

HTC launched U12 Life equipped with Snapdragon 636, with headphone jack, 3600mAh battery, priced from 9.5 million

HTC has launched its new mid-range smartphone called U12 Life at IFA 2018.

HTC has launched its new mid-range smartphone called U12 Life at IFA 2018.

The special feature of the new model from HTC is that the back is designed with 2 separate color arrays similar to Google's Pixel 2 and Pixel 2 XL. The upper half is smooth, the bottom half has a carbon pattern. It has 2 colors: Moonlight Blue (moonlight blue) and Twilight Purple (twilight purple). Right in the center is the fingerprint sensor.

HTC U12 Life is equipped with 636 Snapdragon chip, 4GB RAM, 64GB internal memory, UFS 2.1 standard, 3600mAh battery. The device has a non-trend rabbit screen, 6 inch size, 18: 9 ratio, 2160x1080px resolution. HTC U12 Life has a storage version of 128GB but only sold in Taiwan market.

Rear dual camera cluster has 16MP + 5MP resolution, f / 2.0 aperture, support for taking photos off fonts. The front camera has a resolution of 13MP, f / 2.0, supports LED flash and adds HDR mode.

HTC decided to keep the 3.5mm headphone jack on U12 Life. U12 Life uses a hybrid SIM tray, can use either 2 SIM or 1 SIM card simultaneously.

HTC U12 Life will run on Android 8.1 operating system with HTC Sense interface.

HTC will launch U12 Life to the European market in late September and the device will cost about 407 USD (equivalent to 9.5 million).
