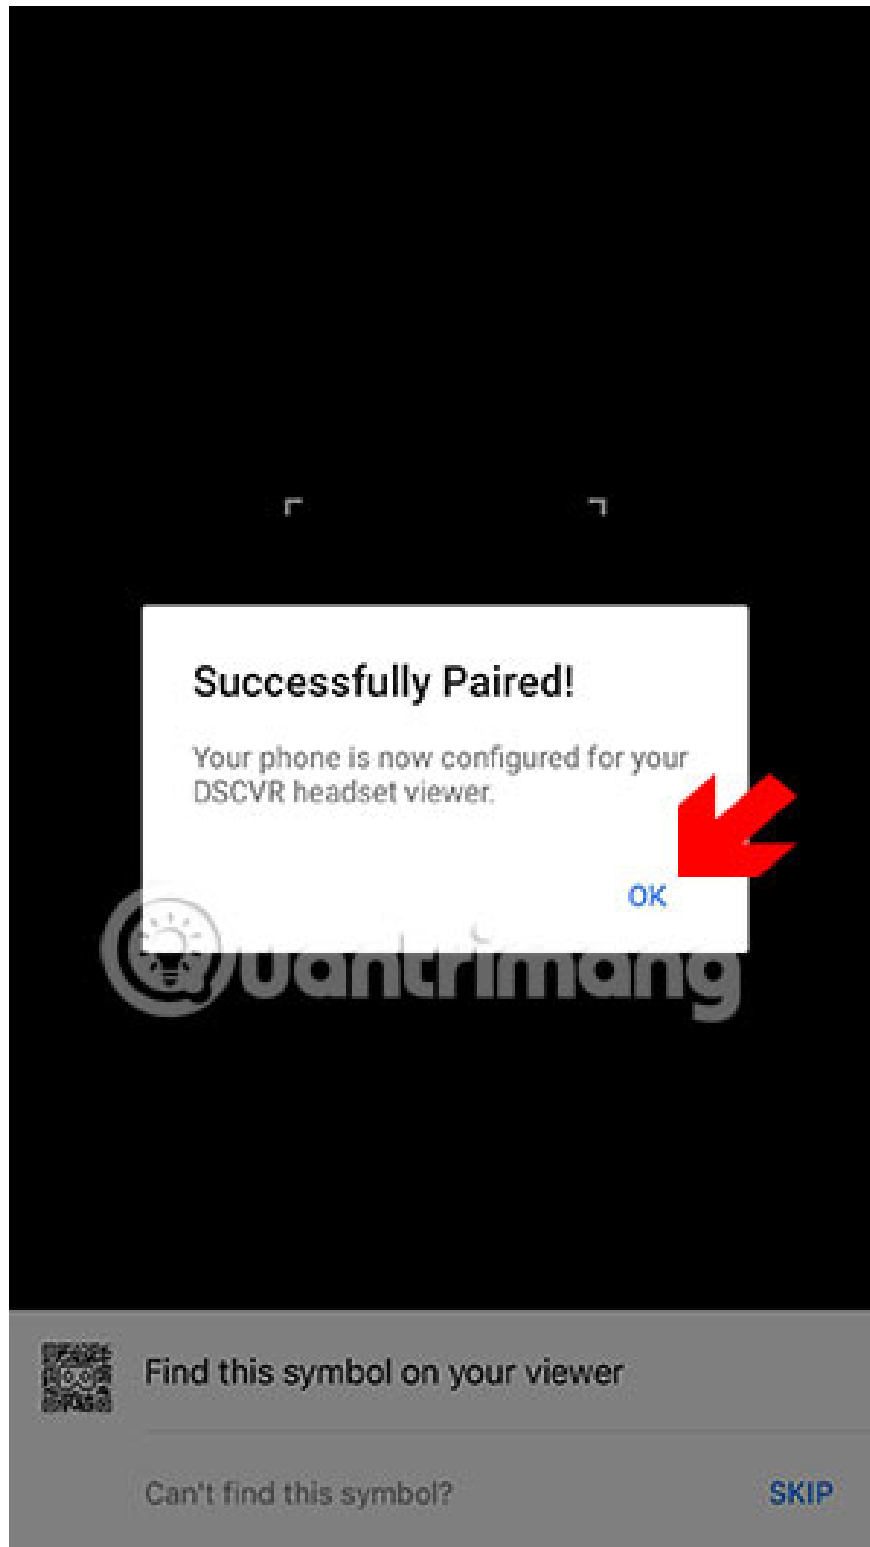

Then there are two options that appear, select **Switch viewer: Default Cardboard** . The screen will show the camera has a QR code scanning frame of the virtual reality glasses.

Each VR glasses will have a QR code printed on the glass, at which point you can scan the QR code of Octagon VR on this code.

If you see this message, it means that you have successfully scanned the VR glass, press OK to enter the virtual reality glass interface.

Next, put your phone screen in front of the VR virtual reality glasses. Because when you put the monitor into the VR virtual reality glasses, you won't touch the screen to control it anymore.

So then you will have to use the hard keys on the virtual reality glasses, here your button is in this position.

Look at the two lenses, move the dot to the options on the Octagon VR app and press the hard button on the VR glasses to select. You will have 4 options to experience on Octagon VR app.

Once in the 4D dinosaur view, you can move the white dot in the middle of the screen into the dinosaurs and press the hard key on the VR glasses. They will make a noise or other actions. If they are far away from you, you can move closer to them.

Currently there are all 4 types of dinosaurs in the **Out of the world option** . Including types of plants and human meat

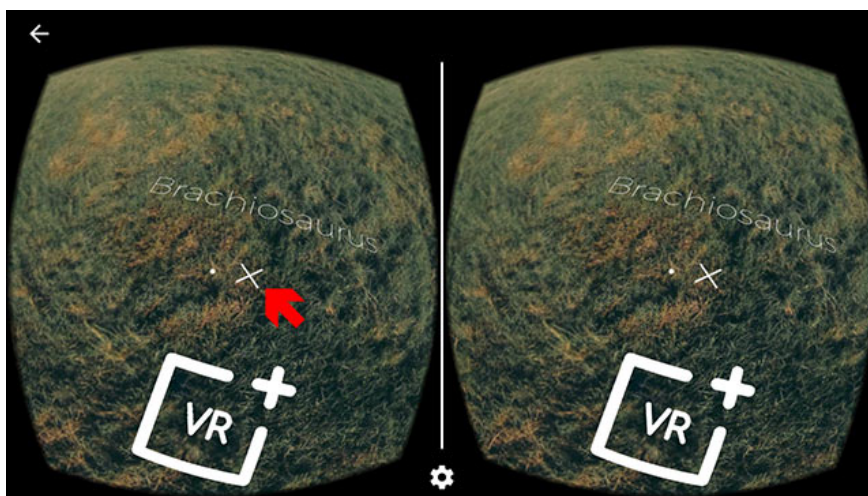

Especially the tyrannical dinosaur lines will impress the users by the large body attached to sound quite noisy.

If you see it too far, you can approach it to get a closer look.

If you want to change options or images, bend down a bit. There will be an X, move the white dot into the X and press the button to exit the image.

Through 4D dinosaur viewing guide on virtual reality glasses with the Octagon VR application in this article, you can experience watching 4D animals through virtual reality glasses. Since it is viewed through a virtual reality glasses, you should note that you should not look too long, avoiding eye strain.
