

Install Win from Usb, How to create Usb to install Win 7,8x, 10 easily

In this article I will guide you to use the USB (Min 4GB capacity) to create a Windows installation. How to Boot to USB drive to start installing the easiest Windows.

Instructions for creating USB Boot to install Windows 7.8

As you know, in the process of using a computer, the machine is slow, or error after 1 time of use is very common. At that time 99%, we need to **reinstall Win** , or else we have to use a slow 'turtle' machine. Many of you who do not install Windows on your own will never be afraid to reinstall, or have to ask someone else because it is too difficult.

However, after reading this article, you will partly notice that installing Windows is also easy if we know how.

Especially you do not need to run to buy Windows installation disc, just use your USB to create a **Windows installation with USB** easily. On the other hand, **installing win from this USB** is faster than using a DVD because the read and write data speed of usb is faster than that of the DVD drive.

In this article I will guide you to use the USB (minimum capacity of 4GB) to create a Windows installation. Booting to a USB drive to start installation.

1. Create a Windows installation from USB

First you will need to download the following:

1. A Windows installer in the form of an .ISO file

/// File in .ISO format is a file that can be used with a burner to burn a CD or DVD. With an installation of .ISO format, you can burn a DVD to install WIN. However, going to buy a DVD and then burn it, not every machine has a burner so it is quite embarrassing .///

====> The solution is to use the USB storage > 4Gb - a lot of people have to **create a Windows installation from USB** .

Many of you still aren't sure how to find the Windows installation? I will update you soon with the popular Windows 7 and 8 installations. Currently you can search easily, for example: win 7 64bit .ISO; win 7 ultimate 32bit .ISO; win 8 32bit .ISO;... . Then Download to device.

Download the ISO file installer Windows 7, 8, 8.1 from the Microsoft homepage

1. For your convenience. I provide a link to download **Windows 7 All Editions SP1 (x86x64) .iso**. This is an integrated Windows 7 installation, you can choose to install 32bit or 64bit, choose Professional or Ultimate versions, .

Link to download Fshare:

<http://www.fshare.vn/file/AYCMWKT4E7>

1. **Download the software Windows 7 USB / DVD Download Tool** - This is a free software that helps us create a Windows installation from USB.

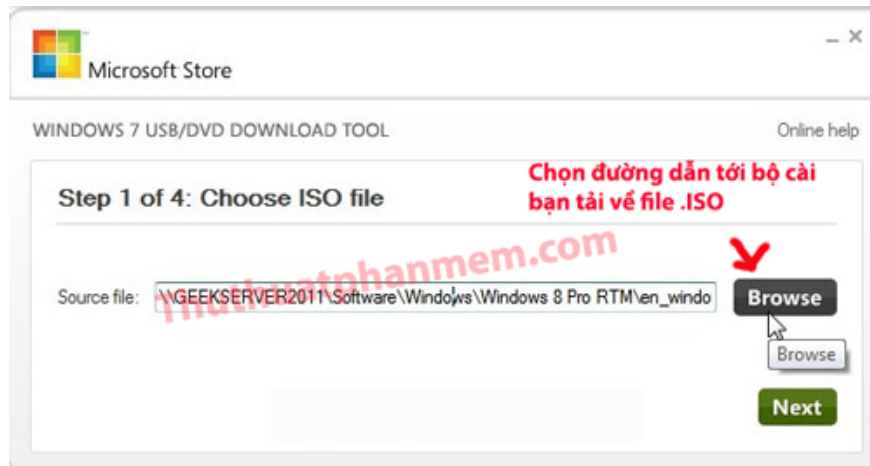

Software download link:

<http://f1.tuviviet.net/cf/Files/soft/2012/11/Windows7-USB-DVD-tool.exe>

The installation is simple, just like the usual software. You double-click the downloaded file named: **Windows7-USB-DVD-tool.exe** to start the installation.

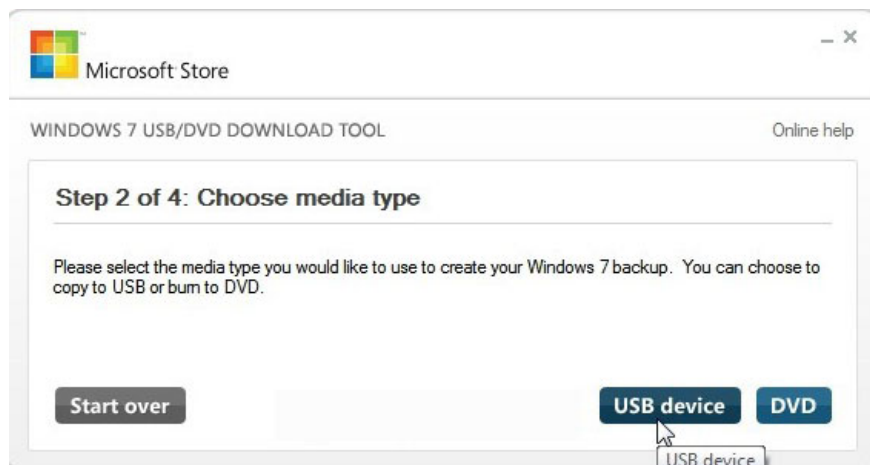

1. **Use the above software to create a USB containing the Windows installer:** The instructions are shown in the image below:

Step 1: Turn on the newly installed software. Interface as shown.

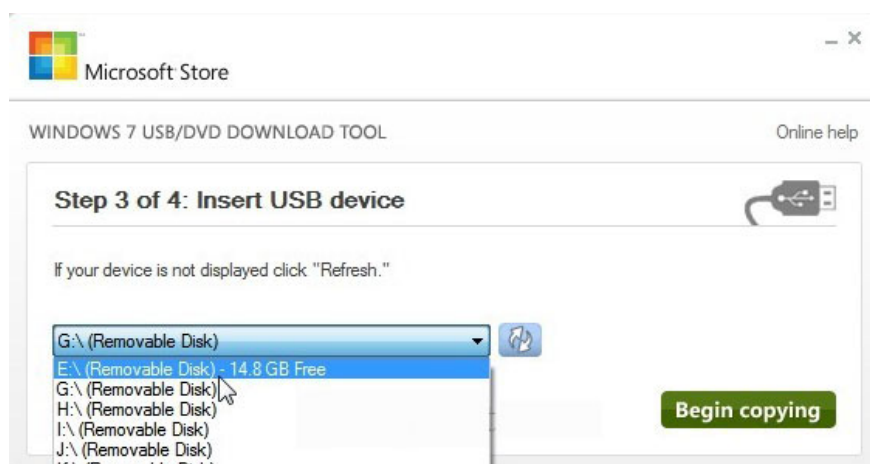

Click **Browse**, then select the downloaded .ISO Windows installation in step 1. Then select **Next** to continue.

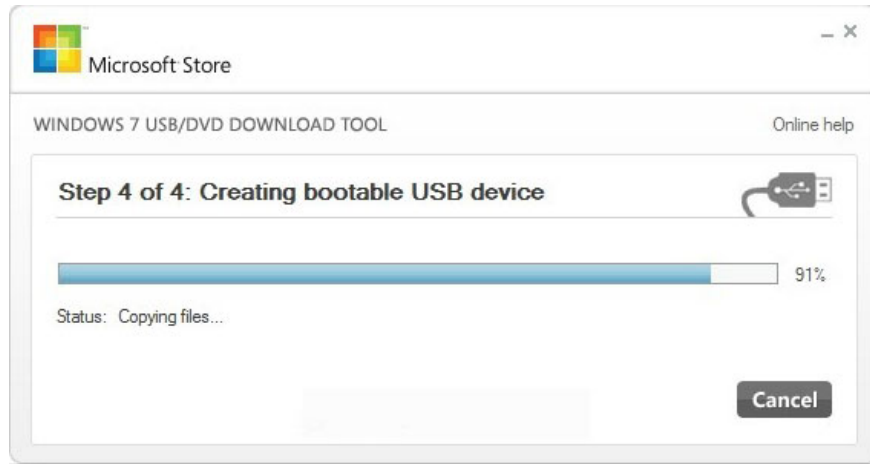

Next, click on **USB device**.

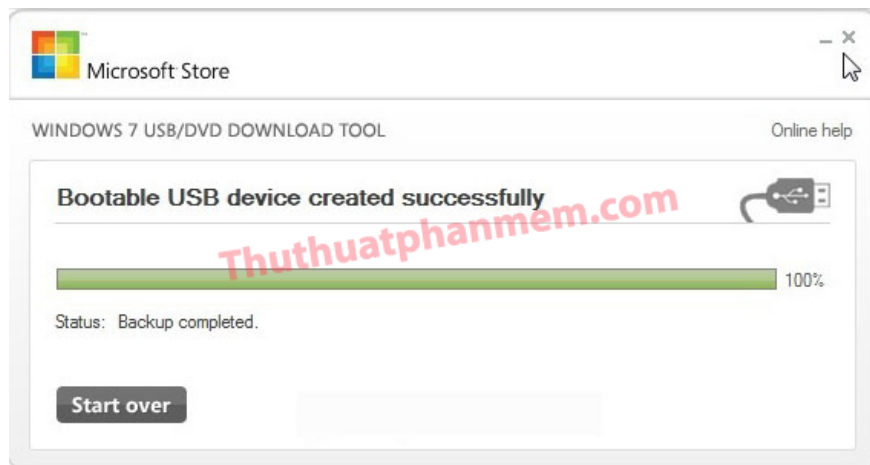

Then select the **USB flash** drive you want to use. Next, choose the correct USB drive.

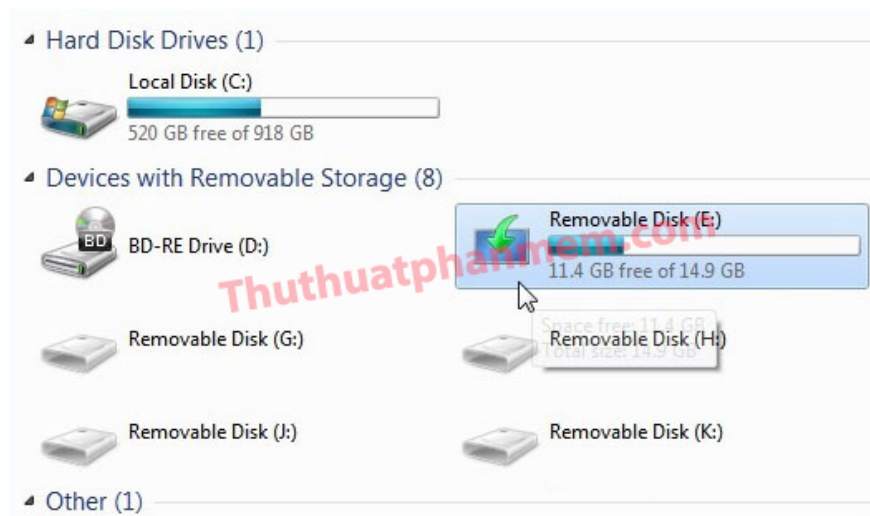

Click **Begin Copying** and wait for about 15 minutes. While the flash drive is Format and Windows ISO is copied to USB.

Once completed, close the application.

Open My Computer, you will see the following icon on the USB drive. Thus, the **installation of Win from USB** has been successful. You exit USB and use to Boot into Win installation from USB.

2. Ways to Boot into USB - Install Win from USB
