

HP Elite Dragonfly, a new business laptop model with many notable advantages

HP continues to launch a new business laptop model called Elite Dragonfly with many notable improvements.

Laptop business, or business laptop is the laptop model optimized for business users, and in this segment, HP has always been one of the manufacturers that create satisfaction for users.

Continuing that tradition, HP continues to launch a new business laptop model called Elite Dragonfly with many notable improvements. The Elite Dragonfly is HP's latest EliteBook model, and the first advantage you can notice from the first time you see this laptop is probably in the design.

1. Avoiding the US ban, Huawei started selling laptops running Linux instead of Windows

Elite Dragonfly is HP's latest EliteBook model, expected to "raid" the \$ 1,500-2000 segment

The Elite Dragonfly looks nothing like an ordinary business laptop. It possesses a square, thin, light magnesium casing, the lines are not too prominent but are combined in an extremely elegant way, making it easy to mistakenly think that this is a personal laptop belonging to the sub High-end segment instead of a device manufactured for virtually fixed use in busy business offices.

As the name implies, this dragonfly is only 13.3 inches in size and weighs less than 1kg (2.2 pounds), which is a lot lighter than most other EliteBook models that HP has ever launched. With such dimensions and weight, Elite Dragonfly is light enough so that users can easily carry the product with them with one hand and work anytime, anywhere. HP is clearly trying to create a worthy product to compete with other bright competitors in the aspect of 'portability' such as LG Gram, Galaxy Book S or Huawei Matebook X Pro.

1. What is the MIL-STD 810 durability standard? Is this an important factor to buy a smartphone or laptop?

HP Elite Dragonfly owns a square design, thin, light, the lines are harmoniously coordinated, few redundant details.

Despite its rather monotonous design and compact size, Elite Dragonfly does not feel cheap, and at the same time, HP has been crammed with full of connectivity utilities and features, even more than many products in the above segment.

This is a 2-in-1 laptop, so the screen and keyboard can be folded 360 degrees, which is useful in case you want to use the Elite Dragonfly as a tablet or manipulate directly. on its touch screen. The Elite Dragonfly has stylus support, but unfortunately this pen is not included, which you will have to buy separately.

1. Review Asus ZenBook Pro Duo UX581, a 2-screen laptop from Asus - 76 million is worth it?

HP Elite Dragonfly is easily mistaken for a personal laptop in the high-end segment

Looking around the sides of the device, you'll find 2 Thunderbolt 3 ports (both can be used as charging ports), 1 USB 3.1 Gen 1 port, 1 HDMI port, 3.5mm headphone jack and lock Kensington. On the top of the screen will be a 720p Webcam that supports face recognition with Windows Hello, in addition to a fingerprint sensor located at the edge of the hand below the keyboard, allowing you to comfortably use it. Use personal authentication method as you like.

1. Samsung unveiled the Galaxy Book S, an ultra-thin laptop with great battery life

720p webcam with support for Windows Hello face recognition

In terms of armature configuration, Elite Dragonfly is equipped with HP 8th Generation Intel Core U-series processors. This is an enterprise class chip, specially designed for optimizing power usage, User-friendly, but still able to handle the majority of today's basic office and entertainment applications.

The Elite Dragonfly will have plenty of processor options, starting with Intel Core i3-8145U in the lowest version until Intel Core i7-8565U in the highest version, however all versions will come with With integrated graphics Intel UHD Graphics 620, not too powerful but enough to use. It features a maximum configuration of 16GB dual-channel LPDDR3 RAM, and 2TB of NVMe SSD storage in the highest version. While the base version is not so bad with 8GB RAM and 128GB M.2 SATA hard drive.

1. This is the first folding computer in the world Lenovo ThinkPad X1

HP Elite Dragonfly owns push the necessary ports to connect with a modern laptop

Some other notable features on the Elite Dragonfly include support for newly launched Wi-Fi 6 (802.11ax), which brings the internet speed up to 5 times faster than conventional 802.11ac. You can also use 4G LTE if you want. HP has added a 4x4 antenna system to the Elite Dragonfly (2 antennas located in the top edge of the screen and the other 2 antennas placed in the hand position below the keyboard), helping to improve Significant speed of signal transfer compared to the 2x2 antenna layout on the HP EliteBook x360 1030 not long ago.

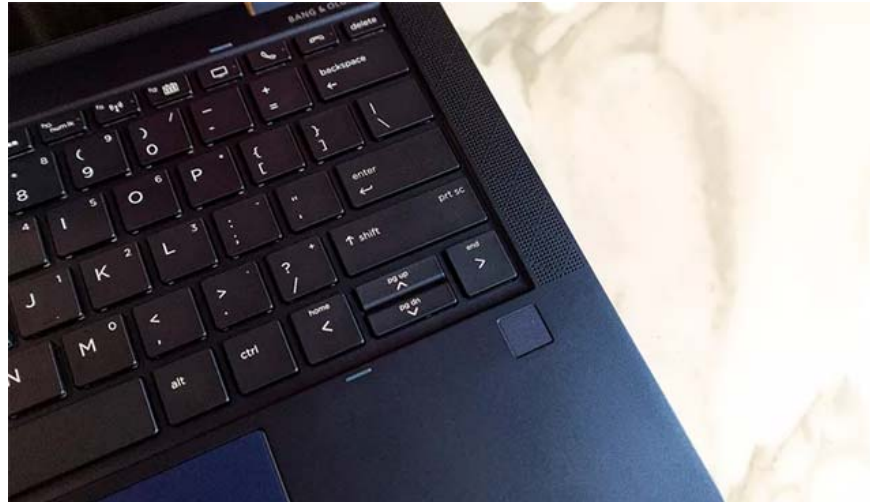

Because Elite Dragonfly is a product line aimed at business customers, HP will support more flexible hardware custom packages for the product to match the actual needs of each business in the fields. different areas. For example, if you are willing to give up the weight of 1kg in exchange for a longer battery life, you can choose to use a different battery cell with a higher performance: 56mmh (default battery is 38Wh), estimates may extend basic usage time from 16.5 hours up to 24.5 hours. Both battery options support the HP Fast Charge feature, which can recharge 50% of the battery in less than 30 minutes.

1. 12 best thin and light laptops of 2019

The screen is also a factor worth mentioning on Elite Dragonfly. The default panel on this laptop has FHD resolution with a maximum brightness of 400 nits and only consumes 1W of power per hour of use. You will have the best battery life with this default panel, but if you need a sharper, brighter screen, HP also offers an optional UHD display with HDR support and a maximum brightness of 550. nits - of course it will also consume more electricity, but not so significantly.

If your work requires 'strict' privacy, you can also choose to use the HP Sure View panel with the ability to limit digital viewing, helping to prevent prying eyes. screen while you are working. This platform supports up to 1,000 nits of brightness and has FHD resolution.

1. Surface Centaurus - Microsoft's new hope in the foldable device market?

The fingerprint sensor is located just below the keyboard for convenient operation

The new 'dragonfly' of HP will start shipping in November here in the US and Europe (no information on the launch date in other markets), with prices starting from 1,549 for the session. basic version.
