

# HP Mini 1000 officially launched

The upgraded version of the netbook has been officially announced by HP on its website. The Mini 1000 is completely 'meat-changing' with a 10.2-inch screen and high storage capacity

**The upgraded version of the netbook has been officially announced by HP on its website. The Mini 1000 is completely "skin-changing" with a 10.2-inch screen and higher storage capacity than the previous model.**

HP uses a black plastic material instead of the hard aluminum case of the MiniNote version, making netbooks a real competitor to the compact computer segment. HP Mini 1000 is also equipped with standard 1024x600 LED screen, which helps the body thickness when folded down to fit 1 inch (equivalent to 2.54cm). The weight of the device also decreased to approximately 1kg.

Regarding networking, the device supports 802.11b / g Wi-Fi connections and Ethernet 10/100 MB / sec. The processing speed of the machine is also significantly improved thanks to Intel Atom 1.6GHz chip. Built-in 16 GB SSD drive but can optionally add an external hard drive with the appropriate capacity to use.

The basic HP Mini 1000 configuration is priced at \$ 399.
