

## HP Mini 210 is small, cheap

The HP Mini 210 version for 2011 continues to be innovated with colorful plastic cover suitable for young people to reduce weight and lower costs.

**HP's new netbook costs only \$ 299 but has six colors to choose from.**

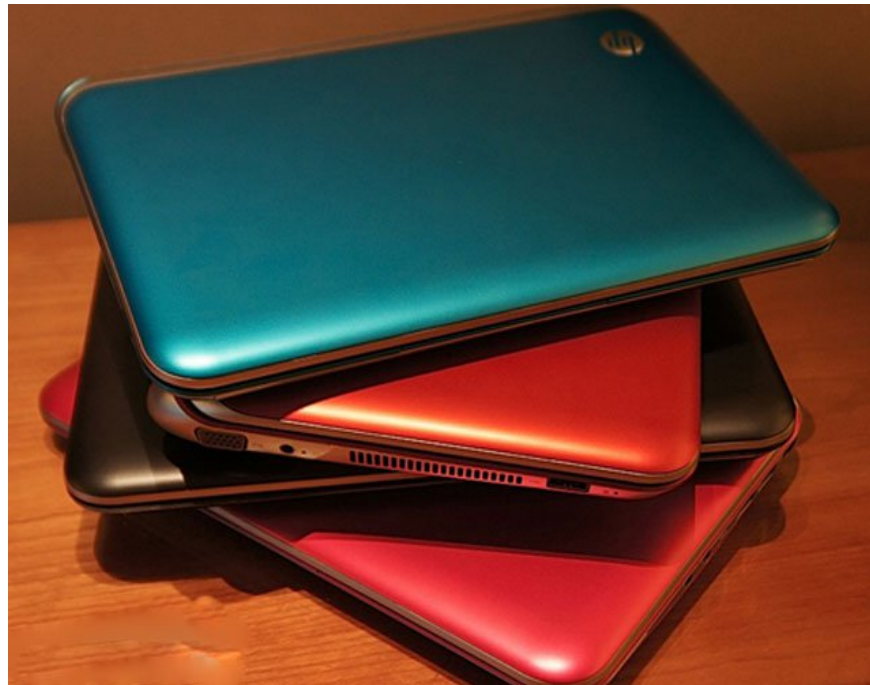

The HP Mini 210 version for 2011 continues to be innovated with colorful plastic cover suitable for young people to reduce weight and lower costs.

The new design also adds a seamless touchpad, a 10.1-inch display with a thin border and a 6-cell battery for up to 8.8 hours of battery life according to the manufacturer.

Another significant change, the Mini 210 has Beats Audio's "worthwhile" speakers that deliver excellent sound. The machine configuration hasn't changed much with the N550 dual-core Atom processor.

Mini 210 has started selling at a starting price of 300 USD for gray and an additional 30 USD for other colors.

**Some real pictures of HP Mini 210:**

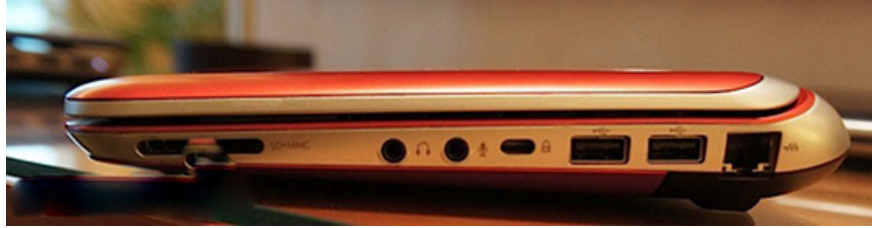

The HP Mini 210 has 6 colors to choose from. This is still the mainstream netbook line for HP's young users.

However, with the exception of gray, the other colors all users have to pay an additional 30 USD.

With a silver-painted design, the Mini 210 has a plastic cover but feels luxurious and sturdy like a metal case.

The design is quite stylistic in the following section. Mini 210 has no HDMI and eSATA ports.

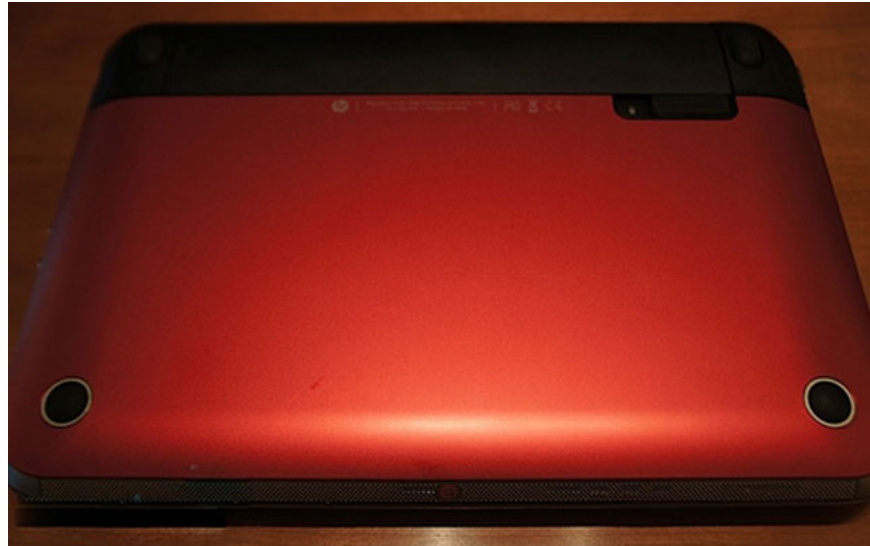

The familiar chiclet-style keyboard.

Seamless touchpad design.
