The largest computer maker has recently upgraded the EliteBook 8470w workstation with a host of new hardware such as processors, monitors and graphics cards. This new model is sold in Japan for about USD 1,805 (equivalent to VND 37.6 million).

The EliteBook 8470w uses the Intel QM77 Express chipset for professional users. It is equipped with a quad-core Intel Core i7-3720QM vPro processor with a 2.6GHz speed based on the latest Ivy Bridge platform. The LED screen of the EliteBook 8470w is a 14-inch version with 1,600 x 900 pixel resolution, 16GB DDR3 RAM, 500GB hard drive and AMD FirePro M2000 GPU with 1GB VR5 VRAM.

In addition, HP's new product also supports 802.11 a / b / g / n Wi-Fi, Bluetooth 4.0 with EDR, USB 3.0, USB 2.0, Firewire, RGB, card reader, DVD burner and slot ExpressCard plug-in. EliteBook 8470w runs Windows 7 Professional 64-bit. The battery that comes with the device is a 6-cell type that allows operation for 4.6 hours.
