

Huawei announces a list of smartphones and when specific GPU Turbo updates are available via OTA

Theoretically, Turbo Turbo will enable more powerful graphics cores, reduce energy consumption by 30% but still increase performance by 60%.

Turbo GPU is a fast-paced technology that has been first integrated by Huawei on Honor Play. With this technology, Huawei confidently claims that, on standard sites, a mid-range Honor device can beat another high-end smartphone.

Theoretically, Turbo Turbo will enable more powerful graphics cores, reduce energy consumption by 30% but still increase performance by 60%.

In addition to Honor Play and Honor 9, Huawei is expected to continue deploying this technology to other older smartphones. And recently, the company announced the exact time and list of smartphones receiving Turbo GPU updates via OTA:

GPU Turbo Update Plan
