

# Huawei nova 7i: Kirin 810 chip, 4,200 mAh battery, twice faster charging iPhone 11, priced at 7 million

Huawei has just introduced the nova 7i, an upgraded version of the nova 5i. This is the second smartphone after Mate 30 Pro that doesn't have any Google services like Drive, YouTube or Gmail when sold in Vietnam.

Huawei has just introduced the **nova 7i**, an upgraded version of the nova 5i. This is the second smartphone after Mate 30 Pro that doesn't have any Google services like Drive, YouTube or Gmail when sold in Vietnam.

**Huawei nova 7i** is equipped with an advanced 6.4-inch HUAWEI Punch FullView screen that supports Full HD + resolution, with a 'hole in' in the top left corner of the screen. The perforated portion contains a selfie camera with a resolution of 16MP that helps the display overflow and gives a better experience to the user.

The back of the Huawei nova 7i device is designed with four curved edges to create a sense of compactness and comfortable grip. It is equipped with a fingerprint on the power button on the side to help unlock faster and easier.

Nova 7i owns 4 rear camera clusters designed like the iPhone square, including the main camera resolution of 48 MP, ultra-wide angle lens of 120 degrees, 8 MP and 2 secondary cameras 2 MP.

In terms of configuration, Huawei nova 7i is equipped with Kirin 810 chip manufactured with advanced 7nm process that helps to bring performance and energy savings. It has 8GB of RAM, 128GB internal memory and 4,200 mAh battery, built-in fast charging technology of 40W.

It is also equipped with a high-capacity 4200mAh battery that supports T choV Rheinland's 40W HUAWEI SuperCharge solution. The battery can be charged to 70% in just 30 minutes.

The **Nova 7i** comes preinstalled with EMUI10, and its own App Gallery.

It has 2 color options for users to choose from: Sakura pink and emerald green.
