

# How to watch live football on Android with Ace Stream

Ace Stream is a video application that allows you to stream sports and other online content. The article will show you how to use Ace Stream on Android to watch football.

Ace Stream is a video application that allows you to stream sports and other online content. It uses peer infrastructure similar to BitTorrent, which means that when using Ace Stream to watch videos, you can also download parts of the video to others.

As noted in a Themescene.tv article, Ace Stream sets itself apart from other live TV streaming services like Sling TV, Youtube TV, and DirecTV Now by not requiring users to register. Simply download and install the app, enter the Content ID provided by Ace Stream, and you're ready to start streaming live football. For more information on streaming apps for NFL games, check out the original article via Themescene.tv.

Because Ace Stream is software, there is no limit to the type of content that it can stream. However, it is very popular with sports lovers, as this is an extremely easy way to watch live football.

## How to find Content ID of Ace Stream

Before watching football or other live videos on Ace Stream, you need something called Content ID. This is a series of letters and numbers that Ace Stream software uses to format stream videos and connect you to live streaming.

The best way to find content ID Ace Stream is to search for ace stream content ID football on the search engine and simply replace the word football into other sports or events if you wish.

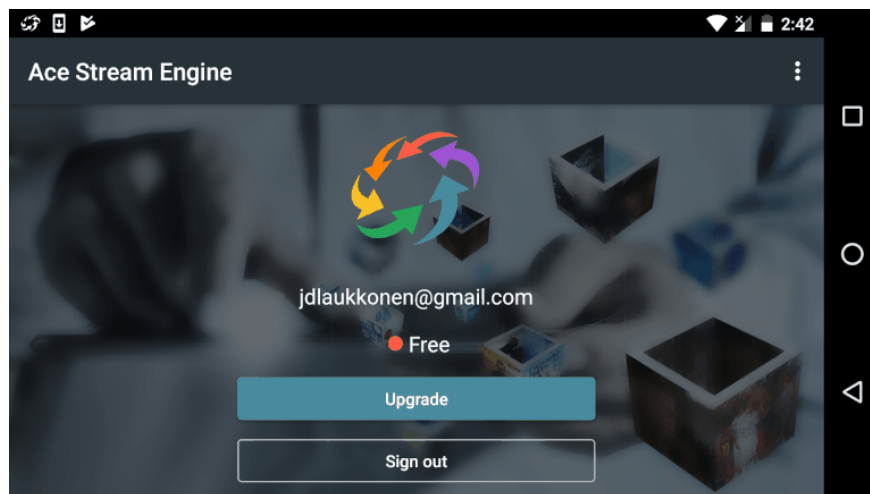

Another way to find Content ID Ace Stream is to use websites like Reddit. The ID here seems more reliable because the user has checked these IDs. And it's also safer to access random websites you find on search engines.

Some popular categories you can find Content ID Ace Stream include:

1. r / NFLstreams for football matches
2. r / NBAstreams for basketball matches
3. r / soccerstreams give the futbol matches.
4. r / puckstreams for bridge battles
5. r / MLBstreams for baseball matches
6. r / MMAstreams for synthetic martial arts matches.
7. r / NCAAabbstreams for college basketball matches
8. r / CFBstreams for college football matches

## How to use Ace Stream on Android

Ace Stream has an Android version, which means you can use it to watch live football on your phone or tablet.

Before using Ace Stream on the phone, you should note that the application can use a lot of mobile data. Therefore, if there is no limited mobile data plan, you should use Ace Stream when connecting to the Wifi network.

Before using Ace Stream on your phone, you need to download two applications: Ace Stream Media and a compatible video player like VLC.

To use Ace Stream on Android phones or tablets:

**Step 1** : Launch the Ace Stream Engine application.

**Step 2** : Touch the icon ? (three dots).

**Step 3** : Touch **Enter Content ID** .

**Step 4** . Enter Content ID and click **OK** .

**Step 5** : Select the video player to play the video and choose **remember choice** if you want to use this player when using Ace Stream.

**Step 6** : Ace Stream will connect to the peer, pre-set the video, and then launch your video player application.

**Step 7** : If asked to allow the video player application to access your photos, media and other files, press **allow** .

**Note**: If you click **Deny** , it will prevent the application from playing your video streaming video.

**Step 8** : The video will start playing in the video player application of your choice.

## How to transfer Ace Stream from phone to TV

Streaming Ace Stream from Android phones or tablets to TV is really as easy as watching on the phone.

If you have Chromecast, Apple TV or other compatible device connected to the TV, the device will display as a player option after you enter Content ID into the Ace Stream application.

1. How to play videos from Android to TV via Chromecast using VLC

Instead of selecting VLC, simply tap **Chromecast** or **Apple TV** and Ace Stream will send the video to your device. When streaming is in progress, you can tap the remote icon in Ace Stream to control streaming playback.

If using Kodi to play video to your TV, there is an additional utility of Ace Stream that allows you to use Content ID of Ace Stream right in Kodi.
