

Hungry tiger risked his life and plundered the crocodile's bait, did the bloody end happen?

Tigers and alligators are the most dangerous carnivores in the natural world, each claiming a region and never invading each other's territory. Yet the tiger in the video below is too hungry despite the danger of invading crocodile territory. Does this overdose of this dose have to pay?

Tigers and alligators are the most dangerous carnivores in the natural world, each claiming a region and never invading each other's territory. Yet the tiger in the video below is too hungry despite the danger of invading crocodile territory. Does this "overdose" of this dose have to pay?

1. Ferocious jaguar "to eat" the underwater assassin crocodile
2. Report the skull-spotted bites, winning the crocodile network as fast as lightning

The tiger is a mammal of the cat family, the third largest animal in the carnivore, after the white bear and brown bear. Not only has the appearance big, but the tiger also possesses many scary weapons such as speed, biting force or strong strikes that can kill prey.

Tigers are capable of swimming quite well. Therefore, they not only hunt on land but also hunt underwater.

But the underwater hunt is completely different from the snatching of crocodile food, the marsh king is a completely different story. Crocodile has very strong jaw and sharp teeth. Despite their large bodies, they are very agile when under water.

How will the action of risking the looting of the crocodile of the tiger tiger be fruitful?

In the video, it seems that despite being in his own area, before the enemy is somewhat large, alligators still do not want to risk taking risks to attack. Not encountering the crocodile's pursuit, but the tiger is also very hard to pull the prey to the ground.
