

# These innovative inventions are incredibly useful in everyday life.

Simple inventions can sometimes be surprisingly useful. Below are some clever inventions that are extremely helpful in everyday life.

**Simple inventions** can sometimes be surprisingly useful. Below are **some clever inventions** that are extremely helpful in everyday life.

Technology is developing at an unstoppable pace in the modern world. Sometimes, it feels like every day brings new technologies and innovations that will change the future forever. But in a constant stream of announcements about major future technological upgrades and amazing conveniences, it's easy to forget the wonderful ways the world is progressing for the better.

For example, there are artificial intelligence programs that can write poetry and create images from pre-existing prompts. There are 3D-printed eyes, new holographic images, lab-grown food, and brain-reading robots... These are truly useful for human life.

Inventing a useful product or process is serious work—turning a great idea into a marketable product, and you can make millions of dollars. But that doesn't mean your product has to be rigid and conservative; hundreds of seemingly quirky or funny products have become huge hits for their inventors because they were so well-received by consumers.

In this article, we'll see images of many seemingly simple inventions that have changed the world. They are unique in their own way, sometimes making us laugh. However, they all have had a significant impact on how we live and work in the modern world. Let's admire these fascinating inventions below!

## 1. Alarm clock mat

© architecturendesign.net

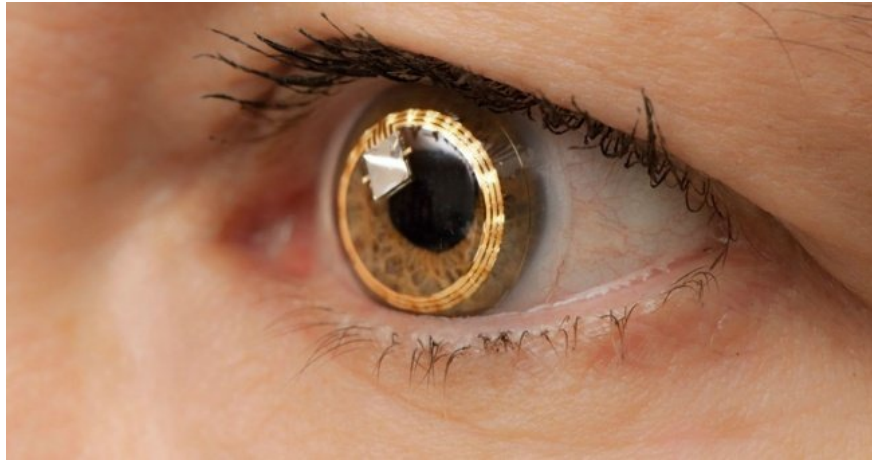

This alarm clock is special because it only turns off when you stand on it.

## 2. A "machine" that sprays clean the fruit.

#### **5. Solar-powered sun lounger**

© arts.mit.edu

You can lie down and read a book or newspaper, and also sunbathe during the day to boost your bone vitamin D levels.

## 6. The convenient bed

© facebook.com/CuddleMattress

Couples will surely love this bed, because it allows you to lie close together, cuddle with your significant other, and enjoy a good, warm sleep without worrying about numb arms.

## 7. Nail polish bottle holder

© pinterest.com

For those who are passionate about beauty, especially *nail art* , this product is fantastic. It helps you keep your nail polish bottle organized, so you no longer need to use one hand to paint your nails while tilting the bottle to get more polish.

## 8. Spiral cucumber slicer

© amazon.com

## 9. A bedside table with a food tray.

© hiperoriginal.com

This table seems most convenient for those who are too lazy to get out of bed to eat, right?

## 10. Shoe drying net for washing machine

© architecturendesign.net

Sometimes, when I'm too lazy to wash my shoes, I put them in the washing machine, but if I didn't use a mesh bag like that, the shoes would probably be ruined after just one wash.

## 11. Exercise chair

© pinterest.com ©

Combining work and exercise will be extremely beneficial for those who have to work long hours in front of a computer.

## **12. Using a paint roller is easier when working at a height.**

© architecturendesign.net

Painting walls can be more difficult when working at a height, but this tool will help you overcome that.

## **13. Jelly wipes**

© facebook.com

Computer keyboards and the crevices of electronic devices can be difficult to clean, but with this gel-based cleaning cloth, it will be much easier.

#### 14. The battery can be charged via USB port.

© amazon.com

If you had this type of battery, you wouldn't need to rush to the grocery store or convenience store every time your battery ran out; you could just plug it into your laptop.

### **15. Knife for cutting cold butter**

### **16. Small-wheeled motorcycles can "transform" into suitcases.**

**17. A cyclist's backpack with a safety screen on it.**

© the-clu.com

## 18. Solar power socket

© behance.net

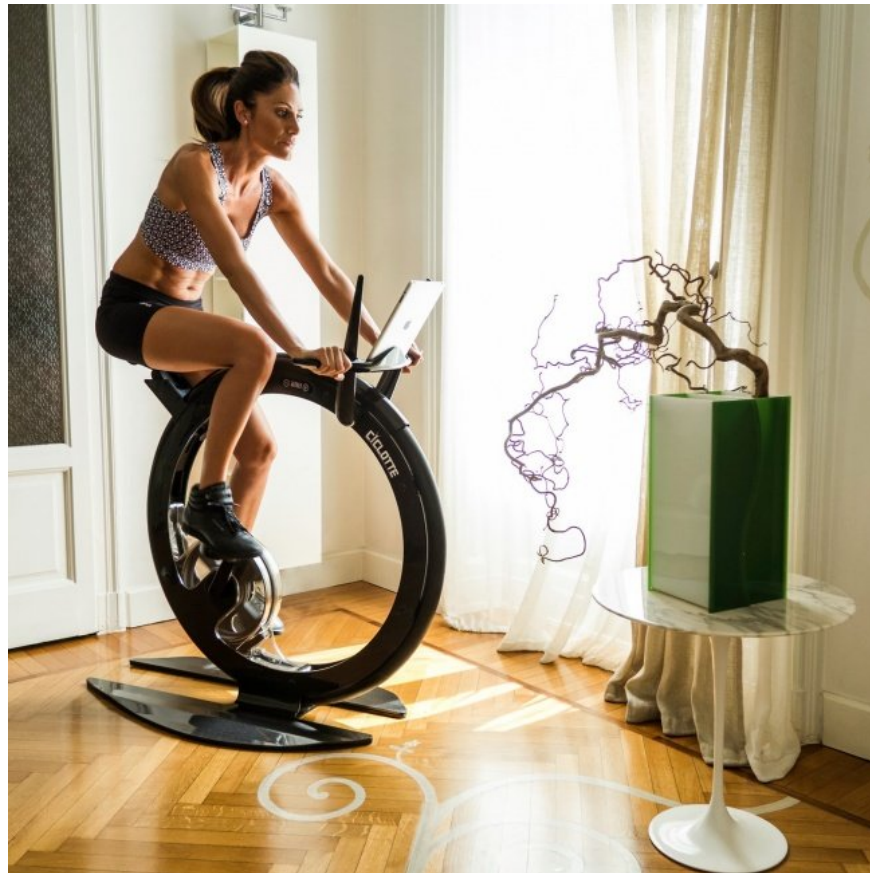

With this power outlet, you no longer have to worry about your phone running out of battery when you don't have a power bank with you, especially since when it runs out of power, you can just put it in the sunlight and use it again.

### **19. A great design idea for a small apartment.**

© architecturendesign.net

## 20. Exercise bikes for the future

© architecturendesign.net

This exercise machine is compact, easy to use for fitness training, and even has a place to put your laptop for work or relaxation!

## 21. Spiral pineapple slicer

**22. USB shows how much free space is left.**

**23. Double-edged pizza cutter**

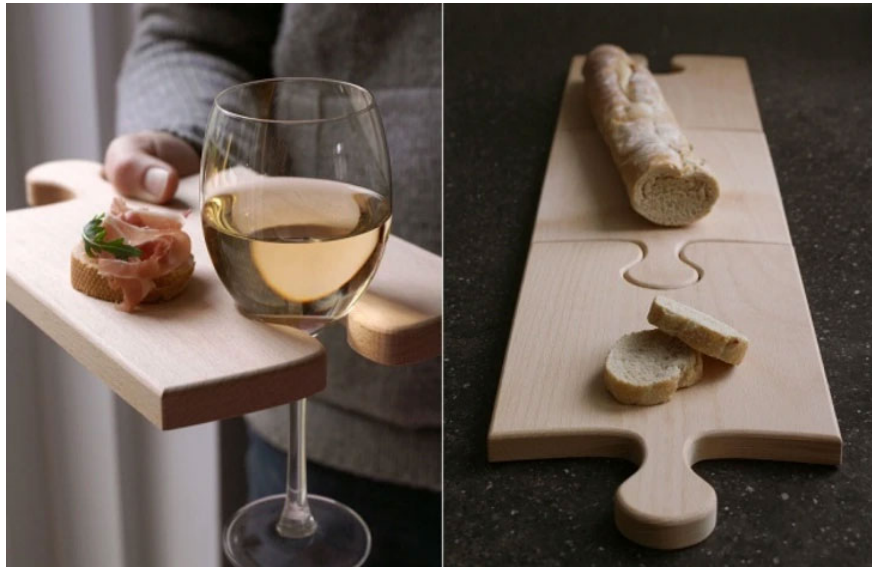

**24. Slippers with LED lights**

**25. Bicycle that doubles as a stroller**

**26. Jigsaw puzzle feeding tray**

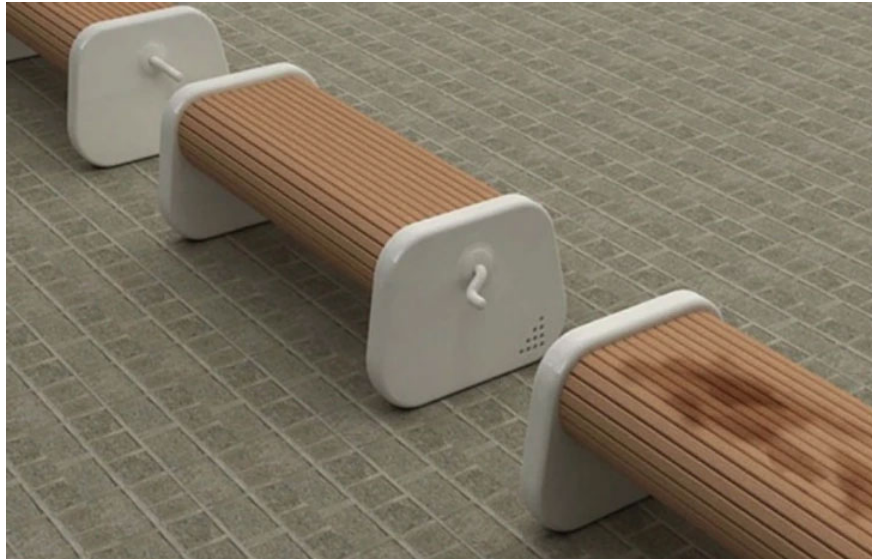

**27. The water cup can prevent any spills from falling onto the table.**

**28. The flower pot never tips over.**

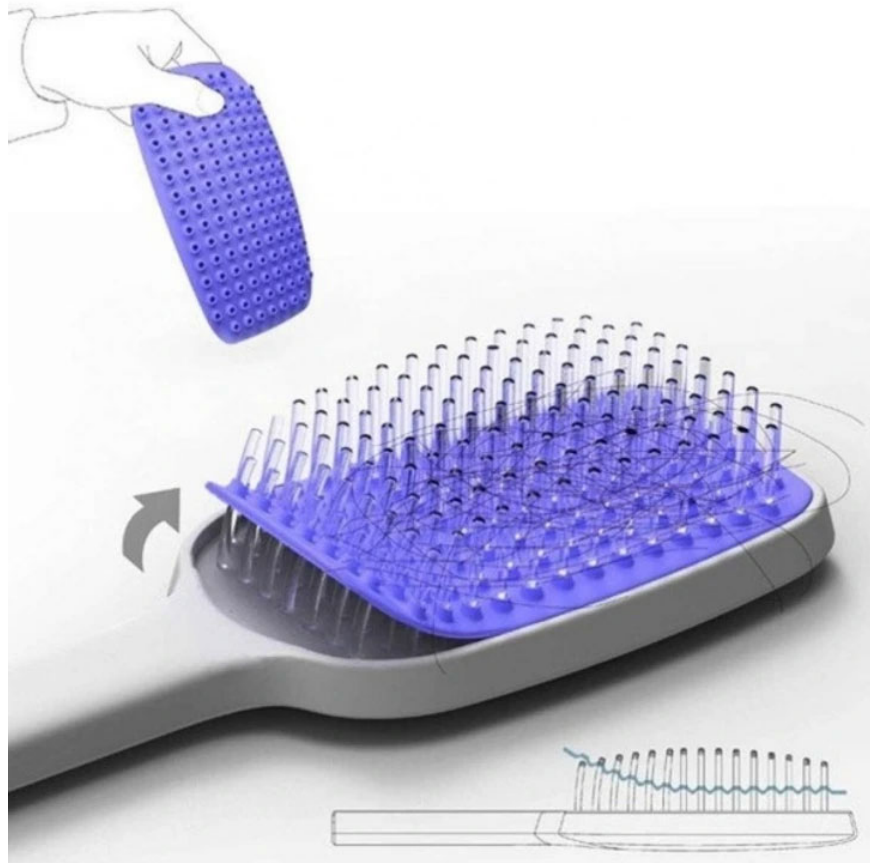

**29. The public bench is always dry.**

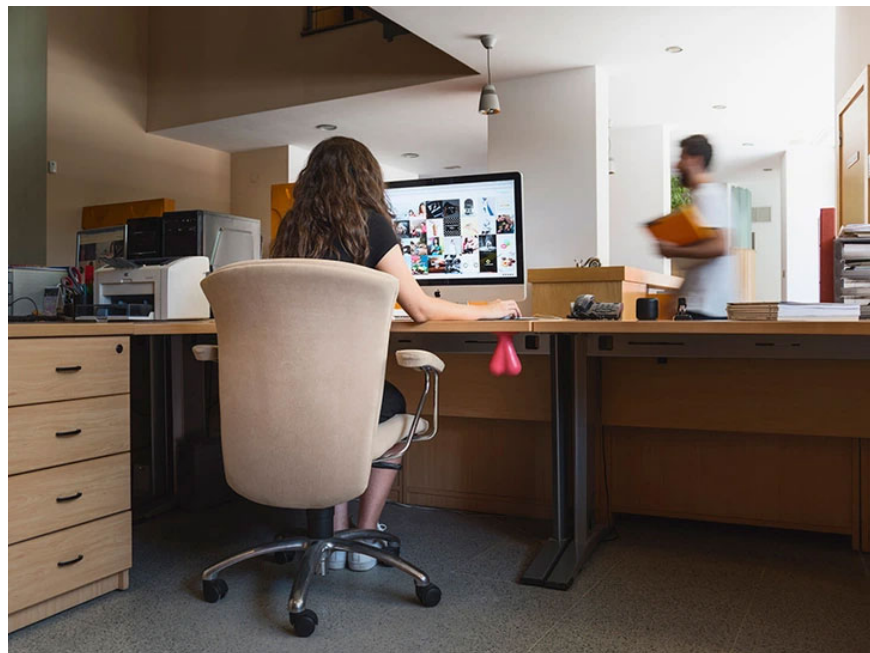

**30. Phone charger powered by beverages.**

**31. Hairbrushes can clean hair super fast.**

**32. Stress relief ball**

**33. Cutting board with built-in scale**

**34. Food storage container with timer.**

**35. Keyboard for smartphones**

**36. Candles can be reused many times.**

**37. Toilets with unique designs.**

Have fun everyone!
