

# Hunting promotion news to load scratch cards on iPhone in 4 steps

Normally, when the telecom network has a promotion promotion, there will be messages sent to subscribers who are using that network. However, maybe for some reason, your phone does not receive promotional messages, not just one but repeat many times. That would be very unfortunate.

Normally, when the telecom network has a promotion promotion, there will be messages sent to subscribers who are using that network. However, maybe for some reason, your phone does not receive promotional messages, not just one but repeat many times. That would be very unfortunate.

So today, TipsMake.com will share to you a small application that helps you "update" quickly believe promotion card on iPhone from the network. Please consult.

First, download and install **KM50** application on your iPhone.

## Step 1:

Open the **KM50** app, click **Install Widget**

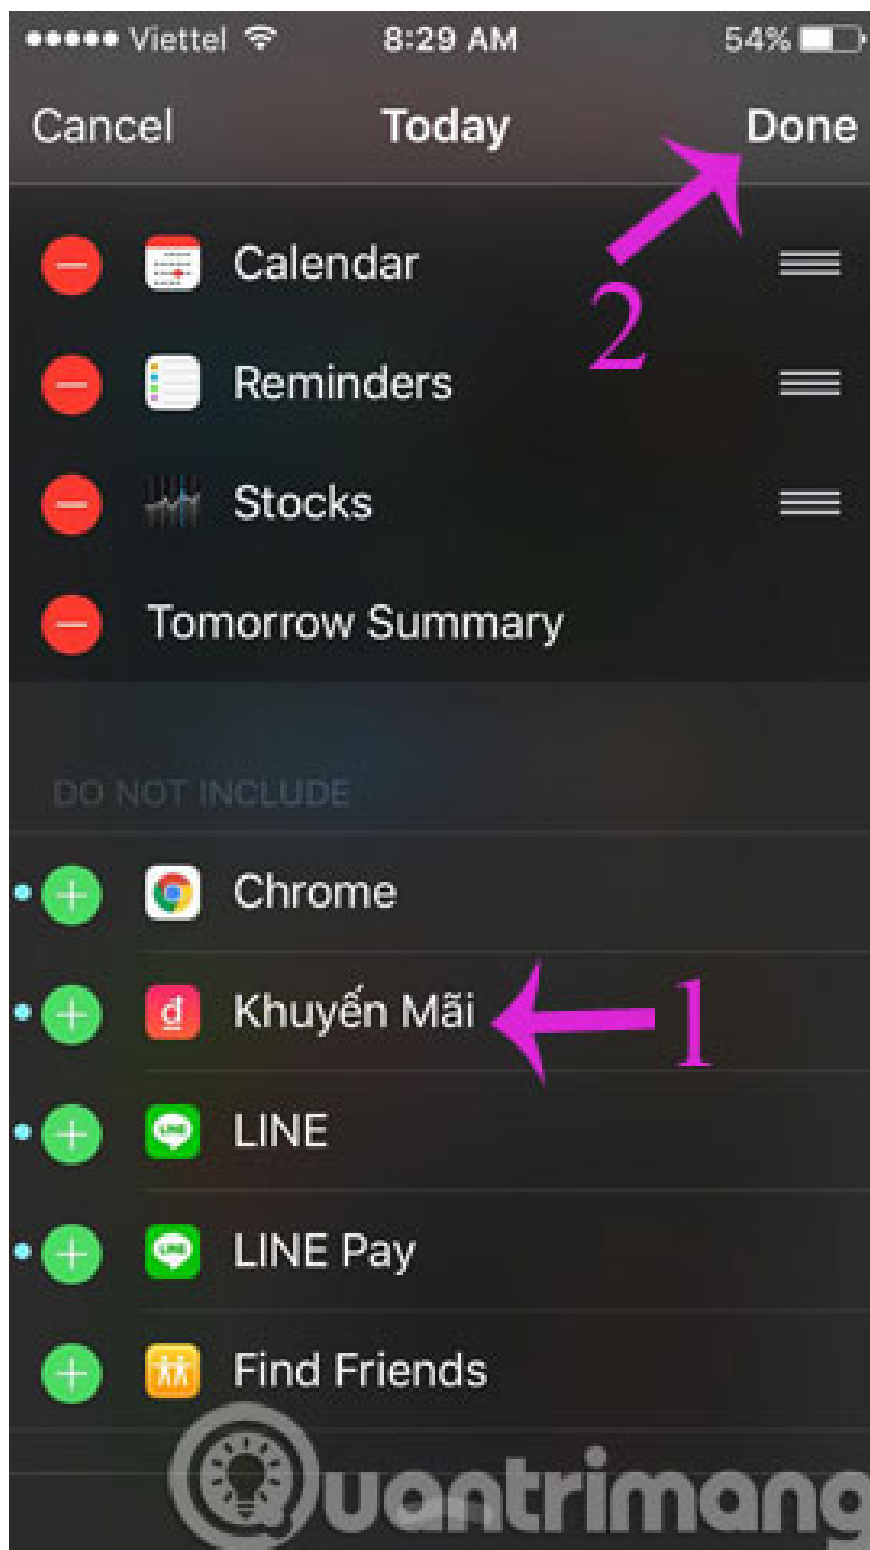

## Step 2:

In the **Instruction view** , set the **Widget** , swipe the top-down screen to drag down the notification bar, and then click **Edit**

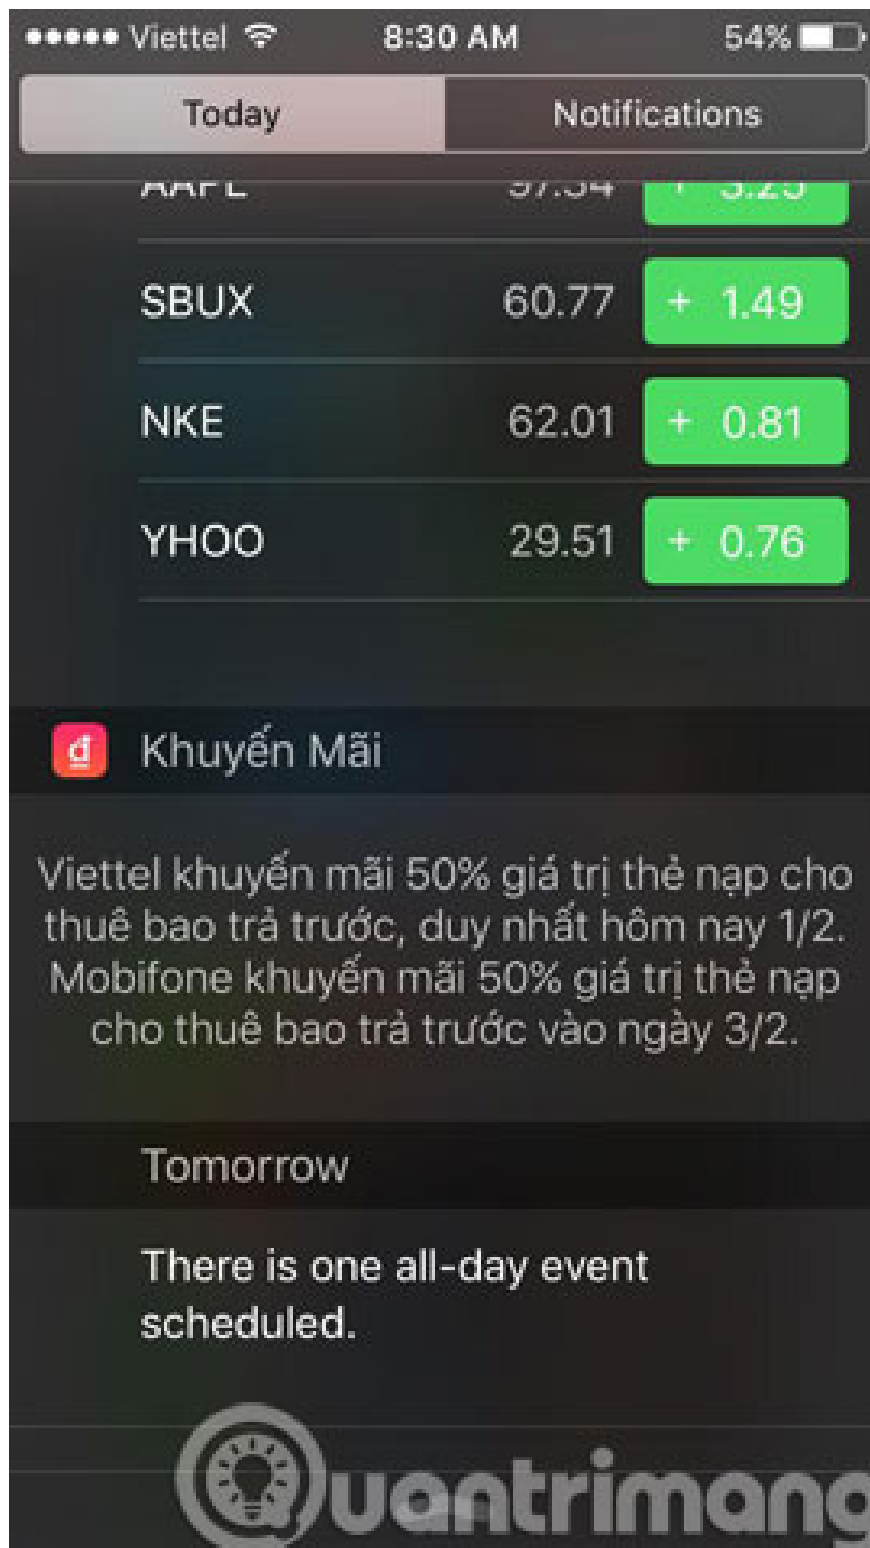

### Step 3:

Next, select the **Promotion** item and click **Done**

#### Step 4:

You wait a moment for the **Promotion** item to sync to the **Notice** . At that time, immediately there will be news of promotion to recharge cards from the network.

Thus, with only 4 simple steps above, from now on you have no worries about "missing out" any card promotion news.

1. Simple way to hide apps on iPhone screen
2. How to turn on virtual Home button on iPhone?
3. Instructions for backing up and restoring iPhone data with iTunes
