

Impressive 26 inch 'maximum' folding laptop screen

The laptop with the Prime name has a 13-inch main screen, but when it opens two wings, the user satisfies the game.

The Prime laptop has a 13-inch main screen, but when it opens two wings, users can play games or admire high-definition movies with a 26-inch "face" super.

Thanks to the unique design with two folding OLED displays, playing action games on laptops is no longer a problem for gamers.

Prime's laptop is covered with aluminum frame, feels solid and elegant. Prime has two CPUs, and 2 graphics cards with multiple vents to avoid overheating. However, the weight problem is probably the most worrisome thing for this laptop.

Currently Prime is just the concept computer of designer Kyle Cherry. Hopefully a day away will be the 'market item' of this unique laptop.

Not long ago, Chinese computer maker Lenovo introduced a computer with two screens - W700ds. And, the exclusive idea of ??Prime computers made the laptop market more exciting in the end of the year.

See 26 inch laptop screen folding:

Open 3 screens for a better experience with video games

The main screen is 13 inches wide

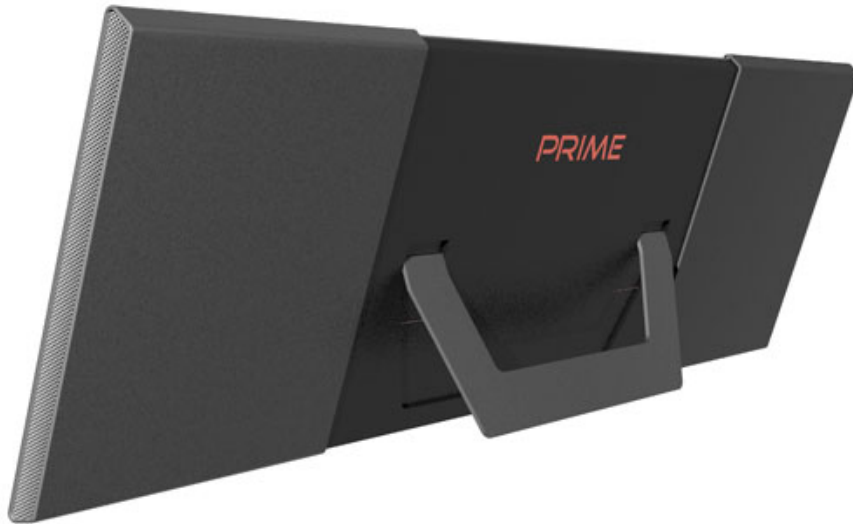

3 screens open in different directions

Fold with the keyboard

The design is still fragile

Behind the main screen is a stand
