

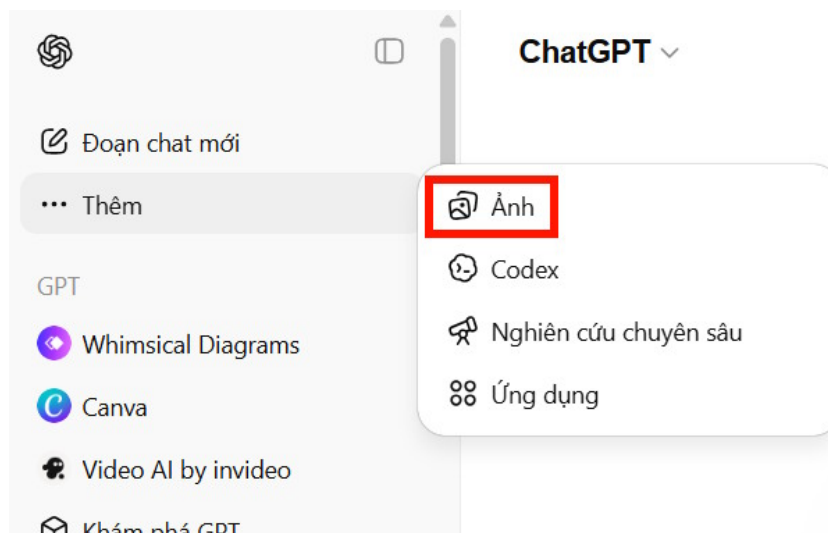

# Image library on ChatGPT: A complete guide on how to use the library.

All AI-generated images on ChatGPT are saved so users can view, download, or edit them anytime. Below is a guide on how to use the ChatGPT image library.

Like many others, ChatGPT has become one of the fastest and easiest AI image creation tools . All AI images created on ChatGPT are saved so users can view, download, or edit them anytime. Below is a guide on using the ChatGPT image library.

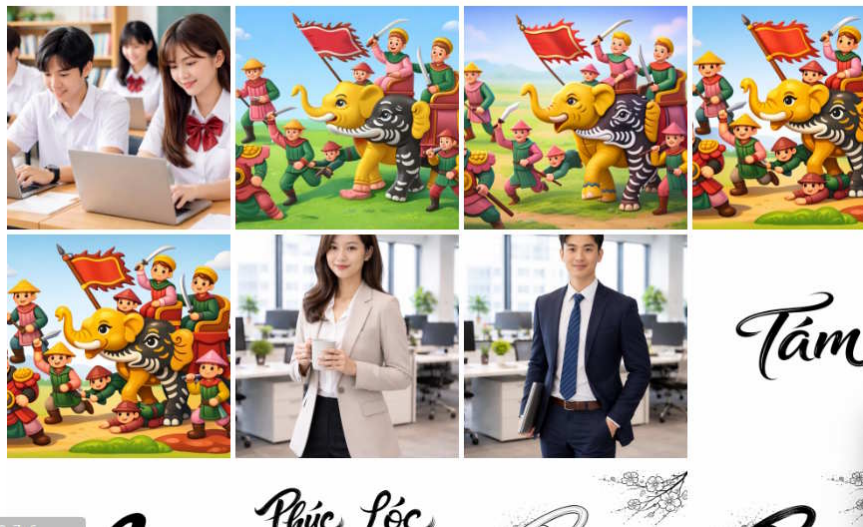

## Instructions for accessing the ChatGPT photo library.

First, access ChatGPT, then click on the **"Add" option** , and then select **"Image"** to make adjustments.

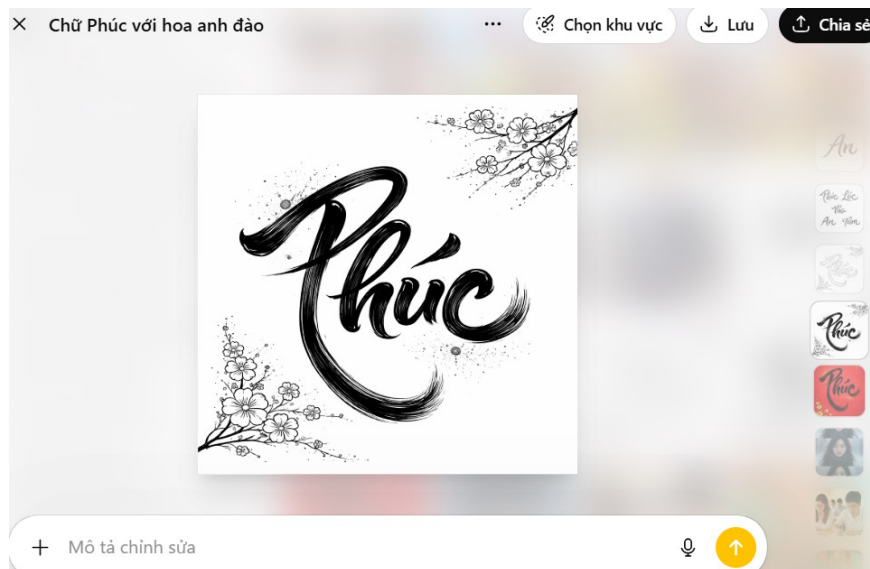

Now you will be taken to the AI image creation interface on ChatGPT. Scroll down to the **"My Images"** section , which displays your ChatGPT image library. The interface is designed intuitively, similar to the image library on a computer.

Hình ảnh của tôi

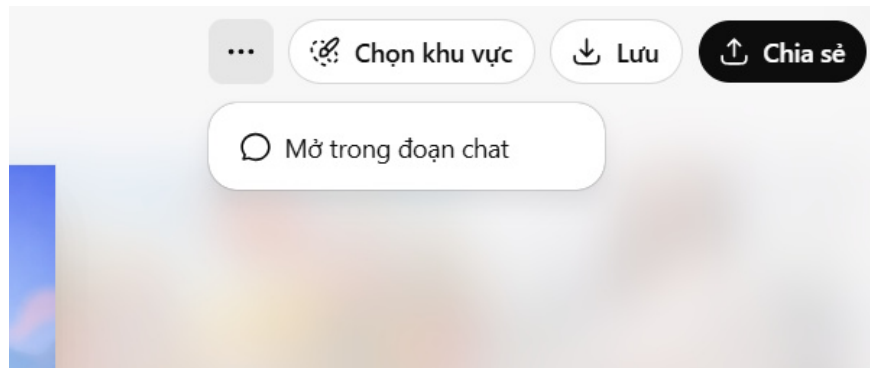

Click on an image and use your mouse to scroll up and down to quickly view the image.

## Managing images in the ChatGPT library

### Basic image processing operations

When you **tap on an image in the ChatGPT library**, options will appear in the upper right corner, including Select region, Save, Share image, and Open image in chat.

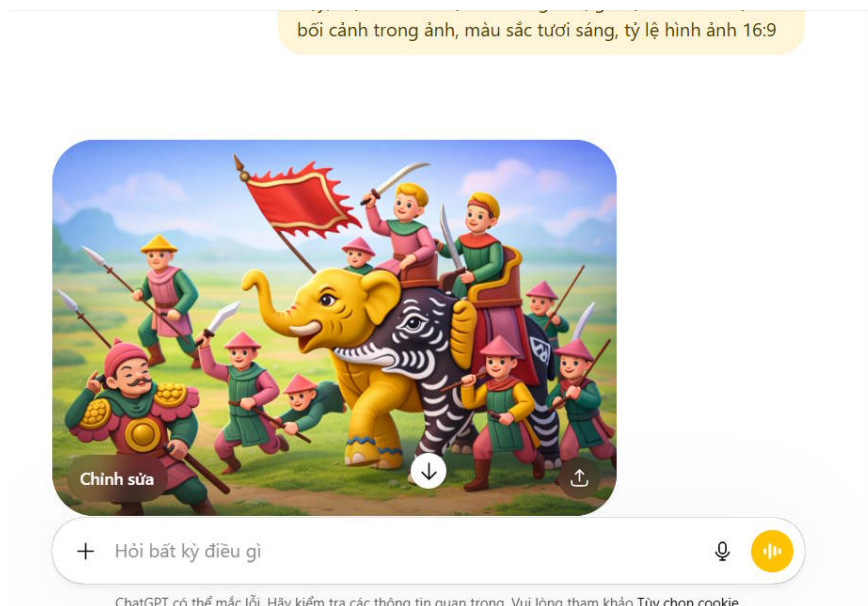

## Advanced photo editing on ChatGPT

### Use the edit prompt.

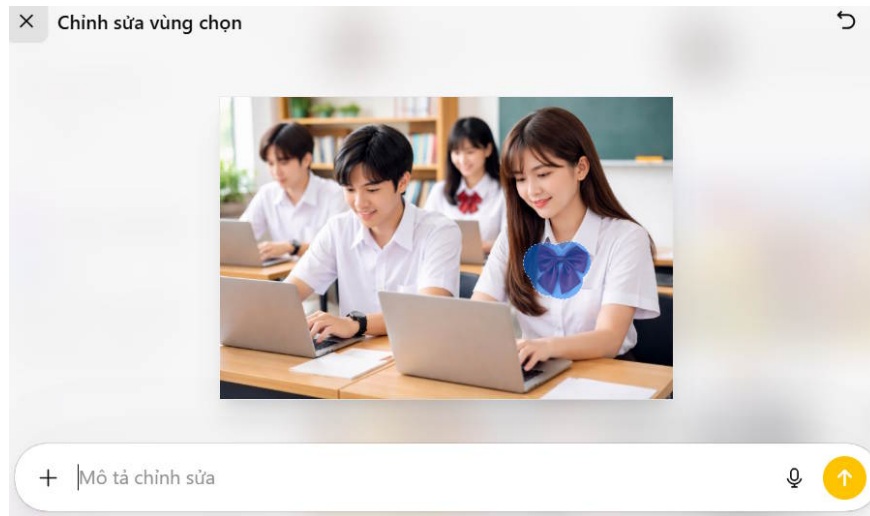

Tap on the image you want to edit , then tap the three-dot icon , and select "Open in chat ". Immediately afterwards, the chat containing the AI image creation feature on ChatGPT will appear.

Now you can continue by entering the AI image editing prompt with the pre-existing context.

### Use the area selection tool.

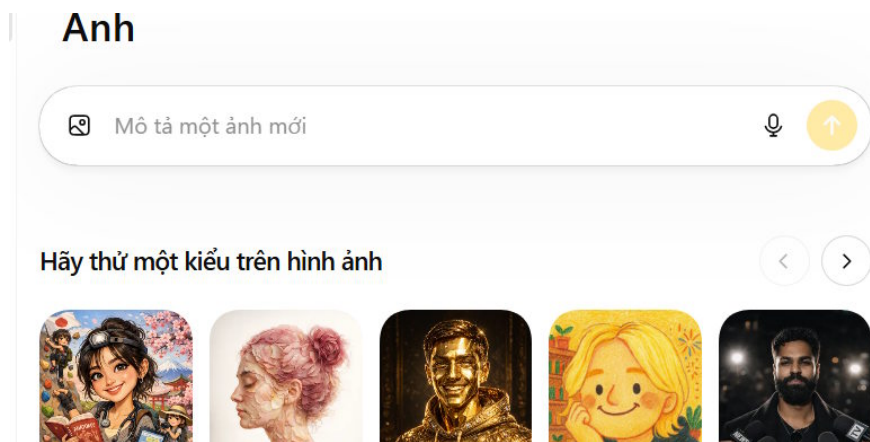

Click the "Select Area" tool when you click on the image you want to edit. A circle will appear to fill in the area you want to edit , then enter a description of the changes you want to make to the selected area. After that, the chat will create a new image.

## Manage your photo library on ChatGPT

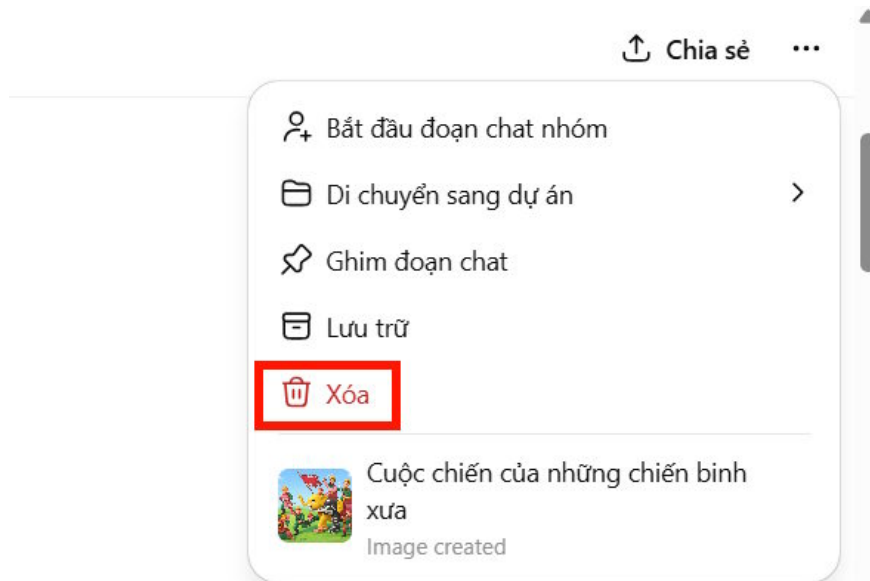

### Create a new image

You can quickly create new images directly from your library. The **"Images"** section at the top is the chat box where you can describe the new image you want to create on ChatGPT.

### Delete image

Currently, to delete an image from your ChatGPT library, you need to **delete the entire conversation that created the AI image**. **Open the conversation from the image** in your library, then in the chat, tap the **three-dot icon** in the upper right corner and **select Delete** to proceed.
