

# Huawei Pura 70 launched, powerful camera design

Huawei launched the P70 series with four versions: Pura 70, Pura 70 Pro and Pro+ and Pura 70 Ultra equipped with a different camera design and quickly attracted attention.

Huawei launched the P70 series with four versions: Pura 70, Pura 70 Pro and Pro+ and Pura 70 Ultra equipped with a different camera design and quickly attracted attention.

Set of 4 smartphones have a strange triangular camera cluster. Huawei equips the P70 series with the new Kirin 9010 processor designed by the company, which is said to have 8 cores with a main core of 2.3 GHz, three high-performance cores of 2.18 GHz and four energy-saving cores of 1.55 GHz. GHz.

The standard Pura 70 is only 157.6 mm long, Huawei's shortest smartphone in the past 3 years. The device's LTPO screen has a size of 6.6 inches with 2K resolution and 120 Hz refresh rate, 12 GB RAM and internal memory from 256 GB to 1TB.

The device's rear camera system includes a 50-megapixel main camera with the ability to change f/1.4-f/4.0 aperture, two ultra-wide and telephoto lenses with resolutions of 13 and 12 megapixels, respectively. The device's battery has a capacity of 4,900 mAh and supports 66 W fast charging and 50 W wireless charging.

The two versions of Pura 70 Pro and 70 Pro+ have identical designs, using the same 6.8-inch LTPO screen with 2K resolution and 120 Hz refresh rate. But Pura 70 Pro has 12GB RAM and Pro+ has 16GB RAM. In addition, the device also has a satellite messaging feature but only works in China.

The device has three rear cameras including a 50-megapixel main camera, a 48-megapixel telephoto lens and a 12.5-megapixel ultra-wide camera. The duo is equipped with a 5,050 mAh battery that supports 100 W fast

charging, 80 W wireless fast charging and 20 W reverse charging.

The Ultra version has the same design and configuration as the Pro+ version. The camera system of the device includes a 1-inch main camera sensor that can be retracted to change the physical aperture f/1.6 - 4.0, a 50-megapixel telephoto capable of macro photography allowing focus at a distance of 5 cm with super mode. 35x macro and 40-megapixel ultra-wide angle.

The camera's lens has been tested for durability about 300,000 times. Huawei also added the XD Motion feature to the camera to handle fast-moving objects. The battery of Pura 70 Ultra is 5,200 mAh.

The specific selling price of the P70 series is as follows:

1. Huawei Pura 70 is priced from 5,499 yuan (19.2 million VND)
2. Pura 70 Pro from 6,499 CNY (22.7 million VND)
3. Pura 70 Pro+ from 7,999 CNY (28 million VND)
4. Pura 70 Ultra from 9,999 CNY (35 million VND)

Pura 70 Pro and 70 Ultra went on sale from April 18 and were quickly sold out on Huawei's online store in just one minute. Two versions, standard and Pro+, will be available from April 22.
