

HP is going to sell new 'ultra-thin' laptops

HP has just announced a number of products of thin, light Ultrabook and Sleekbook laptops equipped with the latest technology.

HP has just announced a number of products of thin, light Ultrabook and Sleekbook laptops equipped with the latest technology.

New products in HP's collection include the HP ENVY SpectreXT - a premium "*ultraportable*" Ultrabook™, 14.5mm thin, weighing 1.39 kg and featuring a 13.3-inch HD screen and 256GB of storage. Solid-state drives (SSD) and batteries for up to 8 hours ., give users a comprehensive experience with impressive design and strong performance.

With the combination of fashion style and certainty, the HP ENVY Sleekbook and HP ENVY Ultrabook™ series offer a highly entertaining experience with 14-inch and 15.6-inch screen options, which are equipped with Beats Audio technology, HP Imagepad technology provides precise gesture and multi-touch control, HP TrueVision HD Webcam technology delivers high definition HD images .

HP ENVY Sleekbook Laptop

In addition, HP introduced the HP EliteBook Folio 9470m, which uses a third-generation Intel® Core™ vPro technology, a 14-inch screen and weighs 1.63kg, equipped with a USB 3.0 connector ., a line HP's first Ultrabook™ computer has a stylish, lightweight design that does not affect the essential features.

According to HP, the HP ENVY SpectreXT is expected to be available in the Asia-Pacific market in mid-June 2012 with a starting price of around 999 USD; HP ENVY Sleekbook / Ultrabook™ will be available in May for around \$ 699 and the HP EliteBook Folio 9470m will be available in October 2012.
