

# Huawei P30, Huawei's most popular flagship of 2019, has set its launch date

Huawei announced it would return to the capital of the French capital in March to create a true blockbuster in the smartphone industry ...

A year after the successful launch of the first cult smartphone in its flagship P series, the Huawei P20 in Paris, Huawei announced it would return to the French capital in March to create a blockbuster. Truly in the smartphone industry, it is the event of launching a series of Android smartphones at the top of the P30 2019 table.

In a tweet posted from Huawei's official Twitter account, the world's second-largest smartphone maker officially set a release date for its most important phone model in 2019, specifically on March 26, accompanied by images of the Eiffel Tower, Arc de Triomphe and Notre-Dame de Paris with the implication that the venue for the launch event will once again take place in Paris. Experts say that the reason for choosing the launch time later than MWC 2019 and CES 2019 is because it wants to attract all the attention of the community and the media for their event. It can be said that with technological leaps and smart phone designs that Huawei has improved over the years, users are gradually forming the eagerness about the super products that this company intends to Future eyes, so that the Huawei P30 receives great attention from both observers, media and the user community is also understandable.

1. The most remarkable smartphone models 5G will be released in February, who will lead the game?

Thus, this information also means that MWC 2019 in Barcelona will likely completely miss Huawei's top products. In addition, Samsung will also hold a special launch event on February 20, a few days ahead of MWC, to launch products in its new Galaxy S10 line that shows that it looks like the houses. Big producers are no

longer interested in MWC - one of the biggest events in the smartphone industry.

Returning to the flagship Huawei P30, synthesized from the leaked information up to the present time, this phone will emphasize quite a lot on the experience of taking photos with 4 cameras on the back (the highest version P30 Pro). Meanwhile, the standard version of the Huawei P30 will come with 3 rear cameras, ie more of a sensor than its predecessor P20.

According to XDA Developers, although the Huawei P30 Pro is equipped with up to 4 rear cameras, only 3 of them will be used to take pictures, the fourth camera will be the ToF (Time-of-flight) camera, used for Advanced add-on tasks such as face scanning and 3D modeling. In addition, one of the remaining three cameras of the P30 Pro will be a telephoto lens with 10x optical zoom capability, and for the P30, the telephoto lens of this phone will have 5x optical zoom.

#### 1. New and breakthrough technologies will appear on high-end smartphones of 2019

At the same time, both the P30 and P30 Pro will completely abandon the 'rabbit ears' screen and switch to using the 'water drop' screen, this type of screen design is expected to help increase the screen area ratio. more than the front of the device, which has been optimized very well in the previous version. In addition, the P30 is likely to be Huawei's first phone to support 5G technology.

All will be verified on March 26, let's wait and see!
