

I reclaimed luxury cars, did not lower the roof, but used shockproof umbrellas

People walking on the streets in China fell back when they saw an odd Porsche driver using umbrellas instead of lowering the roof.

1. Monkey mother ate the decaying young baby, strange behavior was first discovered in monkeys
2. Cloud like scary cannons appeared in the sky of Japan

People walking on the streets in China were stunned when they saw a Porsche driver using a umbrellas oddly instead of lowering the roof.

A video was shot by a tourist on Changzhou Road, showing that the Porsche was moving fast on the road under heavy rain but surprisingly, the group of people on this car huddled and covered it with umbrellas to avoid getting wet.

Because it is a luxury car, they can lower the roof but don't understand why the group of people on Porsche has such strange action.

However, at the end of the video, if you look carefully, you will see that there is a long metal rod resting on the roof system. And that may be the reason why they can't close the roof.
