

Improve the quality of 4K video recording on iPhone X 'substance' across DSLR cameras

iPhone X is one of Apple's latest smartphones capable of recording 4K videos at 60 frames per second. Even the 4K video quality on the iPhone X is rated as comparable to a DSLR. By supporting 4K 60fps video recording mode, users can now create sharper and sharper movies.

iPhone X is one of Apple's latest smartphones capable of recording 4K videos at 60 frames per second. Even the 4K video quality on the iPhone X is rated as comparable to a DSLR. By supporting 4K 60fps video recording mode, users can now create sharper and sharper movies.

Although integrated with this feature, Apple does not leave 4K mode in default. The article will show you how to adjust the 4K video resolution on the simplest iPhone X, anyone can do it.

1. How to shoot and edit slow motion videos on iPhone
2. Pocket some quality video recording tips on iPhone
3. How to change video resolution settings on iPhone

Instructions to improve the quality of 4K video recording on iPhone X

Step 1:

On iPhone X phone, go to *Settings (Settings)*.

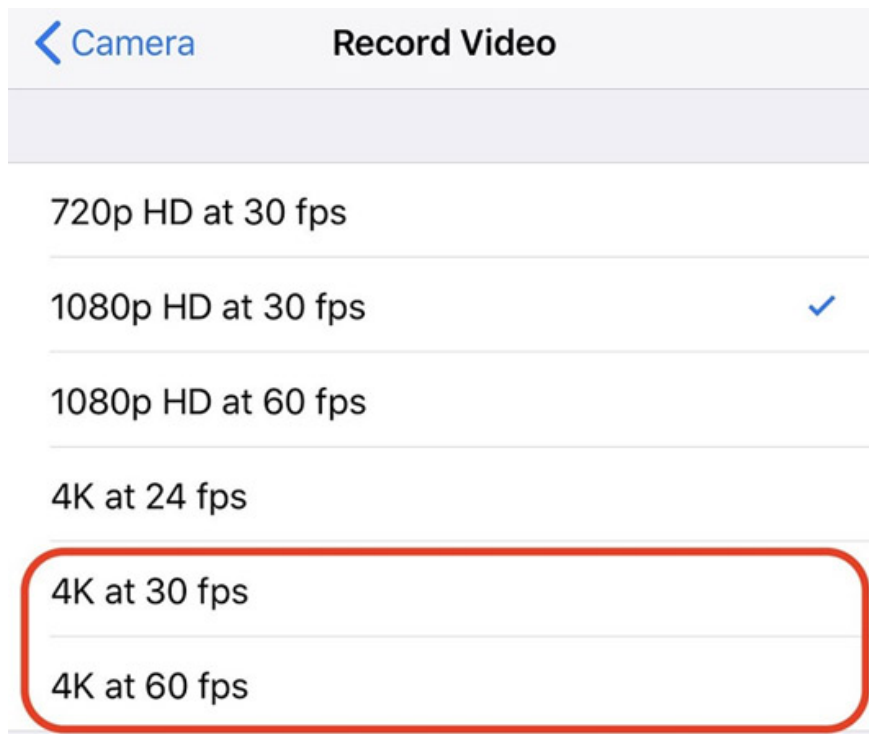

Step 2:

Search and select the *Camera* menu item .

Step 3:

Next, click *Record Video*. Here, there are 3 options corresponding to frames per second when shooting 4K Videos respectively: 24 fps, 30 fps and 60 fps. You can choose any option you want, but to get the perfect 4K video quality, you should choose 30 fps or 60 fps.

Step 4:

Complete the above step, please select the *back* button in the left corner of the iPhone X screen to return to the Camera menu in Settings.

Step 5:

Scroll to the *Formats* menu in the Camera option.

Step 6:

Select *High Efficiency*.

Note: This option will allow you to save 4K videos in H.265 codec format. However, the recording file will "consume" considerable amount of device memory, so consider this to suit your needs.

Above is how to improve 4K video quality on iPhone X. Hope this guide will help you add an effective iPhone tip. In addition, you can do the same to change the video quality on iPhone 8 and 8 Plus.

Good luck!
