

Information about PUBG Mobile Payload Mode

Summary of Payload Mode information in PUBG Mobile, including new items and new media that will appear in this mode.

Before starting to update gamers a new game mode, PUBG Mobile always has suggestions in previous versions. Perhaps based on leaked information from previous versions of PUBG Mobile also helps gamers predict that there will be a new special mode that will appear in PUBG Mobile Season 9.

Perhaps gamers also know in PUBG Mobile 0.14.0, Tencent has added a series of its helicopter models to the maps. And of course they don't just add in the reason of decoration.

These helicopter models will soon be hovering in Payload Mode in Arcade Mode. According to some information, in Payload Mode, gamers can find special boxes, they are located on the ground and if you want to open, the player needs to meet certain conditions.

Players can identify these bins easily by the halo it emits. Open up you will see some very heavy weapons such as RPG, Minigun and even grenade launchers, especially can have a heat gun to fire helicopters.

In fact, this style of play has appeared on the Chinese PUBG Mobile beta. The helicopters in it can be used as normal means of transportation.

You can change the position of sitting in the plane, in addition to the fuel needed for this helicopter will also more than other vehicles. The speed of these aircraft is very fast and very suitable for running bo. In return, they will be very easy to be shot down, especially with surface-to-air missiles may also appear in this mode.
