

In the first quarter of 2013, the new Microsoft Office will come to enterprises

The new version of Microsoft Office for businesses will come to customers in the first quarter of 2013.

The new version of Microsoft Office for businesses will come to customers in the first quarter of 2013.

The new Microsoft Office suite includes Office 2013, Exchange Server 2013, Lync Server 2013, SharePoint Server 2013, Project 2013, and Visio 2013, enabling businesses to work optimally, effectively and efficiently with all services and devices. suffered.

New Microsoft Office effectively supports when interacting on the touch screen

Specifically, the new Microsoft Office supports working effectively with touch devices, stylus, mouse or keyboard. This version also brings the familiar Office interface to users on Windows 8 or Windows 7 operating system platforms.

The new Microsoft Office suite also offers real-time updates to social networks for users, from documents to conversations, bringing high-definition HD video conversations, sharing other document formats such as virtual notebooks and whiteboards (notebooks and virtual whiteboards).

Mr. Vu Minh Tri, General Director of Microsoft Vietnam said that the new Microsoft Office suite provides optimal security and management features, including preventing data loss, building pre-built software to prevent

malicious code and flexible deployment options for products right in the enterprise or in the cloud environment.

In addition, the new Microsoft Office allows users to store documents on SkyDrive, and as such, all settings, built-in panels and personal documents will follow users wherever they are, at home, office or on the move.

The new Microsoft Office has been tested in the market through the Customer Preview version in July 2012.

The sale of the new Microsoft Office at stores and online channels is expected to be implemented by Microsoft in the first quarter of 2013.
