

# If you suffer from the world's most poisonous spider, how will your body be destroyed?

The little spider has a name that evokes death. The black widow is listed as one of the 10 most terrifying animals in the world. Because they possess the amount of venom secreted in a single bite, it is 15 times stronger than the venom of a snake's tail.

The tiny spider whose name evokes the death of "Black Widow" is listed among the 10 most feared animals in the world. Because this species of spider possesses the amount of venom secreted in one bite, it is 15 times stronger than the venom of rattlesnake.

Even though the body is slightly smaller than a paperclip, only a bite can make the victim suffer after a few seconds of pain and accompanied by severe cramps, sweating, control, shortness of breath, heart failure. If you do not get emergency care in time, your life will be dangerous.

According to scientists, the black widow's venom is a mixture of many types of toxins, most of which are neurotoxic Alpha-Latrotoxin. This poisonous spider species lives all over the world. The black widow is a famous animal that is cruel, they eat mates after mating.

Check out the video below to see the dangers of black widow spider's venom against humans.

1. Terrifying spectacle: Giant spider cuts solid meat
2. Cold with the world's largest large spider, can "re-eat" the mouse in the blink of an eye
