

HP launched a very cheap business laptop

On April 28, HP launched the ProBook notebook line - a combination of business and user features such as high definition graphics (HD) and Blu-ray drive.

On April 28, HP launched a line of low-cost ProBook laptops for businesses. The ProBook laptop is a combination of business and user features such as high definition graphics (HD) and Blu-ray drive .

HP's ProBook cheap business laptop line. The HP ProBook series offers users two choices of Intel and AMD chips, with 14-inch, 15.6-inch and 17.3-inch screen sizes (widescreen and 16: 9 formats). The new laptop has two operating system options: Windows Vista and SuSE Linux Enterprise Desktop 11 (the latest Linux version of Novell).

The HP ProBook series is also equipped with many business features such as HP SpareKey - allowing users to answer 3 personal questions in case of a forgotten password; One-touch access button for e-mail, calendar, and contact book; File Sanitizer utility to permanently delete files, folders and personal information from the hard drive.

The starting price of the ProBook series is only \$ 529.

Most products of the ProBook series have the same features as: 800 MHz DDR2 SDRAM (can be upgraded to 8GB); 500GB hard drive; Wi-Fi connection a / b / g / n; ExpressCard / 34 card slot; Media Card Reader card slot; 4 USB 2.0 ports, 1 VGA and HDMI port. In addition, users can choose from other components: Blu-ray

ROM DVD +/- RW SuperMulti DL LightScribe Drive5; 2 megapixel webcam; Bluetooth 2.0 connection.
