How to insert logos into videos and slideshows on Proshow Producer

We can insert logos into slideshows and videos, but the video must be video created from Proshow Producer software. As for other external videos, it cannot be uploaded on the software.

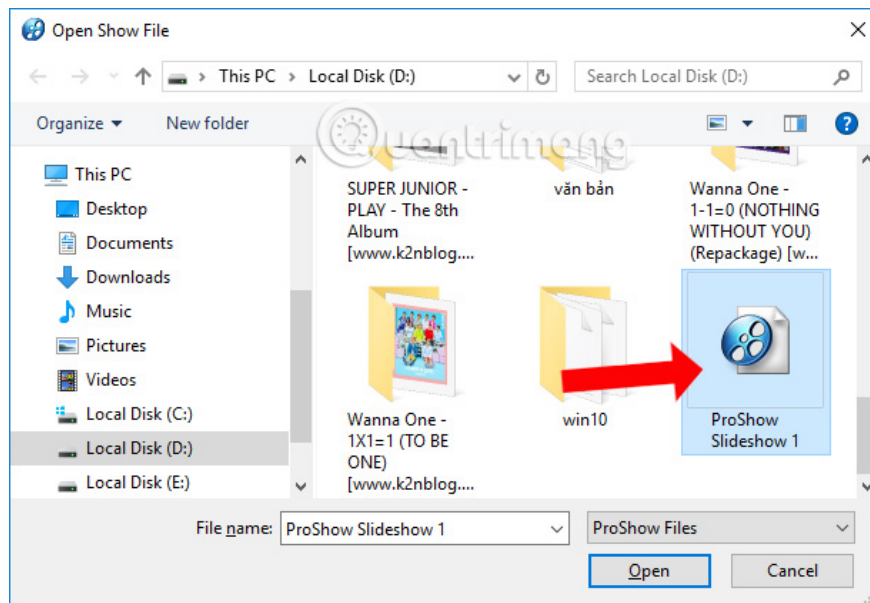

Step 1:

First, click on **the File item** then select **Open** (or Ctrl + O key) to open the slideshow or video file on Proshow Producer.

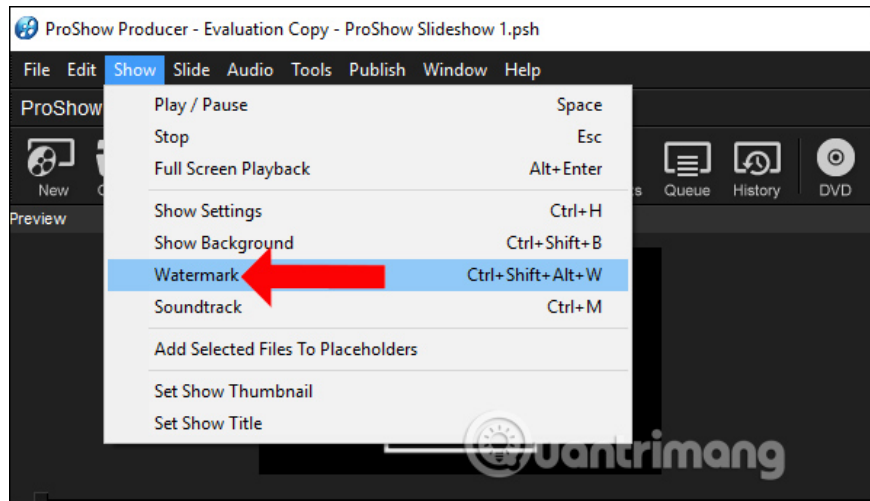

Step 2:

Click on the slideshow file, the video has been done on the previous software, then click **Open** to open the file.

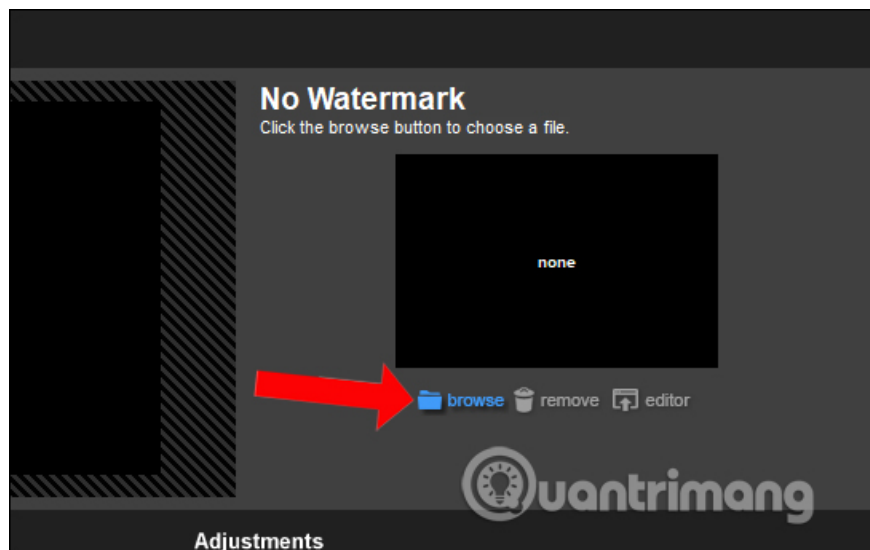

Step 3:

Next click on **Show** and then select the **Watermark** feature (or press Ctrl + Shift + Alt + W). Note, when choosing an image as a logo, choose **the png format logo** .

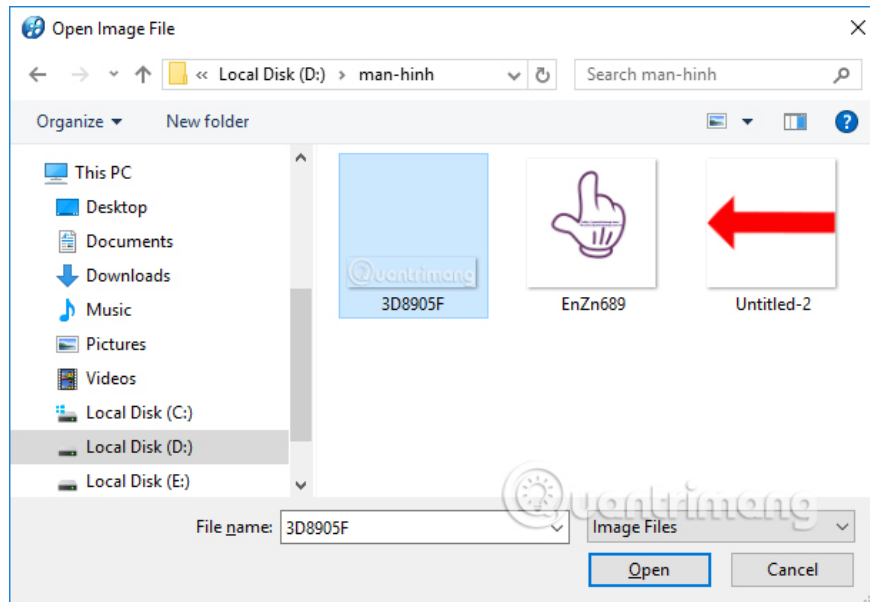

Step 4:

In the interface click on **Browse** to select the image you want to create the logo for the video.

Click on the logo and select Open to open the logo on Proshow Producer.

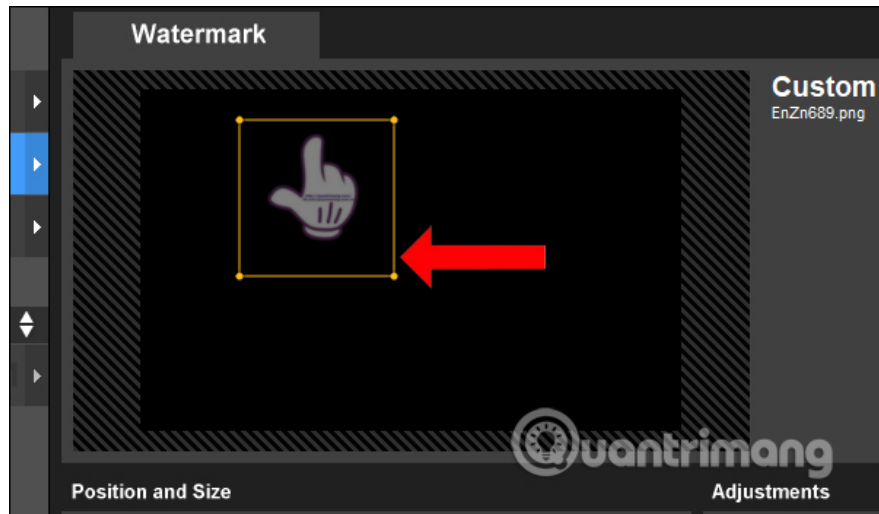

Step 5:

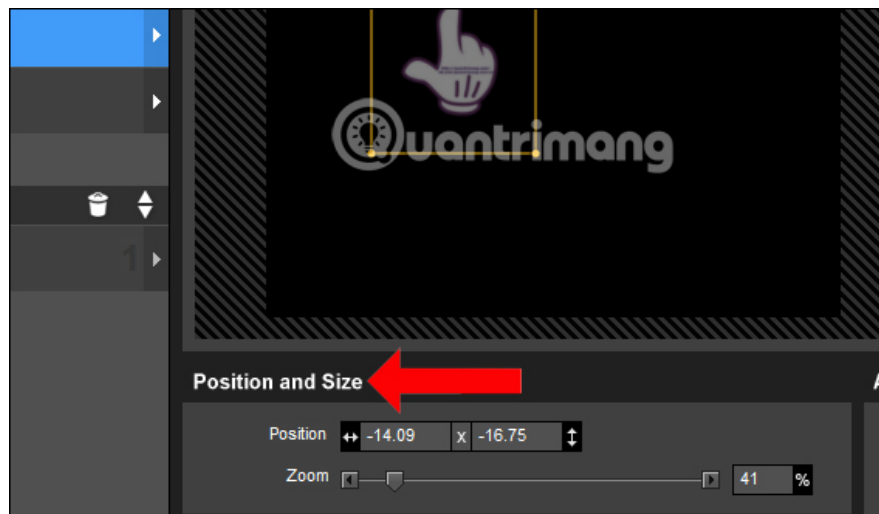

The logo will be displayed in the Watermark frame. Here you can change the position or size of the logo. To **change the position**, hover over the image when **the hand icon appears**, then press and hold the left mouse button and move the image to the new location.

To **resize**, hover your mouse on one of the four corners of the image, left-click and hold and drag as you want to resize it.

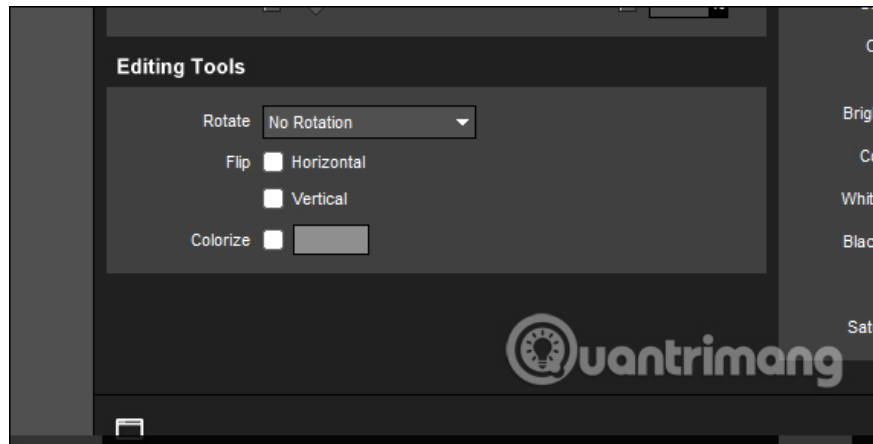

In addition, users can use precise adjustment parameters at Position (change position) and Zoom (large - zoom room) in the **Position and size** .

Step 6:

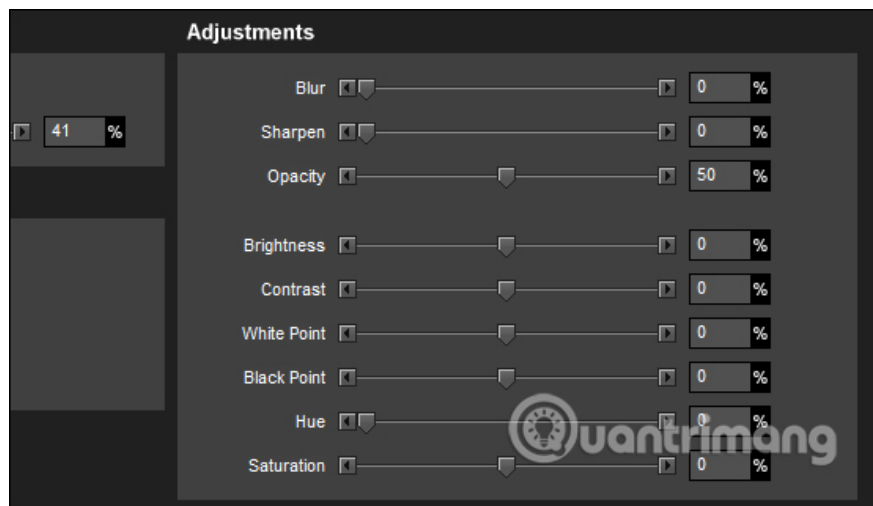

At **Editing Tools** , users will have some editing tools for other videos, such as:

1. Rotate: Rotate the image (rotate according to the angle of how many degrees).
2. Flip - Horizontal: Flip the image 180 degrees horizontally.
3. Flip - Vertical: Flip the 180 image vertically.
4. Colorize: Coloring photos.

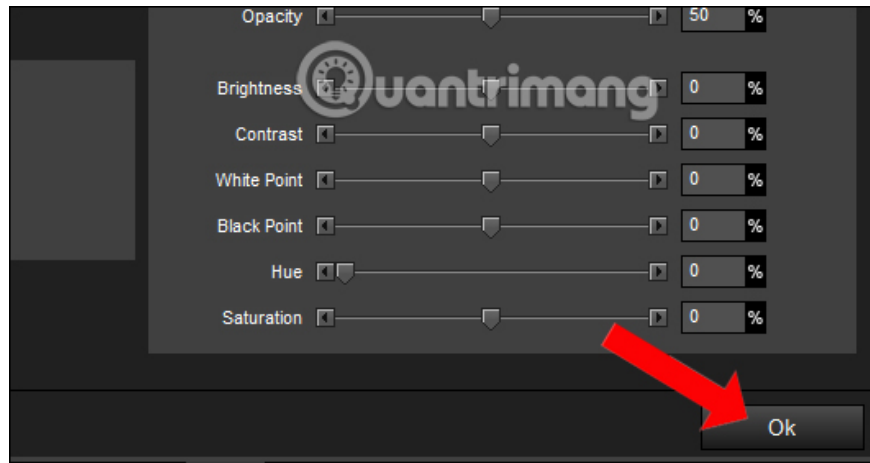

Step 7:

When looking at **the Adjustments section**, you will have more options to create effects for the logo inserted into the video.

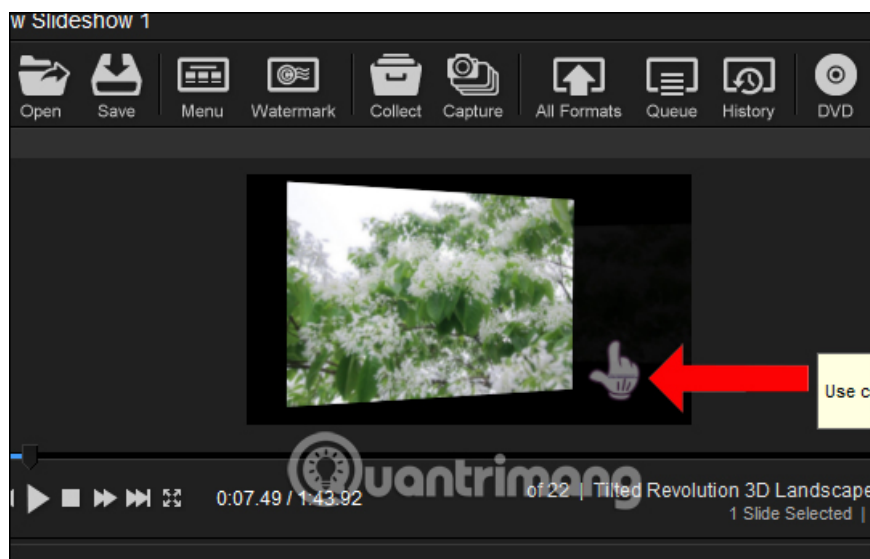

Step 8:

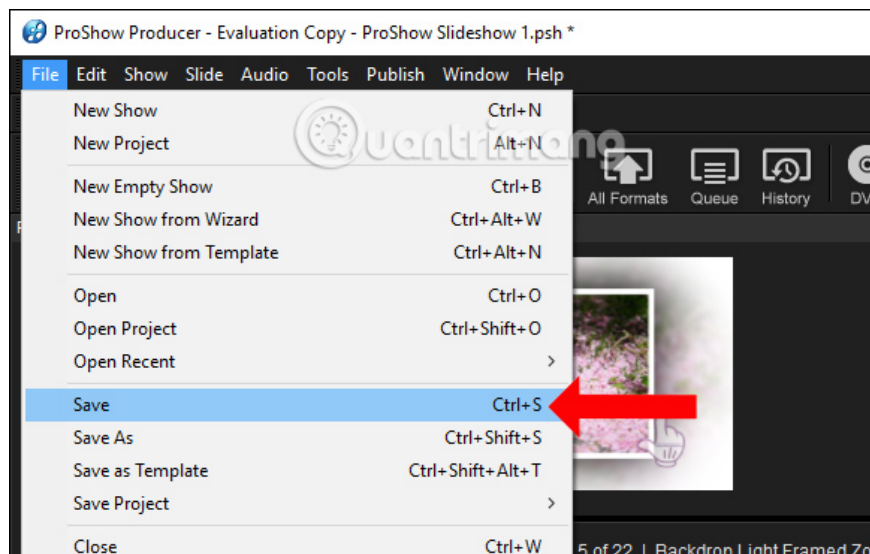

After you've finished editing and selecting the right location for the video, click **the OK button** at the bottom of the interface.

Going back to Proshow Producer's main interface and playing the video will see the logo inserted into the file.

Finally, click on **File** and then click **Save** to save the logo for the video.

With the feature to add watermark, logo to videos made from Proshow Producer, we will stamp our videos if we want. Logo will be edited with many different tools, from location, size or color, depending on users' choice.
