

HTC Video Highlights for Windows Phone update

HTC Video Highlights today received a new upgrade for Windows Phone. This is a feature for HTC One (M8) for Windows similar to Lumia Storyteller application.

HTC Video Highlights today received a new upgrade for Windows Phone. This is a feature for HTC One (M8) for Windows similar to Lumia Storyteller application.

The new update allows you to add screenshots and save images to your gallery. In addition, you can also use third party content to add to Highlights. With Video Highlights for HTC One (M8), you will manipulate some of your photos and videos, group them together then pick out what needs to stand out most of a video. Next add the soundtrack to make the Highlights Video come alive.

After creating a complete video, you can share via social media or email as an mp4 file, even via NFC or Bluetooth.
