

How to write text on pictures

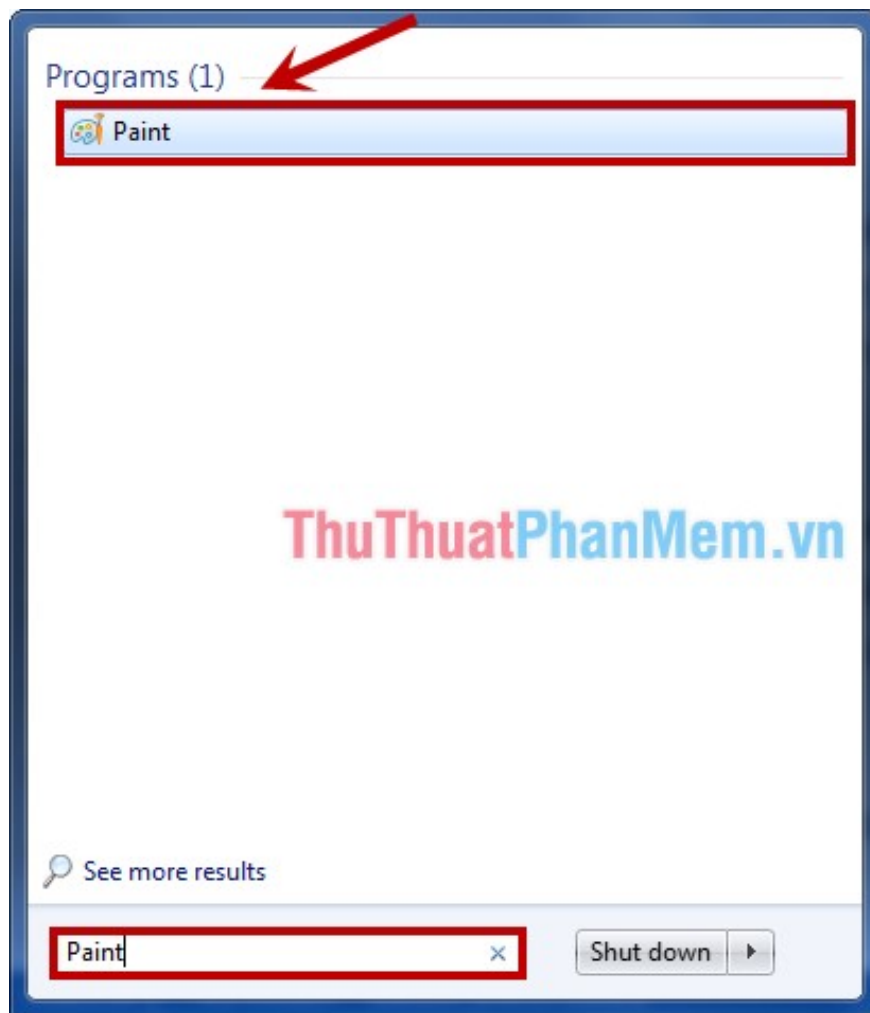

You want to write text on images but do not want to install any software on your computer. Very simple, Windows operating system has built-in Paint program, you can use this program to write text on images quickly.

You want to write text on images but do not want to install any software on your computer. Very simple, Windows operating system has built-in Paint program, you can use this program to write text on images quickly.

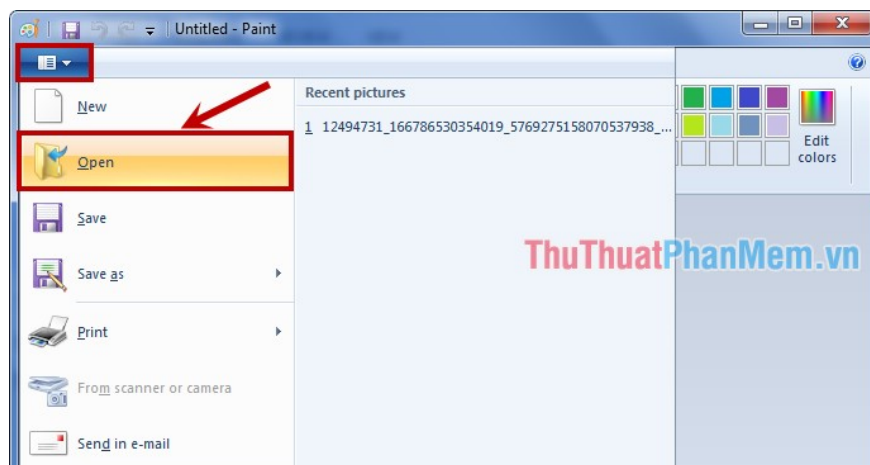

Here are the actions that you can use to write text on images using the Paint program.

Step 1: Open the image to be written in the Paint program.

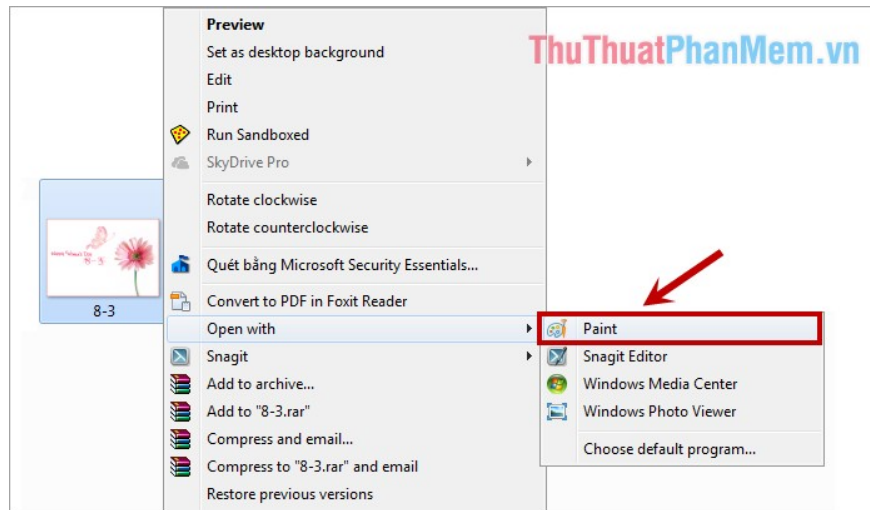

First, click the **Start Menu** and enter the *Paint* keyword into the *Search Programs and Files box* and select Paint to open the Paint program (or you can choose the **Start Menu -> All Programs -> Accessories -> Paint**).

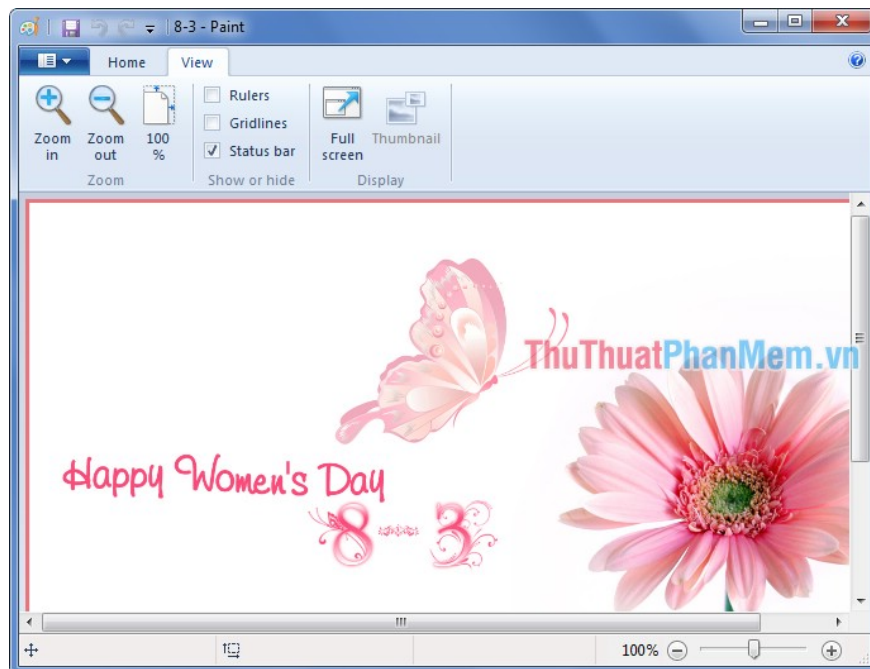

On the Paint program interface, select **the Paint icon** -> **Open** (**Ctrl + O** shortcut combination) and select the image you want to write text to open the image in the Paint program.

You can also open images in the Paint program quickly by selecting the image to be written and right-clicking, in the right-clicking menu showing you choosing **Open With -> Paint** .

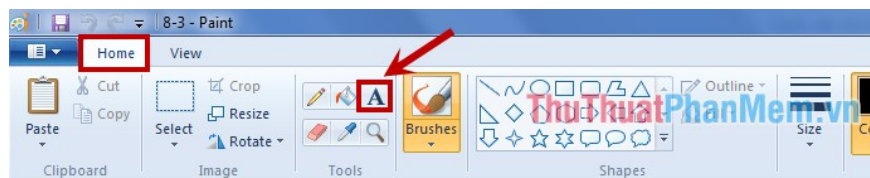

Then the image you selected will be displayed in the Paint program.

Step 2: Write text on the selected image.

On the Paint toolbar, select the **Home** tab and select the **A** symbol in the **Tools** section .

Next, click the left mouse button on the position where you want to write text on the image (or you can click and hold the mouse at the beginning and drag the mouse to the end position to select the writing area).

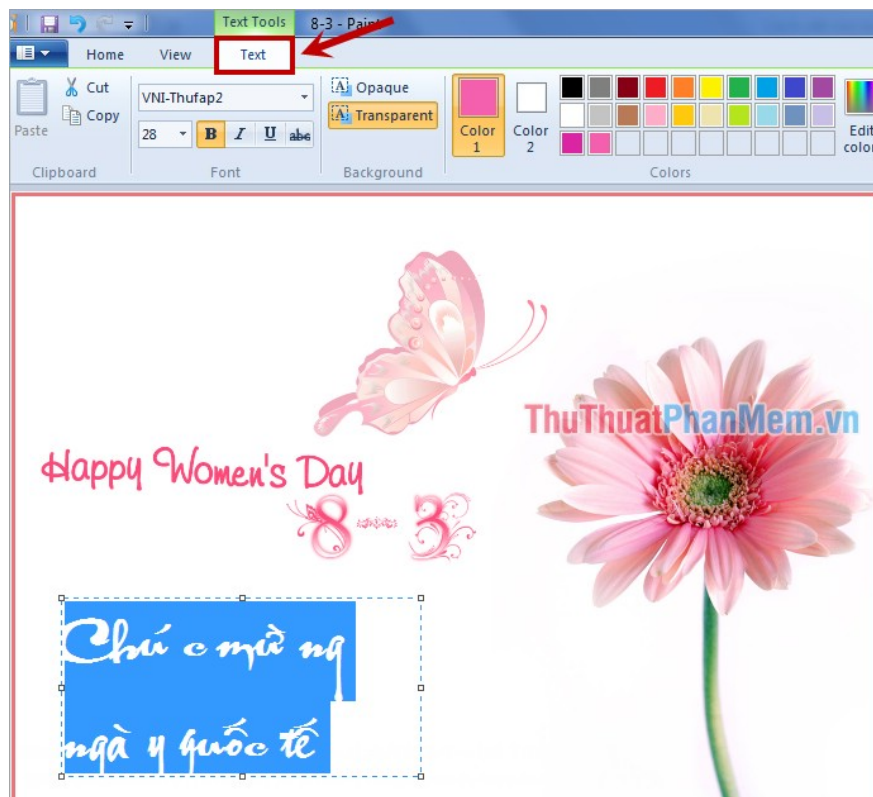

A frame with a dashed line appears, left click on the frame and write the text that you want to insert into the image.

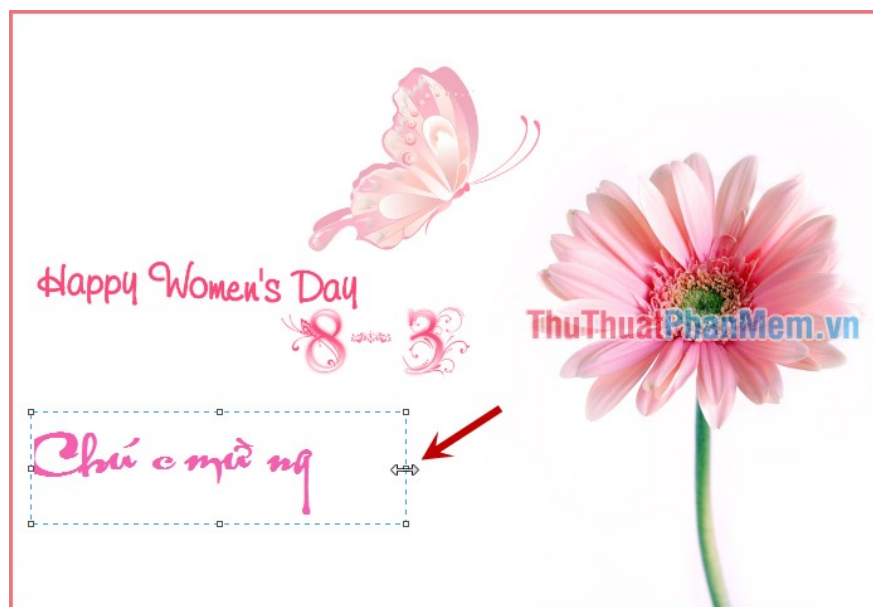

Step 3: Edit the text just written on the image.

Select (black out) the text to edit, on the toolbar of Paint appears Text tab of **Text Tools** . You can edit the text in the sections of this card.

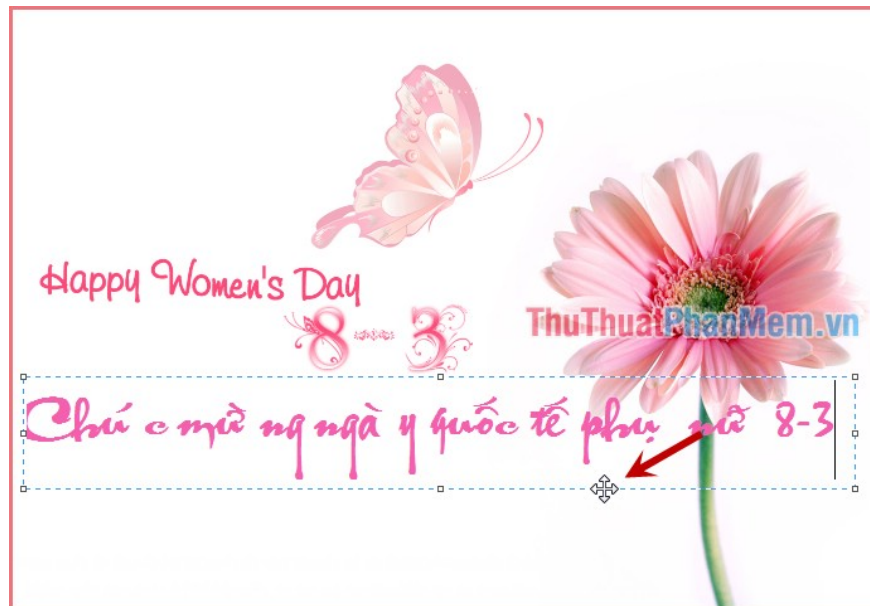

- **Font:** edit font, font size, type.
- **Background:** choose the background for the text (Opaque:, Transparent:).
- **Colors:** choose colors for the text (click on **Edit colors** to choose more colors).

You can expand the text area so that you do not lose the text by moving the mouse pointer to one of the eight square buttons in the text box so that the mouse appears a two-way arrow, then press and hold and expand the text area accordingly. .

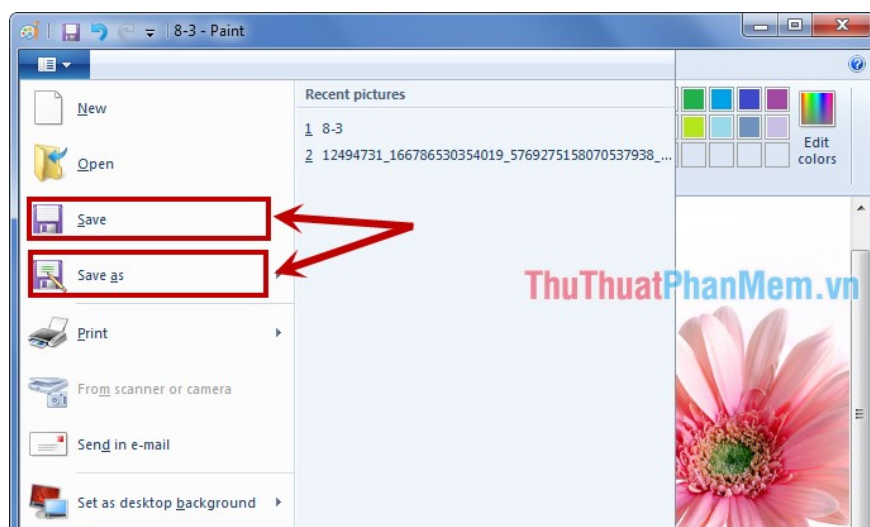

In addition, you can move the text to another position of the image by moving the mouse pointer on the crossword to appear the cursor as shown below, then hold down the mouse button and move to another position that you want.

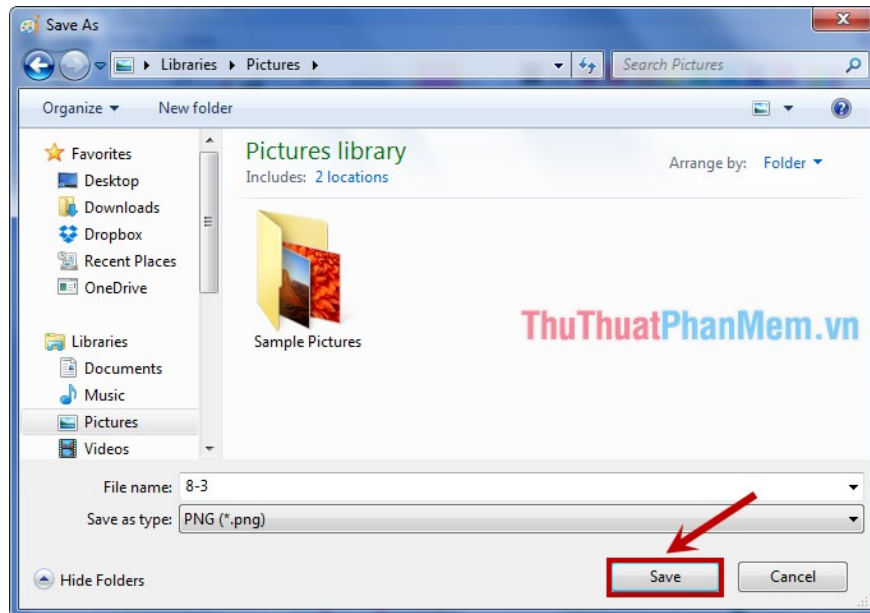

Step 4: Save the image you just inserted.

On the Paint interface, select the Paint icon, here you have two options:

- **Save:** save over the original image.
- **Save as:** save as a new image, keep the original image.

If you select **Save as**, the interface will appear **Save As**, you select the location to save the image, name the image and choose the format for the image and then click **Save** to save the image.

Good luck!
