

In 2020, which iPhone should I buy to fit my needs?

Apple currently sells 5 different sized iPhone models. To decide which iPhone model is right for you, please refer to the article below.

Apple currently sells 5 different sized iPhone models. To decide which iPhone model is right for you, please refer to the article below.

iPhone SE 2020 with a 4.7-inch screen (5.4 inches high and 2.65 inches wide) is Apple's smallest-sized iPhone model. This size allows users to easily hold it in the hand or pocket. iPhone SE 2020 starts at \$ 399.

The iPhone 11 Pro with a 5.8-inch screen (5.67 inches high and 2.81 inches wide) is the next smallest iPhone model. If you are looking for a smartphone with the latest features and advanced camera cluster but still compact, you can consider this iPhone model. iPhone 11 Pro starts at \$ 999.

iPhone XR has a 6.1-inch screen (5.94 inches high and 2.98 inches wide), this is Apple's "cheap" product line launched in 2018. This iPhone model is a good choice for those who want to have a big screen experience and have the need to buy products that are not too expensive. iPhone XR starts at \$ 599.

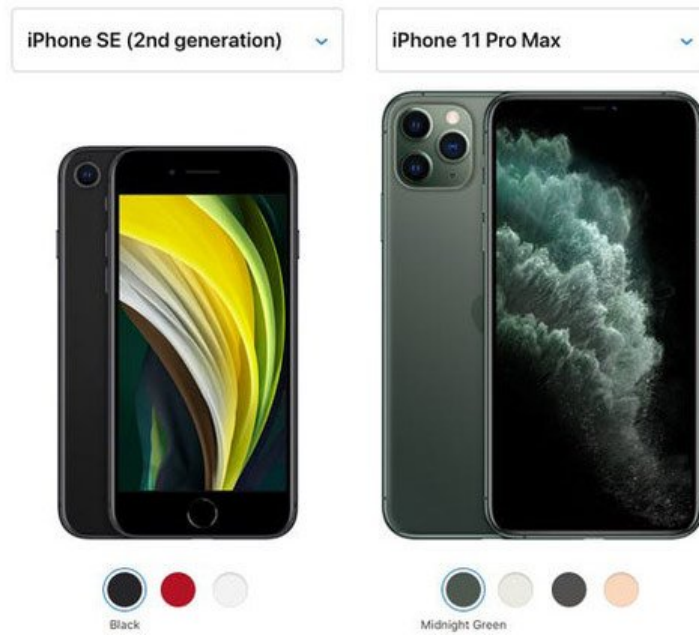

The iPhone 11, which also has a 6.1-inch screen, will be released in 2019. The iPhone 11 is a good choice for those who like an XR-sized product but want better specs and a camera. The selling price of iPhone 11 starts at \$ 699.

iPhone 11 Pro Max, with a 6.5-inch screen (6.22 inches high and 3.06 inches wide), is Apple's largest ever iPhone model. For those who prefer large screens, using phones primarily to take photos and watch videos, this iPhone model is the right choice. The iPhone 11 Pro Max starts at \$ 1,099.

Compare Apple's smallest and largest phones, iPhone SE 2020 and iPhone 11 Pro Max.

Compare the sizes of iPhone 11 Pro, iPhone 11 Pro Max and iPhone 11 models.
