

# Huawei Mate X immediately sold out less than a minute after launch in China

The Mate X is Huawei's first foldable smartphone.

Motorola Razr has just launched as the star of the folding screen smartphone world at the present time with an extremely unique design and excellent performance. However, another big name that anyone has heard of when it comes to folding screens is that Huawei Mate X also knows how to attract attention when sold out in less than 1 minute. sold in their home country of China,

Mate X is Huawei's first foldable smartphone, which was first introduced at CES 2019 with impressive specifications: Kirin 980 flagship CPU, 8GB of RAM, 512GB of storage and support 5G connectivity, along with a 4,500 mAh battery and 55W super fast charger.

The ability to fold is the most notable feature of this new smartphone model. When in the open state Mate X for display size up to 8 inches - almost the equivalent of a mid-sized tablet. In the closed state, users can use either of the 6.6 inch front screens or the 6.38 inch back. This clever design gives Huawei Mate X an extremely high versatility.

After countless delays, Mate X was launched by Huawei in the form of ordering and paying online at 10:08 am on November 15 (local time) in China, and immediately created a storm. Fever in technology 'circles' in the country of billions of people when the entire product was sold out 'veo' in less than 1 minute open sale.

At the first launch, the product cost a list price of 16,999 Yuan (approximately \$ 2,420) for the lowest configuration version, competing directly with another folding smartphone, Samsung's Galaxy Fold, which was launched in September. This year, and even the newly launched Motorola Razr.

As planned, Huawei will have the next sale of Huawei on November 22, starting at 10:08 (local time). However, Chinese manufacturers have not yet announced information to launch this product in other markets.
