

# How to write on the web page with Simple Webpage Note

Simple Webpage Note utility will create notes on the web and display notes right in the web interface.

Besides note taking software on the computer, many people choose to add a note-taking utility on the browser, to take notes quickly as they surf the web. Simple Webpage Note is a note-taking utility on Chrome that helps us save all the necessary information on the web when we visit. This utility will always pin and display notes right in the interface of the website to use whenever needed. Besides, the Simple Webpage Note utility also stores the website link containing notes in the interface to manage the created notes. The following article will guide you how to write notes using Simple Webpage Note.

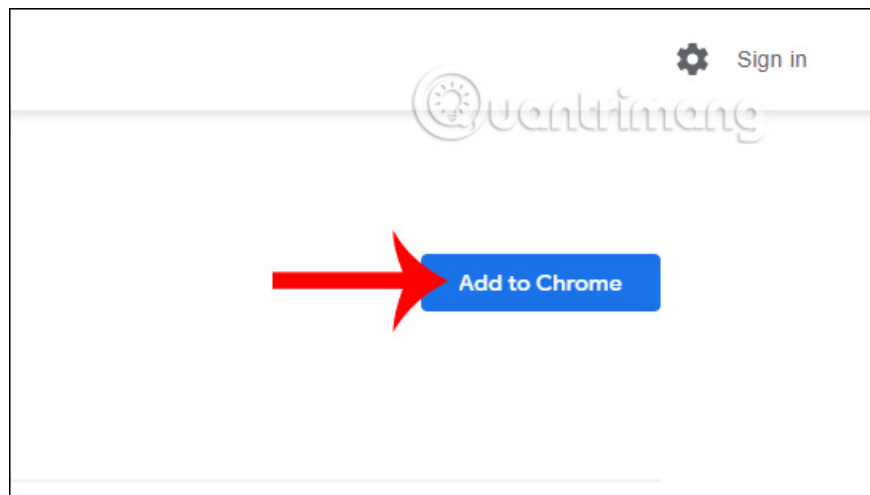

1. 5 quick and useful note taking apps
2. How to use the Firefox Notes note extension
3. Add new Stickies notes tool on Windows 10
4. Tips to make Google Keep notes more efficient

## Guide to create notes with Simple Webpage Note

### Step 1:

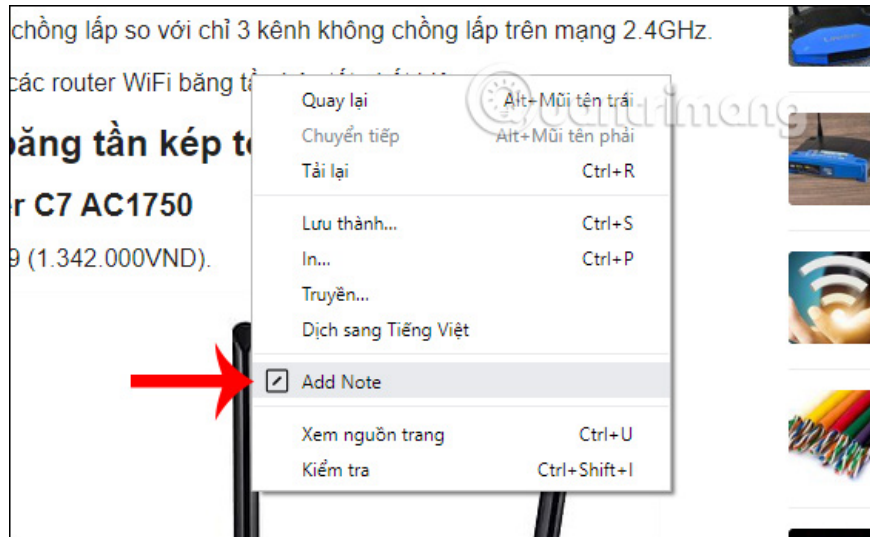

Users install the Simple Webpage Note utility for Chrome browser by following the link below.

1. Download the Simple Webpage Note Chrome extension

## Step 2:

After installation is complete, users open the site you want to create notes. We **right-click on the page** and select **Add Note** in the right-clicking menu displayed.

Now display a small frame for users to write notes. You can type a note directly into the frame or copy and paste the content into the note box.

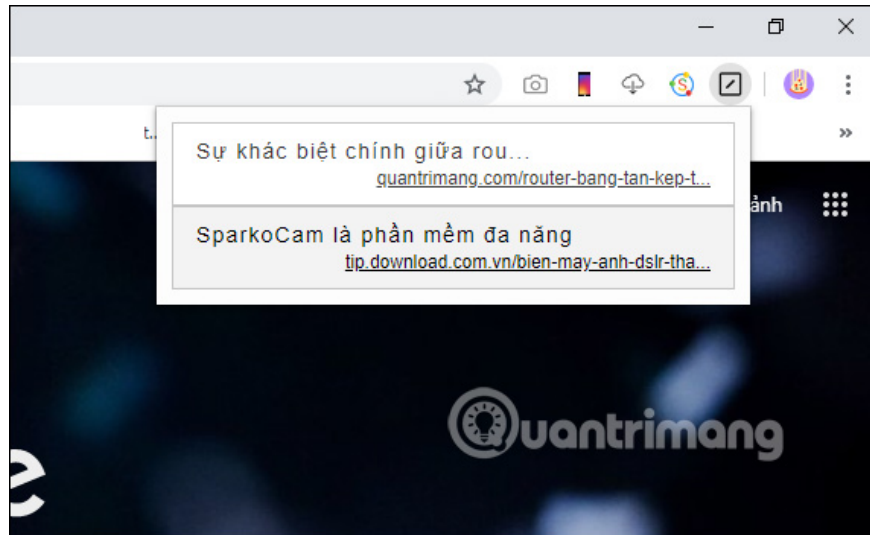

This comment frame can be moved to any position by hovering the mouse over the black dot displayed at the corner of the frame as shown.

## Step 3:

The created notes are saved in the utility's archive. When you click on **the extension icon** at the browser will display the created notes.

Each frame is each note with the above being the note text and below is the website you created the note to revisit when needed.

#### Step 4:

To delete a note we just need to click the triangle icon and then press **the Delete button** to delete the note.

The Simple Webpage Note utility helps us take quick notes on web pages if there is content to be saved. All notes that have been created have the option to delete and the website link shows the notes for you to access.

I wish you successful implementation!
