

How will you look after 50 years, try this application to predict the future face!

The application that shows the future face, changing the sex and modifying the current feverish smile will make you laugh after editing.

1. "Divine" photo editing applications, anyone who loves "virtual living" should update immediately
2. How to mass edit photos on iPhone?

Today, the selfie movement is one of the hot activities of young people. They want to check the place they are going to, with whom or simply selfie to see how their faces are today. Sometimes we wonder after 10, 20 years or even more years what my face will look like, or if I am a guy / girl who looks like I will be.

To answer these questions, Android and Apple have released tons of apps on Google Play Store and iTunes Store. However, recently appeared a feverish application on both Android and iOS operating systems called Face App.

This application allows users to switch faces with artificial intelligence. With just a click of the screen, you can edit the smile, make it beautiful, edit the character in the picture younger or older or even change the sex. This is an interesting application that many celebrities are also using.

This is an easy-to-use application, just download the application, select a photo from the album or take it directly from Face App's camera, then select the Smile, Smile 2, Old, Young, Spark, Female, Male . to change the face as you like. The results will probably make you feel funny. Perhaps it would be more fun if you use the application with friends, look at your image, your friend after changing is a very interesting thing.

Here are some reviews from Face App users.
