

Instagram launched a new update that adds many interesting features

In the latest update, Instagram has added 3 new features: group video chat, add topic channels to the Explore tab and add effects on the camera. From today, users can update and experience.

In the latest update, Instagram has added 3 new features: group video chat, add topic channels to the Explore tab and add effects on the camera. From today, users can update and experience.

In Instagram Direct, Instagram users can video chat with a friend or a group of friends up to 4 people. The special feature of this feature is that users can still perform other actions such as sending messages, posting Story or surfing News Feed while chatting with friends via the mini screen.

1. How to call Video Call on Instagram

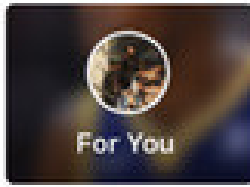

New topic channels are also added to Explore cards like For You, Art, Sports, Beauty, Animals . placed at the top of the page to help users quickly find videos with appropriate content. If you don't like it, you can hide it by pressing and holding and then selecting the **Mute** button.
