

Increase the space on your browser's bookmark bar by saving only the website icon

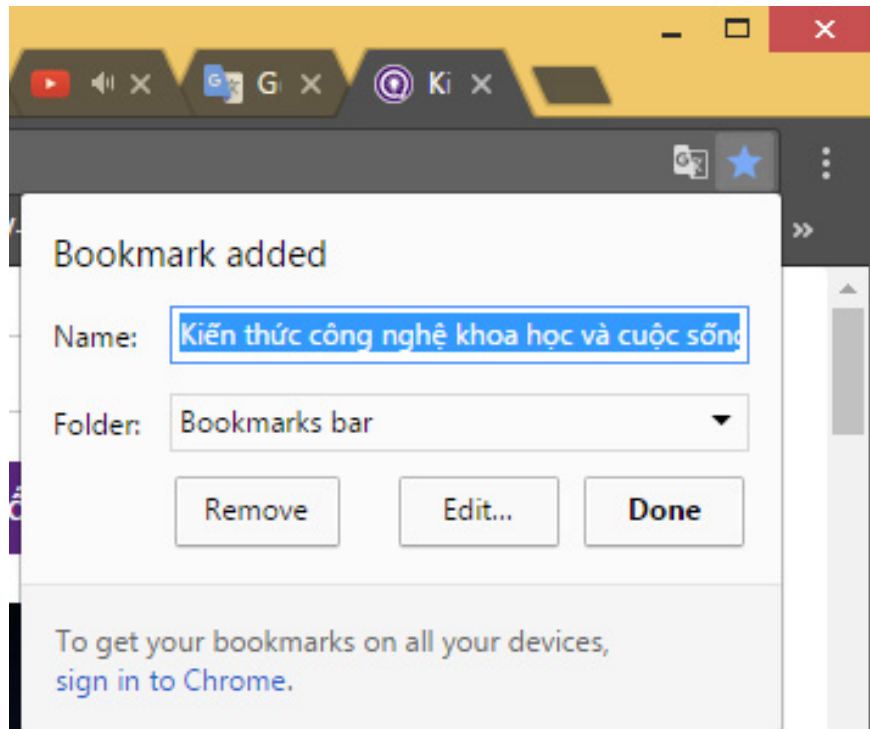

The trick that Network Administrator tells you below will help increase the bookmark bar space, save more web pages on browsers to get quick access to them. That is to create a website icon on the bookmark bar.

Are you complaining because your browser's bookmark bar is too small to accommodate everything you want to save? The trick that Network Administrator tells you below will help **increase the bookmark bar space** , save more web pages on browsers to get quick access to them. That is to create a website icon on the bookmark bar.

You know, every website uses a single favicon (the little icon you see in an open tab) comes with bookmarks. This is a normal bookmark bar without applying tips to increase the bookmarks bar space.

Did you notice when pressing **Ctrl + D** or clicking on the star icon on the address bar of Chrome browser, is there Name Name? **Delete the text** in Name and click **Done** , so you saved the web page with the bookmark icon.

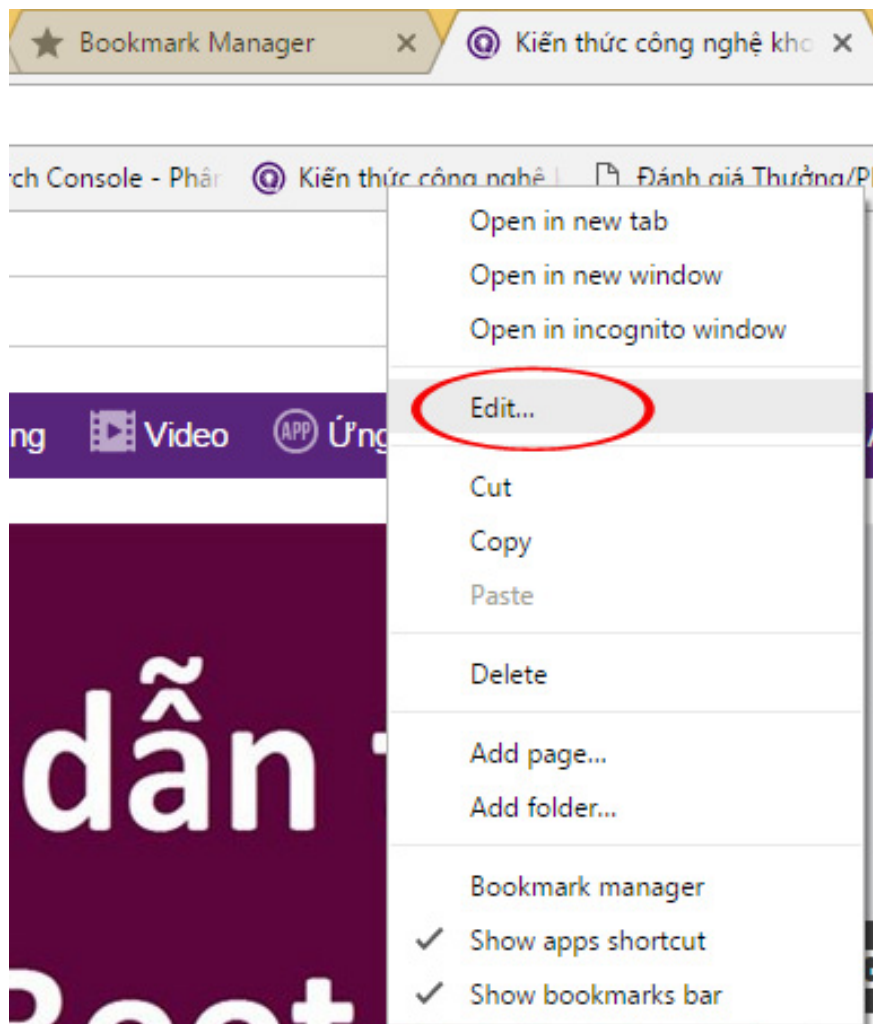

If you have already saved the web pages and now you want to edit the bookmark bar to save only the icon, how to do it?

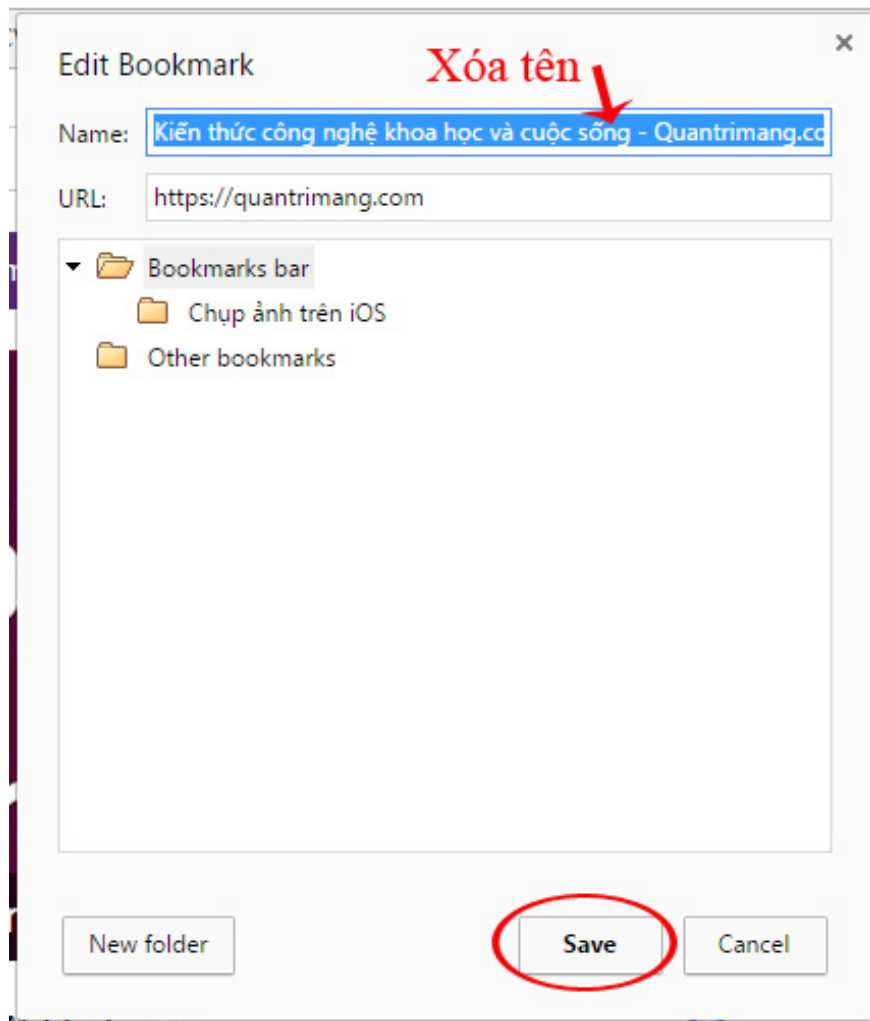

Chrome, Coc Coc and Opera:

1. How to save bookmarks on Google Chrome and Coc Coc to your computer

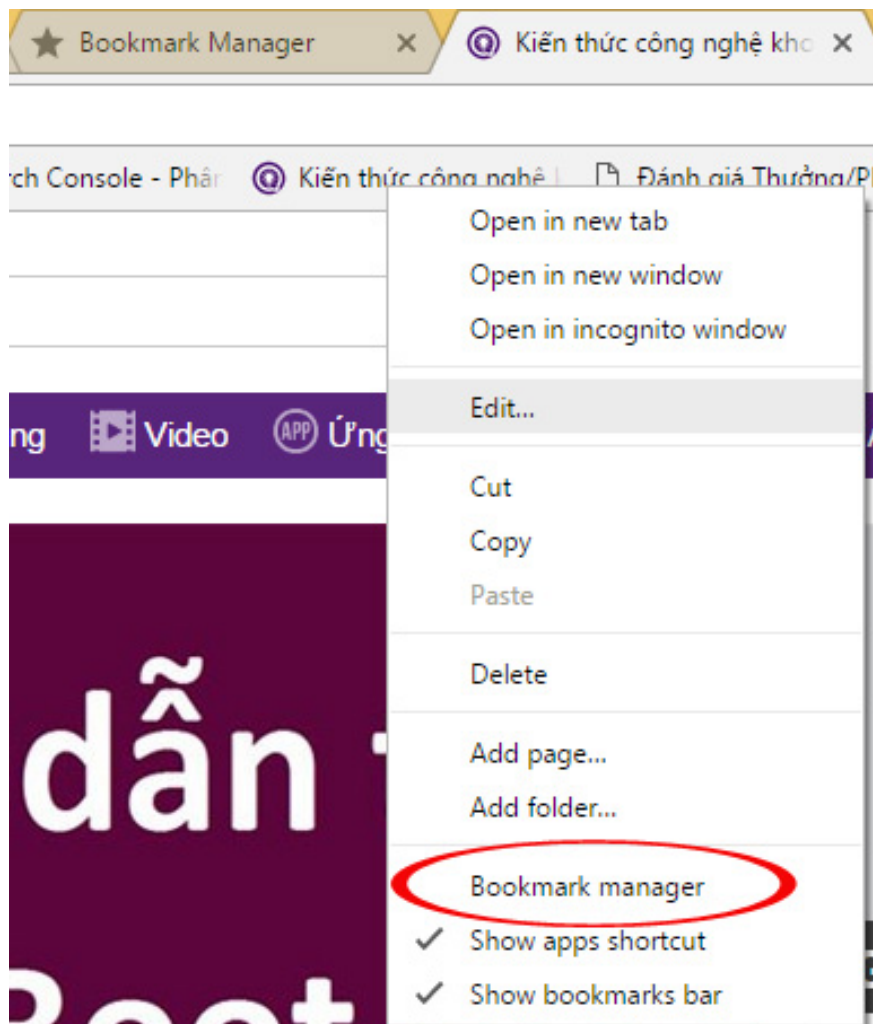

Right click on a bookmark in the toolbar, select **Edit** from the context menu that appears.

In the small window that opens, delete the text in the Name / Name section and click **Save** . Here, you can also move the website to the Bookmark bar or to another folder.

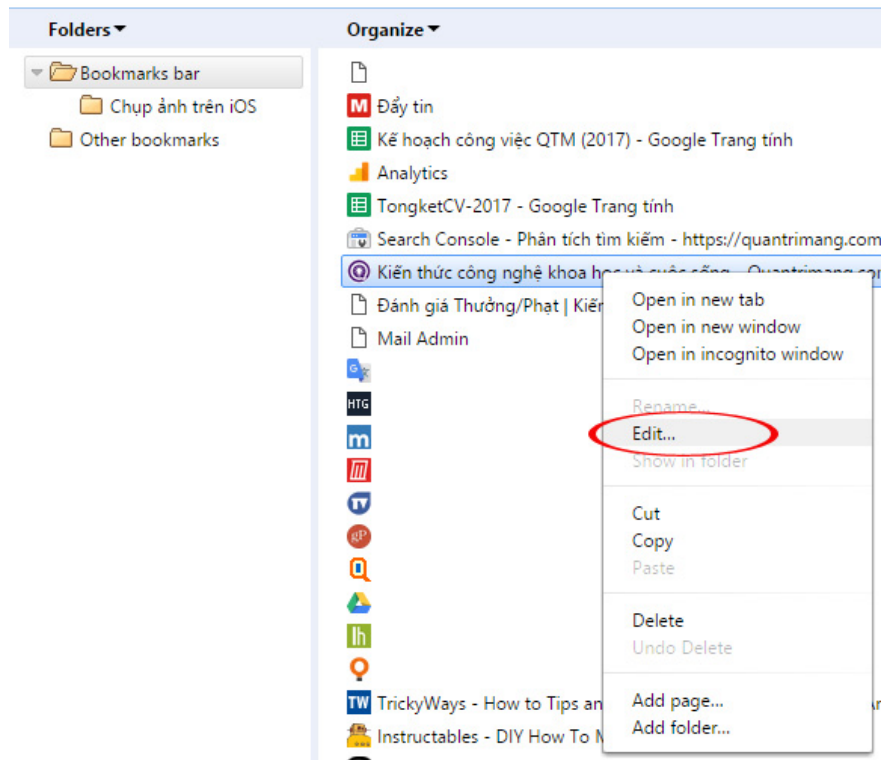

To edit multiple bookmarks at the same time, right-click a bookmark, select **Bookmark manager** / **Bookmark manager** .

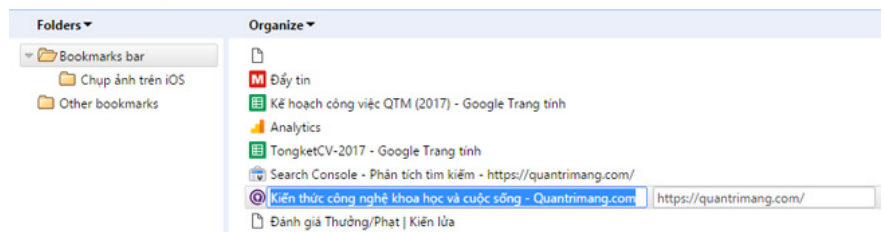

Next right-click on the bookmark to edit, select **Edit / Edit** , delete the name and you're done with the bookmark saving tip. Even with hundreds of bookmarks, it only takes a few minutes to fix it.

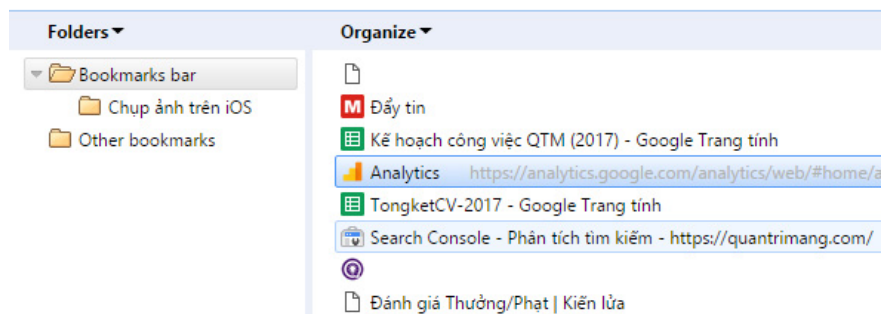

Bookmark Manager

Firefox:

Right-click on the bookmark, select Properties. In the properties window that opens, delete the text below Name / Name and click **Save / Save** to finish.

1. How to sync bookmarks between Chrome and Firefox?

Microsoft Edge:

Click the **Hub** icon on the Edge (3 horizontal lines), click the star icon to view your favorites, then click the **Settings** link at the top right. In the control panel that opens, turn **on the Show only icons on the favorites bar option** .

Internet Explorer:

Right-click on any bookmark in the **Favorites** bar, select **Customize tile widths> Icons only** .

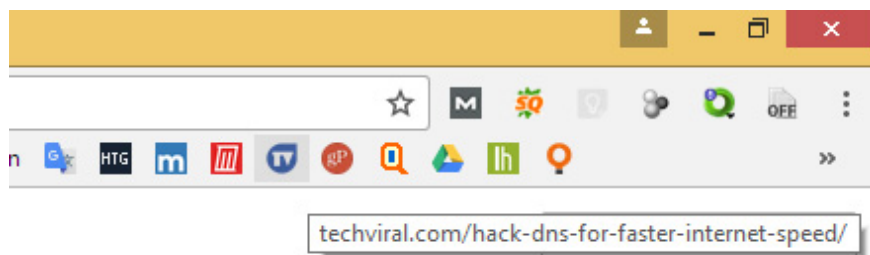

1. Import Bookmarks from another browser into Microsoft Edge

When just using the icon is still not enough?

This bookmark saving tip is really just a good idea for your bookmark bar. These are the websites you often have to visit every day. The space on the bookmarks bar is limited, so you should optimize the things saved on it.

If you need to organize bookmarks better, create folders, subdirectories and save web pages on it.

If you are not familiar with the site's favicon, please keep its name. In case you forget what the web page is, just clicking on its icon will display the website address and you will remember what the site is.

Hopefully the tip to save this bookmark will save you some precious time with your taskbar.
