

Huawei launched Band 4 Pro, integrated NFC, GPS, SpO2 blood oxygen sensor, priced at 1.3 million

Band 4 Pro is considered an upgraded version of the Huawei Band 4, launched in October, but equipped with many new improvements.

Huawei recently launched Band 4 Pro, an upgraded version of the Huawei Band 4 that launched in October, but equipped with many new improvements.

Huawei Band 4 Pro has a 0.95-inch high-definition color AMOLED screen, allowing users to easily adjust the face of the watch face.

The frame is made of metal, while the strap is made of leather-friendly silicon, the Band 4 Pro is extremely lightweight and feels comfortable for users to wear, even when worn for a long time.

Huawei Band 4 Pro has 11 built-in modes, which can save workout data from 127 sports. Huawei's fitness tracker is also equipped with GPS, a heart rate monitor and sleep tracker, and a SpO2 meter to monitor blood oxygen saturation.

Huawei also equips the board with an independent NFC chip onboard to help support payments through many applications such as Alipay.

Band 4 Pro uses a charging dock with three connectors on the back cover so it has a different charging mechanism than the Band 4 despite the similar design.

The Huawei Band 4 Pro is priced at 399 yuan (about 1.3 million) and will be officially on shelves on 12/12 to. Products have 3 color options for users to choose including red, black and pink.

1. Huawei launches Watch GT 2, listens for smartphones, 2-week battery, 50m waterproof, priced from 5.49 million
2. Experience Haylou LS0a1, a smartwatch costing VND 500,000 of Xiaomi, is it worth buying?
