

HP Pavilion dv4, dv5, dv7 series

In early October, HP launched in Vietnam the Pavilion dv4, 5, 7 collection to replace the old product lines.

In early October, HP launched in Vietnam the Pavilion dv4, 5, 7 collection to replace the old product lines. The new series has a more elaborate design and more personality and upgraded configuration.

Vietnamese users are no stranger to HP's Pavilion entertainment laptops, with dv2000, dv6000, dv900 series. Recently, the company introduced in Vietnam 3 new series, dv4, dv5 and dv7. Besides the upgrade of features and configuration, HP has shown a completely new product design style: polished, impressive and personality.

In terms of design, HP Pavilion line dv4, dv5, dv7 have a soft design with rounded corners that make it feel flexible and generous. The main colors are silver and black combined quite smoothly in every corner. The case is painted with the exclusive HP Imprint Finish technology with a dot pattern engraved in a stylish fashion. HP logo is arranged neatly at the corner and is capable of self-glowing when the machine is operating.

The entire surround is HP 'design' again in a 'liquid metal' style with a strong bright coating. The keyboard design is a major improvement for the company because of its soft, elastic buttons and silver plating on the entire surface. In addition to the purpose of blending with the overall, this also makes the keys minimize the possibility of abrasion due to contact with the user's hand sweat during use.

HP logo glows automatically when the machine is operating.

HP Pavilion dv4, dv5, dv7 are fully equipped with high-tech entertainment features. Included is a high quality HDMI sync audio transmission capability, Light Scribe live disc label recording and printing technology, remote control for media center, built-in webcam and mic, Altec Lansing Stereo speakers , DVB or Analog TV tuner receiver (optional) .

A prominent improvement is the high-resolution mirror screen with an 'endless flat' design that gives users a sense of no limit on the ledge. This feature can be found in some mid-range and high-end models that cost over \$ 1,200.

In this new product line, HP also has a hard drive with eSATA high-speed data transfer technology, HP Protect Smart Driver hard drive protection technology, a feature that was previously available only on computer models. HP's business notebook.

Connectivity is maintained with Wi-Fi, Bluetooth, Infrared, LAN / Modem and a connected 'series' of ports are arranged on both sides of the machine. The new HP Pavilion is equipped with various connectivity ports: eSATA / USB Combo, HDMI, Docking, IEEE1394, Card reader .
