Recently, Huawei introduced the first member of its flagship P40 series. The product, called Huawei P40 Lite, is considered as a renamed version of Nova 6 SE that was launched in December last year.

Recently, Huawei introduced the first member of its flagship P40 series. The product, called Huawei P40 Lite, is considered as a renamed version of Nova 6 SE that was launched in December last year.

Huawei P40 Lite is equipped with 6.4 inch IPS LCD screen, Full HD + resolution, 90.6% display level, there is a "mole" in the top left corner.

The P40 Lite measures 159.2 x 76.3 x 8.7mm and weighs 183 grams.

The upper left corner of the back is a square module containing a 4-camera system including a 48MP f / 1.8 main sensor, 8MP f / 2.4 wide-angle sensor, 2MP f / 2.4 macro sensor and a dimensional sensor 2MP depth with f /

2.4 aperture. The selfie camera has a resolution of 16MP f / 2.0.

In terms of hardware, P40 Lite is equipped with Kirin 810 processor built on 7nm process, 6GB of RAM and 128GB internal memory, with a microSD card slot.

The phone comes with Android 10 pre-installed with EMUI 10 interface on sale, but unfortunately it doesn't have Google services (GMS).

The battery of the device has a capacity of 4200mAh, supports SuperCharge 40W fast charging, just 30 minutes to charge from 0% to 70%.

The fingerprint sensor of the device is located on the side. P40 Lite supports 2 SIM, 4G LTE connectivity, 802.11ac Wi-Fi, USB-C port and Bluetooth 5.0 LE.

Huawei P40 Lite has three color versions including Black (Midnight Black), Blue (Crush Green) and Pink (Sakura Pink).

Huawei P40 Lite is expected to go on sale on March 16 at a price of 299 Euro, but will be open pre-orders in Europe from 2/3.
