

# Information about three new Zombie types in Infection PUBG Mobile mode

Here are some information on how to play and skills of both Zombie and Human in Infection mode PUBG Mobile

The PUBG Mobile 0.14 version has been officially updated with the new Infection Zombie mode, which comes with lots of interesting content such as the character Victor possesses the SMG quick reload skill, although it is only valid in Infinity mode.

An interesting thing is that the Raw Expansion Pack helps to reduce the content of unused players and helps to lighten the machine. Pirate theme with very interesting treasures . But the main problem is the new Infection Zombie mode.

And gamers have seen the appearance of 3 new Zombie types with a strong warrior named Vanquishers, so these new characters have something special, let's find out under this article.

## Information about 3 new Zombie types in Infection PUBG Mobile mode

Specifically, we will have Speed, Stealth and King in this Infection mode. PUBG Mobile will divide 12 players into two Zombie and Human factions (Defenders), the server will pick up 3 random players to make zombies.

By default, the selected or attacked from another zombie will turn into Speed ??Zombie, and after being destroyed by Defenders, it will be revived. At that time, new players can choose to be Speed ??Zombie or Stealth Zombie, and if they are defeated by Vanquishers, they cannot be revived.

As for Zombie King, this zombie type only appears when Speed ??Zombie or Stealth Zombie can kill 3 other players, or when you get a Booster. You can call Zombie King as the highest level evolution of the other two Zombie types.

## 1. Speed ??Zombie

This is the default zombie type in the game, with a fast moving body. Attack the player with a "slap" and skill to speed up movement. Speed ??Zombie's blood is not too much so it is not too difficult for you to destroy them quickly if gathered.

## 2. Stealth Zombie

There is no agility move like Speed ??Zombie but Stealth Zombie has stealth / cloak skill. Very convenient for ambush or sneak attack when the enemy does not notice.

Even though it is invisible, you can still see the Stealth Zombie, so defending in any position has only one attack.

### 3. Zombie King

A zombie with the largest amount of blood, and also has defensive skills for yourself and nearby zombies. But the big shape plus the rather slow work makes Zombie King very vulnerable.

As for the Human faction, the warriors will be divided into two types: Defenders and Vanquishers. The **Defenders** will use two rifles as M416 and AKM available when entering the game with the number of bullets of 660,

And the **Vanquishers** only appear when the Defenders are left with only three people, and the three survivors will turn into Vanquishers. This character will use the code to damage the Zombie and also have wide cutting skills that make zombies lose a lot of blood.

For those who have ever played through shooter titles such as Counter Strike Online or Raid, Counter-Strike, it is not strange to join PUBG Mobile's Infection mode. There should be tips you can use from the above games in Infection PUBG Mobile mode.
